# WHERE does

QUICK-FIT® FIT?

Nearly anywhere! Nordfab's Quick-Fit clamp-together ducting fits many industrial and commercial air filtration and dust collection applications. Some of the industries using Quick-Fit include:

- Agricultural
- Automotive
- Boatbuilding
- Concrete / cement
- Chemical & food processing
- Furniture & woodworking
- Metalworking

- Mining
- Paper
- Plastics
- Powder, bulk / solids
- Recycling
- Textile / nonwovens
- Vehicle exhaust

Nordfab Ducting is the world's largest manufacturer of clamp-together ducting.

A few examples of specific industrial / commercial sites where Nordfab's Quick-Fit® ducting is being used:

Woodworking / Boatbuilding

Nordfab® Quick-Fit was installed on a 10,000+ CFM system solely by the plant's maintenance staff. Nordfab's Gripple suspension system is used to hang all the ductwork.

Concrete

Quick-Fit is used for dust control in concrete batch plants. Lafarge has mandated only Nordfab ducting be installed in its batch plants.

Food Processing

Nordfab Quick-Fit was used for dust extraction on commercial blending machines for artificial sweetener. The customer chose Nordfab mainly for the ease of cleaning.

Metalworking

For a machining shop, Nordfab fabricated all inlet and outlet transitions to match the grinders and dust collector. Quick-Fit made installation a snap.

Paper

At a paper manufacturing plant, custom-made Quick-Fit floor sweeps are being used to remove large paper trimmings.

Recycling

At a recycling plant, Quick-Fit was chosen for its speed of installation and conveys dust from a variety of machines separating waste and reclaimed product.

Plastics

Quick-Fit is used on nine machines at a plastic cutting, grinding, and shaping facility processing block and sheet plastics.

Vehicle Fume Exhausts

Quick-Fit is used on vehicle exhaust extraction in firehouses throughout the USA. Quick-Fit is also being used at automobile dealership service centers.
