

Animal DNA Profiling

- ✓ Affordable
- ✓ Accurate
- ✓ Fast

DNA profile is a unique form of genetic identification, which needs only be produced once and can be stored as a permanent DNA record throughout the animal's life. The availability of DNA profile could be used to identify an animal that may have been lost or stolen, and subsequently recovered.

○ Dog

● Horse

● Cat

● Avian

Why choose us

Forensic Genomics International (FGI), a subsidiary of BGI, one of the world's largest genomics organization, has serviced over 200,000 satisfied customers with an accuracy of 99.99999%. With the highest standards and strictest quality control in laboratory testing, FGI is the reliable choice for global clients.

Here's what you do:

Order test kit

STEP
1

Collect & send samples

STEP
2

Receive your results

STEP
3

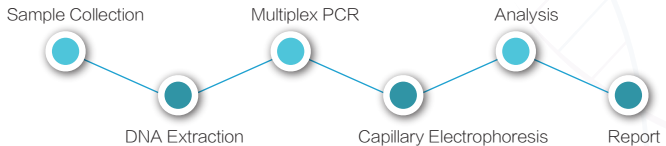

Types of Sample :

Animals	Samples
Dog	3-5 swabs
Horse	15-20 hairs with roots plucked from the mane or tail
Cat	3-5 swabs
Avian	3-5 feathers

Please note:

- The DNA is extracted from the horse hair follicle, so please do not cut hairs.
- We cannot test all bird breeds known. Kindly state the bird breed you are testing before you send back to us.
- Except for identical twins.

We use multiple genetic markers to determine a animal's DNA profile. The test result is a list of markers that are unique and permanent, which will be sent back electronically within 5 working days.
