

POWERSHED

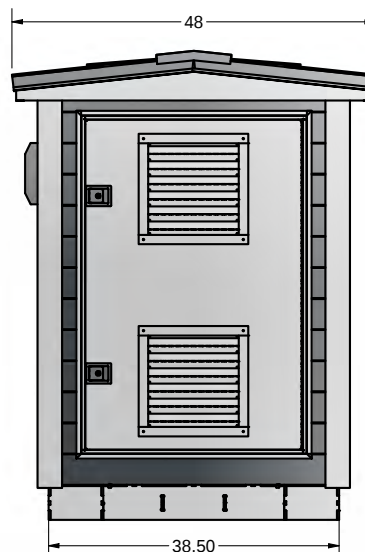

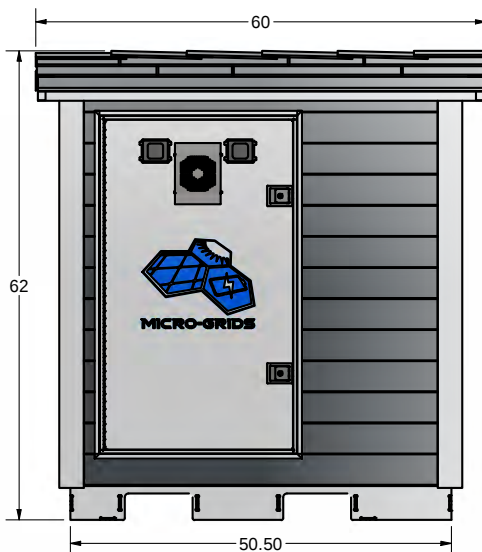

The Micro-Grids POWERSHED delivers whole-home backup and solar integration in one sleek, weatherproof, fireproof shed. Expandable from 15 kWh to 30 kWh of battery storage and a 16 kW hybrid inverter, it powers you through outages, peak demand, or off-grid living. Insulated and airtight, it thrives in extreme heat or cold, saving energy on internal cooling or heating. App monitoring with alerts, generator input, and a plug-and-play setup make it a breeze. Use the forklift pockets to move it. It has great curb appeal with modern metal siding. Its small, self-standing footprint allows the install to be away from your home, keeping your family safe while providing energy independence.

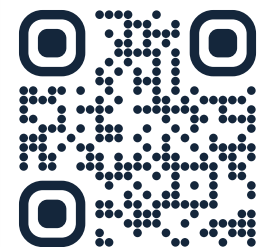

MODEL	PS15-1	PS30-1
BATTERY STORAGE	15 kWh	30 kWh
TOTAL SERVER RACK BATTERIES	3	6
TOTAL INVERTERS	1	
AC OUTPUT BATTERIES + SOLAR	16 kW (66.7 A)	
AC OUTPUT BATTERIES ONLY	12 kW (50 A)	
MAX SOLAR ARRAY	21 kW	
NOMINAL AC VOLTAGE	120/240 or 208 VAC	
NOMINAL DC VOLTAGE	40 – 60 VDC	
DIMENSIONS	60" W x 48" D x 62" H	
INTEGRATED COOLER	✓	
INTEGRATED HEATER	✓	
600 AMP BUS BAR	✓	
ROCKWOOL INSULATED	✓
