## Type 304 Premium Stainless Steel

HamatUSA sinkware is made from durable Type 304 stainless steel, an optimal mix of nickel and chromium, making our sinkware exceptionally resistant to corrosion and stains for the life of the product. It provides a hygienic, scratch-resistant and resilient surface that requires minimal care and maintenance.

## SpexEdge

A beveled edge on the outer rim of select undermount sinks provides increased structural rigidity for the entire sink span and creates a smooth and finished look. SpexEdge is found only on HamatUSA sinks.

## StoneShield Undercoat Protection

A marble powder based undercoating specially formulated and applied over pads. It reduces the noise of clattering dishes and running water. It also prevents condensation and thermally insulates your sink keeping hot soaking water hot for a longer period.

## Sound Deadening Pads

Made of natural rubber, Sound Deadening Pads help reduce the noise of clattering dishes and running water. It is a common feature to all HamatUSA sinks.

## TotalGuard+

An exclusive feature to our Rendezvous, Contrive, Hudson and Prizm Collections. This complete wrapping of rubber pad insulation ensures thermal insulation, prevents condensation, and optimal noise reduction making them some of the quietest sinks available today.

## Lifetime Limited Lifetime Warranty

HamatUSA sinks are covered by an industry-leading Limited Lifetime Warranty to the original purchaser against any possible defects in materials and workmanship. We are not satisfied unless our customers are completely satisfied with our products.

# Sink Selection Guide

## How to select the ideal sink for your needs.

### Your Kitchen Style

Start by asking yourself whether your kitchen is traditional, transitional, rustic, or contemporary. Then determine the shape, size and features that will best suit your style of living and everyday needs. HamatUSA sink designs vary with each product family, so you're sure to find one that's just right for your kitchen, lavatory or prep area.

### Material

HamatUSA sinks are available in Stainless Steel, Porcelain Enameled CeraSteel, Chelsea Fireclay, SiOStone Granite Composite and Breckenridge Hand-Hammered Copper. Each material has its own performance features and distinct look.

### Check Your Measurements

Choose the right sink to fit your cabinet. Sink measurements and minimum cabinet sizing will be found with each sink shown in this catalog.

### Installation Styles

Undermount sinks are best for stone or solid surface countertops. They are mounted from the underside of the counter, leaving a zero-barrier counter surface to sweep scraps and crumbs into the sink. Topmount sinks are best if your countertop is a laminate with a pressed-wood core. They're also good with solid surface countertops. With topmounts, the sink's bowl drops into a hole in the countertop and rests on the perimeter.

### Number of Bowls

How will you be using your sink? A serious home-chef may want several depth, large bowls to accommodate stockpots and roasting pans. If you'll be using your sink primarily for rinsing dishes, a single bowl of moderate depth will suffice. When in doubt, a large, depth single bowl is the best choice.

### Depth of Bowls

Deeper bowls in the 9" range will accommodate large pots and allow you to thaw larger food items. Deeper bowls also mean less splashing. Shallow bowls down to 5" are ideal for food preparation and will also accommodate a garbage disposer.

### Prep Sink

A well-placed prep sink in a busy kitchen can noticeably improve flow and efficiency and can also double as a bar-sink in other areas of the house. Prep sinks of various depths and shapes can be found built-in on many HamatUSA models or purchased separately for other locations like a countertop island.

## Chelsea Fireclay Apron-Front Farmhouse & Undermount Sinks.

HamatUSA Fireclay sinks are hand made in our Israeli Fireclay factory through a process that is both old and new.

We start with a proprietary blend of Fireclay slip that is shaped using the most advanced injection molding techniques on the market today. After being hand-brushed and sponged, the raw sinks are cured for up to 48 hours. Then they are sprayed with glazing materials and fired for over 20 hours in a kiln at 2200° F.

Being fired at such a high temperature causes the Fireclay material to fuse together with the glaze, creating the glossy, cool-to-the-touch finish that defines fine Fireclay. Our modern-traditional method results in sinks that are chip, crack, and scratch resistant-ideal for high-traffic kitchens. Fireclay sinks will last a lifetime, some of the oldest sinks in use today are of this variety.

Our Fireclay sinks also have the soul-satisfying benefit of being made from all natural materials that are completely lead-free, making them eco-friendly. We use our Fireclay process in Chelsea, a line of modern apron-front farmhouse and undermount sinks available in classic white, matte black, matte grey and biscuit. All are backed by a Limited Lifetime Warranty and crafted with the same quality and durability that is a signature of HamatUSA Sinks.

HAMAY USA  
MADE IN CHINA

# CeraSteel

## **CeraSteel** Porcelain Enameled Stainless Steel

HamatUSA has added an innovative twist to the universal appeal of porcelain enamel in the new CeraSteel Collection.

CeraSteel porcelain enamel sinks feature a light and resilient 16 gauge steel core that is a brilliant departure from the heavy cast iron foundation of other porcelain enamel sinks. The fact that our porcelain enamel sinks are only 65% of the weight of typical cast iron sinks enables designers to install porcelain enamel where they couldn't before.

HamatUSA porcelain enamel sinks provide the glossy look and feel people know and love about porcelain enamel. It's an enduring finish that's been honored and appreciated throughout history. HamatUSA uses an enameling process that traces its inspiration back to 2000 BC and the first Greek craftsmen to fuse metal and glass.

