

URBAN VitalControl

**DIGITAL
HEALTH MONITORING**

URBAN VitalControl

Experience the future of digital health recording now with URBAN VitalControl! This pioneering device enables a precise monitoring and documentation of the health status of your animals. Equipped with an RFID reader and a thermometer, you use the VitalControl to keep an eye on the health of your calves, cows or lambs at any time.

RFID transponder (ISO 11784/85)

Left-right neutral, rotating measurement head with integrated measuring tip

Long, pliable, deflectable measuring tip made from a flexible, tissue-friendly material

Visual signalling of the measurement results

Illumination of the anal area

Clear display

«This is what modern, digital animal data recording looks like!»
Dr. Andreas Deininger

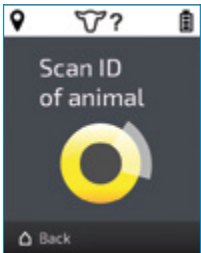

Comfortable handling

Vibration to signal the end of the measurement

Technical specifications:

- Low power consumption
- Colour display with high contrast
- RFID reader with backup battery
- Storage: 128MB, 512MB SD card
- Rechargeable battery with 8 hours of operating time
- WiFi compatible
- USB-C port for battery charging and data transfer

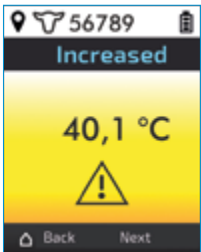

USB connection

Scan the animal's RFID transponder.

Overview of the fever curve, body weight and temperature of an animal over 6 days.

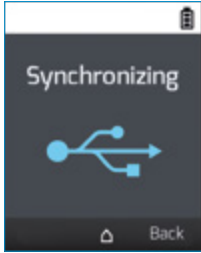

Measure the body temperature. Any temperatures that are higher than normal can quickly be identified.

ID	Station	
1012	10	1
1042	10	1
2011	20	5
2319	20	5
9012	20	12

Create alert lists.

Weight and daily gains are displayed together and evaluated (Red / Yellow / Green).

Synchronise with external devices and herd management systems.

Our vision: the modernisation of an industry

Since 1984, URBAN has been working passionately to develop efficient solutions for farmers to close existing gaps. Our aim isn't to make as much money as possible, we simply want to meet the needs of the farming industry. Our 100 dedicated employees ensure that our innovative products are available in over 60 countries across five continents. Despite our global presence and continuous exchanges with farmers from around the world, we remain proud of our roots in Wüstring, Lower Saxony.

Since our founding, we have developed, produced and distributed URBAN products with a relentless focus on quality and innovation. All our experiences go back into the improvement of our products to guarantee sustainable and future-proof calf and lamb rearing. We are always looking forwards as we firmly believe that our combination of traditional and modern approaches, as well as the resulting technological innovations, can revolutionise the entire sector.

As a future-oriented company, we constantly develop needs-oriented and efficient solutions that help to make calf and lamb rearing more sustainable. We cover all areas that are important for successful rearing.

We keep an eye on the development and health of your animals, and ensure that the best conditions in the barn are maintained at all times. In doing so, we create excellent conditions for rearing and optimal animal health.

As a reliable and equal partner, we develop our products with the aim of making your work easier and minimising the amount of time you have to spend working. We believe that our innovative solutions will help you achieve the best for you and your animals.
