Bathroom Collection

GISSI[®]

Drawing inspiration from the simple beauty of water, Gessi designs and produces exclusive bathroom and kitchen faucets and fittings.

Since our founding in 1990 by Umberto Gessi we have been guided each day by his vision, his entrepreneurial zeal and his rule-breaking spirit.

In 15 short years Gessi's passionate pursuit of purity in line, form and function has built a brand name recognized and appreciated across the world, from Sydney to London to Los Angeles. A name now synonymous with fine design and fine living.

While others outsource, every phase of our manufacturing, from research through creating each component, is rendered by our 400-member extended family in a small valley at the foot of the Alps, northwest of Milan. From concept to creation, they confirm the Italian special taste for living, skills for exceptional design and deep appreciation for all that is beautiful.

This unyielding dedication to quality has built us into the largest vertically integrated manufacturer of luxury kitchen and bath faucets and accessories in Italy.

This is our essence. Gessi is Italian design, defined.

The luxurious nature of products by Gessi is an expression, the final realization of the extreme care committed to every detail of the design and the manufacture, even to the refined elegance of the packaging.

Gessi believes in choice. From classic to modern designs, our range of kitchen and bath products offers an extraordinary variety of solutions, able to fit virtually every project. Discover our innovative approaches to dispensing water, shapes with decisive cuts. Forms that are unique without being eccentric. Designs that are elegantly functional but plucky and different. Just like Gessi.

These products furnish the world's most

What also makes us original is our philosophy. We embrace and promote a culture of caring for what we make but also for how we make it.

That care extends to careful stewardship of the environment. We work in a "green" factory, a place thoughtfully conceived to conserve resources and to function in harmony with nature, even to the aesthetics of what we plant on our land. And we care about people, for the Individual members of the Gessi family, for our partners and for our clients.

prestigious houses, the most exclusive resorts and hotels, transforming practical space into personal space. Luxury is about quality of time. Relaxing. Indulging. Recharging and rebalancing, infusing life with intimacy.

Gessi also believes in change. By launching new product lines every year, by constantly breaking the rules, by research and technological advancement, Gessi remains ever original and true to the vision of our founder.

So what we create embodies a vision of beauty, elegance and quality, but also conveys deeply felt values. That philosophy is simple and honest: Made with Love.

Welcome to our world.
