

# VENDOR BREACH MONITORING SERVICE

## Real-Time Data Breach Notifications

LookingGlass Vendor Breach Monitoring provides near real-time alerts indicating if there has been a data breach with any of your third party vendors. The service monitors a select group of data breach resources on the open source Internet for mentions of your third party vendors, as well as indicators and warnings of potential threats.

LookingGlass takes it one step further by vetting and validating all incidents to eliminate false positives. Once a finding has been confirmed, you receive the URL where the information was found, the name of the vendor involved, and a brief excerpt of the finding. Having comprehensive information like this helps you take the necessary measures to mitigate any future threat.

### INFORMATION IS POWER

With Vendor Breach Monitoring, you will know about cyber incidents within your vendors' networks before they disclose the information to you and the public. Unlike some monitoring services, LookingGlass security analysts vet the data breach information before it is sent to you, thus reducing false positives which waste time and erode confidence in your vendor management program.

Take your third party vendor management to the next level by receiving timely insight into breach announcements concerning the vendors of your choosing.

**LOOKINGGLASS**

On Wed, 14 June 2017 12:12:46 EDT our indication and warning technology detected the following incident and escalated the finding to our 24x7 Operations Center. After reviewing the incident and its context, it was sent to our attention. This finding includes an Indication term and a threat term that were configured as part of this service. Please contact us if you need additional support. The Security Operations Center can guide you to the appropriate investigator to support your request.

Message: Personal data from ██████████ hack surfaces online

Back in June, 2016, ██████████ announced it was investigating a data breach that impacted employee and corporate data, including customer data. Today, ██████████ reports that personal information acquired by the hackers last year has appeared online.

Poster: Dissent

**LOOKINGGLASS**

LookingGlass takes vendor breach monitoring one step further, by vetting and validating all incidents to eliminate false positives.

Vendor Breach Monitoring lets your organization take a vigilant stance against data breaches. Having this information at the onset of a breach allows you to take the necessary steps to monitor your vendors, generate reports, and notify stakeholders responsible for third party monitoring, 24x7x365.

**FEATURES**

**BENEFITS**

LookingGlass Cyber Security Center (CSC)

- 24x7 monitoring using state-of-the-art technology, so you know about a vendor breach even in the middle of the night

Real-Time Alerts

- Learn about breaches when they happen – our experienced analyst team is continuously searching relevant sites for mentions of third party vendors

Human-Qualified Intelligence

- Reduce false positives and avoid sending your security teams down rabbit holes because LookingGlass expert analysts have reviewed all findings, curated relevant information, and delivered reports in a timely manner

## ABOUT LOOKINGGLASS CYBER SOLUTIONS

LookingGlass Cyber Solutions delivers unified threat protection against sophisticated cyber attacks to global enterprises and government agencies by operationalizing threat intelligence across its end-to-end portfolio. Scalable threat intelligence platforms and network-based threat response products consume our machine-readable data feeds to provide comprehensive threat-driven security. Augmenting the solutions portfolio is a worldwide team

of security analysts who continuously enrich our data feeds and provide customers unprecedented understanding and response capability into cyber, physical and 3rd party risks. Prioritized, relevant and timely insights enable customers to take action on threat intelligence across the different stages of the attack life cycle. Learn more at <https://www.lookingglasscyber.com/>.