We start with a genuine HamatUSA steel sink that is coated with high performance materials twice—first with a ground coat and second with a cover coat—and then fired at 1500° F after each application. The heat bonds the coatings with the metal to create a high-shine finish that's resistant to impact, heat, stains, chips, scratches and even germs.

Our exclusive porcelain enamel comes in eight distinctive colors which are featured in our CeraSteel line of sinks.

# CeraSteel Collection Enamel Steel Undermount

● Resilient 16 gauge steel core ● Non-porous surface resists stains, chips and scratches ● Easy Undermount installation ● 10 Year Limited Warranty

# SiOStone FAQ

The chemical compound silicon dioxide, also known as silica (from the Latin silex), is an oxide of silicon with a chemical formula of SiO<sub>2</sub> and has been known for its hardness since antiquity. Silica is most commonly found in nature as sand or quartz, as well as in the cell walls of diatoms. Silica is the most abundant mineral in the Earth's crust.

# Classic

## Classic. Designer. Gourmet.

You simply can't go wrong with the **Classic Collection**. The simple, timeless designs pair well in any kitchen. Popular without appearing common, the Classic Collection has a moderate radius, which makes it quick and easy to clean. The Classic Collection is an easy choice for any kitchen design you're considering.

Soft curves and abundant capacity characterize the models within the **Designer Collection**. Go with a variety of prep bowl sizes or an open bowl design—all featuring the Designer Collection's distinctive D-shaped bowl.

The **Gourmet Collection** was designed with the resident home-chef in mind. The large capacity sink line blends commercial efficiency with residential sensibility.

## Hand Hammered Copper & Pewter Sinks.

There's something elegant and pure, yet slightly rustic about handworked copper.

HamatUSA copper sinks are formed from heavy 16 gauge copper sheet. Which lends itself well to design variations like hammering and a variety of artistic flourishes like those you'll find in our designs. Copper's living finish will also develop a patina over time meaning your sink will be as individual as you are.

In addition to the aesthetics of this material, copper boasts unique performance features. Naturally corrosion and rust-resistant. Copper sinks can last for generations. Copper also has natural antimicrobial properties. Unlike other sink materials, copper doesn't support harmful bacteria making it an important germ-fighting ally in kitchens and bathrooms.

Yet for all these benefits as well as their undeniable beauty, they are as low maintenance as can be and require no special care. Regular cleaning agents that are used to clean conventional surfaces work fine on copper sinks.

HamatUSA hand-hammered copper sinks are available in a variety of styles, some with whimsical motifs-and sizes to meet your space requirements in the lavatory, kitchen or bar-prep area. For performance and prestige, HamatUSA copper sinks are in a class of their own.

# LIMITED LIFETIME WARRANTY

HamatUSA warrants all the mechanical parts to be free from manufacturing defects in material and workmanship for a "Lifetime".

"Lifetime" is defined as the period which the original consumer owns the home in which the HamatUSA "product(s)" are installed. If any product proves to be defective during the warranty period to the original owner, HamatUSA will provide, at its option, free of charge replacement parts or will replace the product.

This warranty does not cover parts or finishes that have been improperly installed, damaged, subjected to misuse, abuse or used in a location other than a residential indoor kitchen.

Faucet(s) subjected to abrasive cleaning, such as scratching or scuffing, or corrosive agents, including, but not limited to, bleach, ammonia or alcohol are not covered by this warranty.

Sink(s) subjected to improper installation or modification of original product, damages resulting from abuse, such as scratches that occur from, but not limited to, dropping heavy objects, scrubbing with steel wool, use of abrasive pads or cleaners. Improper application such as exposure to corrosive chemicals and photographic solutions.

The warranty does not cover shipping costs, labor costs or any other costs associated with the installation or replacement of the sink, faucet or part(s) and are extended only to the original consumer, who purchased the product. HamatUSA, at its discretion, may repair or replace the product or product component part(s) necessary to restore the product to good working condition.

HamatUSA reserves the right to inspect the installation prior to actual replacement of the product or component part(s). The warranty applies only to the original owner, providing the product has been installed in accordance with the installation instructions, used as recommended and installed in a residential indoor application.

HamatUSA is not responsible or liable for indirect, special or consequential damages arising out of or in connection with the use or performance of the product and its liability under this warranty is limited to replacement of the defective material.

The manufacturer makes no additional warranties, expressed or implied, and any implied warranty including that of merchantability or fitness for a particular purpose, is limited in its duration to the duration of the written limited warranties set forth herein.

Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages or limitation on the duration of an implied warranty, so the above limitations or exclusions may not apply to you.

This warranty gives you specific legal rights and may also offer other rights, which may vary from state to state, or province to province.

All HamatUSA Accessories: 1 year warranty

## COMMERCIAL LIMITED WARRANTY

HamatUSA WARRANTS ITS PRODUCTS INSTALLED IN A COMMERCIAL APPLICATION TO BE FREE OF MANUFACTURERS DEFECTS FOR A PERIOD OF 1 (ONE) YEAR. DURING THIS ONE YEAR PERIOD THE WARRANTY WILL BE TREATED AS WRITTEN IN THE RESIDENTIAL GUIDELINES ABOVE, FOR A PERIOD OF ONE YEAR.

# Optional Accessories Cutting Board Hardwood

Rubberwood is a light-colored medium-density tropical hardwood obtained from the Pará rubber tree (*Hevea brasiliensis*), usually from trees grown in rubber plantations. Rubberwood is commonly known as the "environmentally friendly" wood, as it makes use of plantation trees that have already served a useful function.
