

FOURTH ANNUAL LAKE TAHOE ELECTRIC TRANSPORTATION FORUM

SPONSORSHIP PROSPECTUS

THURSDAY, AUGUST 20, 2026

www.LTETF.com

HOSTED AT THE
TAHOE BLUE EVENT CENTER

MISSION:

Red Rock Studio Consulting, LLC is a Nevada based company dedicated to empowering progress through knowledge by hosting world class conferences that inspire innovation and foster collaboration in renewable energy, water quality, and sustainability. Our mission is to connect thought leaders, experts, and change makers, providing them with a dynamic platform to share insights, spark meaningful conversations, and drive actionable clean energy transportation solutions for a sustainable future.

VISION:

By developing and implementing clean energy solutions for transportation, promoting conservation, and collaborating effectively with stakeholders and conservation organizations, we aim to preserve and protect the beauty of Lake Tahoe for future generations.

LTETF 2026 highlights real world projects, research, and solutions for clean energy transportation including:

- Tourism and recreation
- Transit and micro transit electrification
- Public and private fleet transition
- Bistate policy coordination
- Electrical grid readiness and resilience
- EV electric charging station infrastructure
- Workforce development

WHY SPONSOR LTETF 2026?

Position your organization as a leader in the transition to clean energy mobility technologies in all modes of transportation, including electric, hydrogen fuel cell, propane, renewable diesel, natural gas, and biofuels.

Advance collaborative policy and planning efforts related to EV adoption, charging infrastructure, hydrogen fuel cell development, transit electrification, microgrids, fleet transition, and corridor planning for personal, commercial, and government fleets.

Showcase products, data, technology, and projects to a highly specialized and engaged audience during the forum at the "Zero Emission Zone" exhibit located on the 1st floor of the Tahoe Blue Event Center.

Connect directly with decision makers driving transportation infrastructure, and investment in the Lake Tahoe Basin after the forum at the "High Voltage Nights" mixer located in the Tahoe Blue Vodka Bar.

Support the long term environmental health of the Lake Tahoe Basin by unifying our efforts.

AUDIENCE AND REACH

Expected Attendance: 150-300 Representatives

REPRESENTATIVE SECTORS:

- State and local government (CA, NV)
- Regional transportation professionals and community planners
- Utilities and energy providers
- Public and private fleet managers
- EV manufacturers and EV charging station providers
- Environmental nonprofits and research institutions
- Hospitality, tourism, and recreation industries
- Technology, data, and infrastructure industries
