PRODUCT OVERVIEW 206-285

A FASCINATION FOR THE BATHROOM

Hartmut Dalheimer, Managing Director

Engelbert Himrich, Managing Partner

Sensuousness and sensibility – KEUCO’s passion for the bathroom runs through its veins, and this is evident in our products. A KEUCO bathroom awakens the emotions. It is an intimate place of well-being. It conveys elegance and luxury, and it combines aesthetics, ergonomics and functionality.

In no other room is this challenge more exciting and demanding than the bathroom. That is why this fascination still drives us forward. Since its founding in the year 1953, our company, which is still family-run today, has undergone a rapid and sustained transformation. From market leader for high quality bathroom accessories, KEUCO has evolved into the brand for the bathroom, with a wide assortment of furniture, faucets, accessories and mirror cabinets and from our early days we focused on offering concepts of complete bathroom furnishings.

Important factors contributing to our success are the contemporary, technically innovative products, the highest standard of quality, a clear orientation towards design, and state-of-the-art manufacturing facilities. Today, KEUCO products are sold around the world, and are market leaders in many areas. They are the result of intensive development work, the use of the best materials, and the most careful workmanship. We combine high-tech manufacturing and involved hand craftsmanship to achieve optimum results. KEUCO quality sets standards: Our products will convince you by their immaculate surfaces, maximum longevity, and perfect functionality. Each article is examined individually before being shipped out.

At KEUCO, the subject of design already played a pivoting role long before it even became a general topic of conversation. Our understanding of design involves striving to achieve classic-modern aesthetics that retain their contemporary feel, even after many years of use. Whether designed in-house or in cooperation with internationally recognized designers – KEUCO products are regularly distinguished by renowned awards.

But timeless design and long-lasting product quality are only two aspects of our sustainability philosophy. Equally important are responsible company management, and resource-saving production – with the help of our own water conditioning system for our electroplating plant, for example. We view the label “Made in Germany” as commitment to the kind of company management that aims to secure jobs in the long term.

KEUCO products are made in our own production plants in Hemer, Gütersloh and Bünde. German production provides us with a close proximity that is essential, so that we can develop and utilize the know-how of our employees on a long term basis, and so achieve seamless quality management. And that makes “Made in Germany” a promise of quality.

Our quality standard reaches far beyond Germany and Europe. We think global and produce local. Today our North American clients can enjoy the perfection combination of classic European aesthetics and uncompromising KEUCO quality, and experience our passion for the bathroom at every turn.

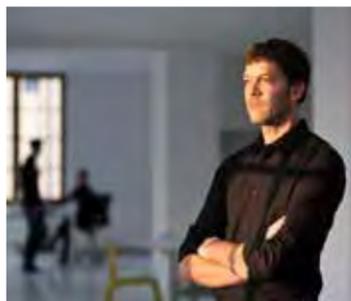

FREEDOM IS
HAVING A VARIETY
OF POSSIBILITIES

CLEAR LINES, IMPECCABLE DESIGN

The renowned design agency Tesseraux+Partner was commissioned to design EDITION 11. The faucets and accessories are in a class of their own, with a level of quality that you can see and feel and which pays off in the long-term.

The perfect washbasin faucets in polished chrome and brushed finishes of EDITION 11 are optimally suited for every kind of use – they fulfill any wish regarding individual bathroom planning.

Tesseraux+Partner
Dominik Tesseraux

WHEN FINISHES BECOME NOBLE

Produced using the PVD method, faucets with extravagant metallic surfaces in warm bronze, nickel and opulent black embody the beauty and lasting quality of EDITION 11.

-  **Chrome**
polished
-  **Bronze**
brushed
-  **Nickel**
brushed
-  **Black Chrome**
brushed

Three-hole faucets with a difference: Thermostatic temperature regulation on the left, flow rate on the right. After adjusting to your own desired temperature, by pulling it up, the regulator can be returned to its initial position so that the temperature setting is retained.

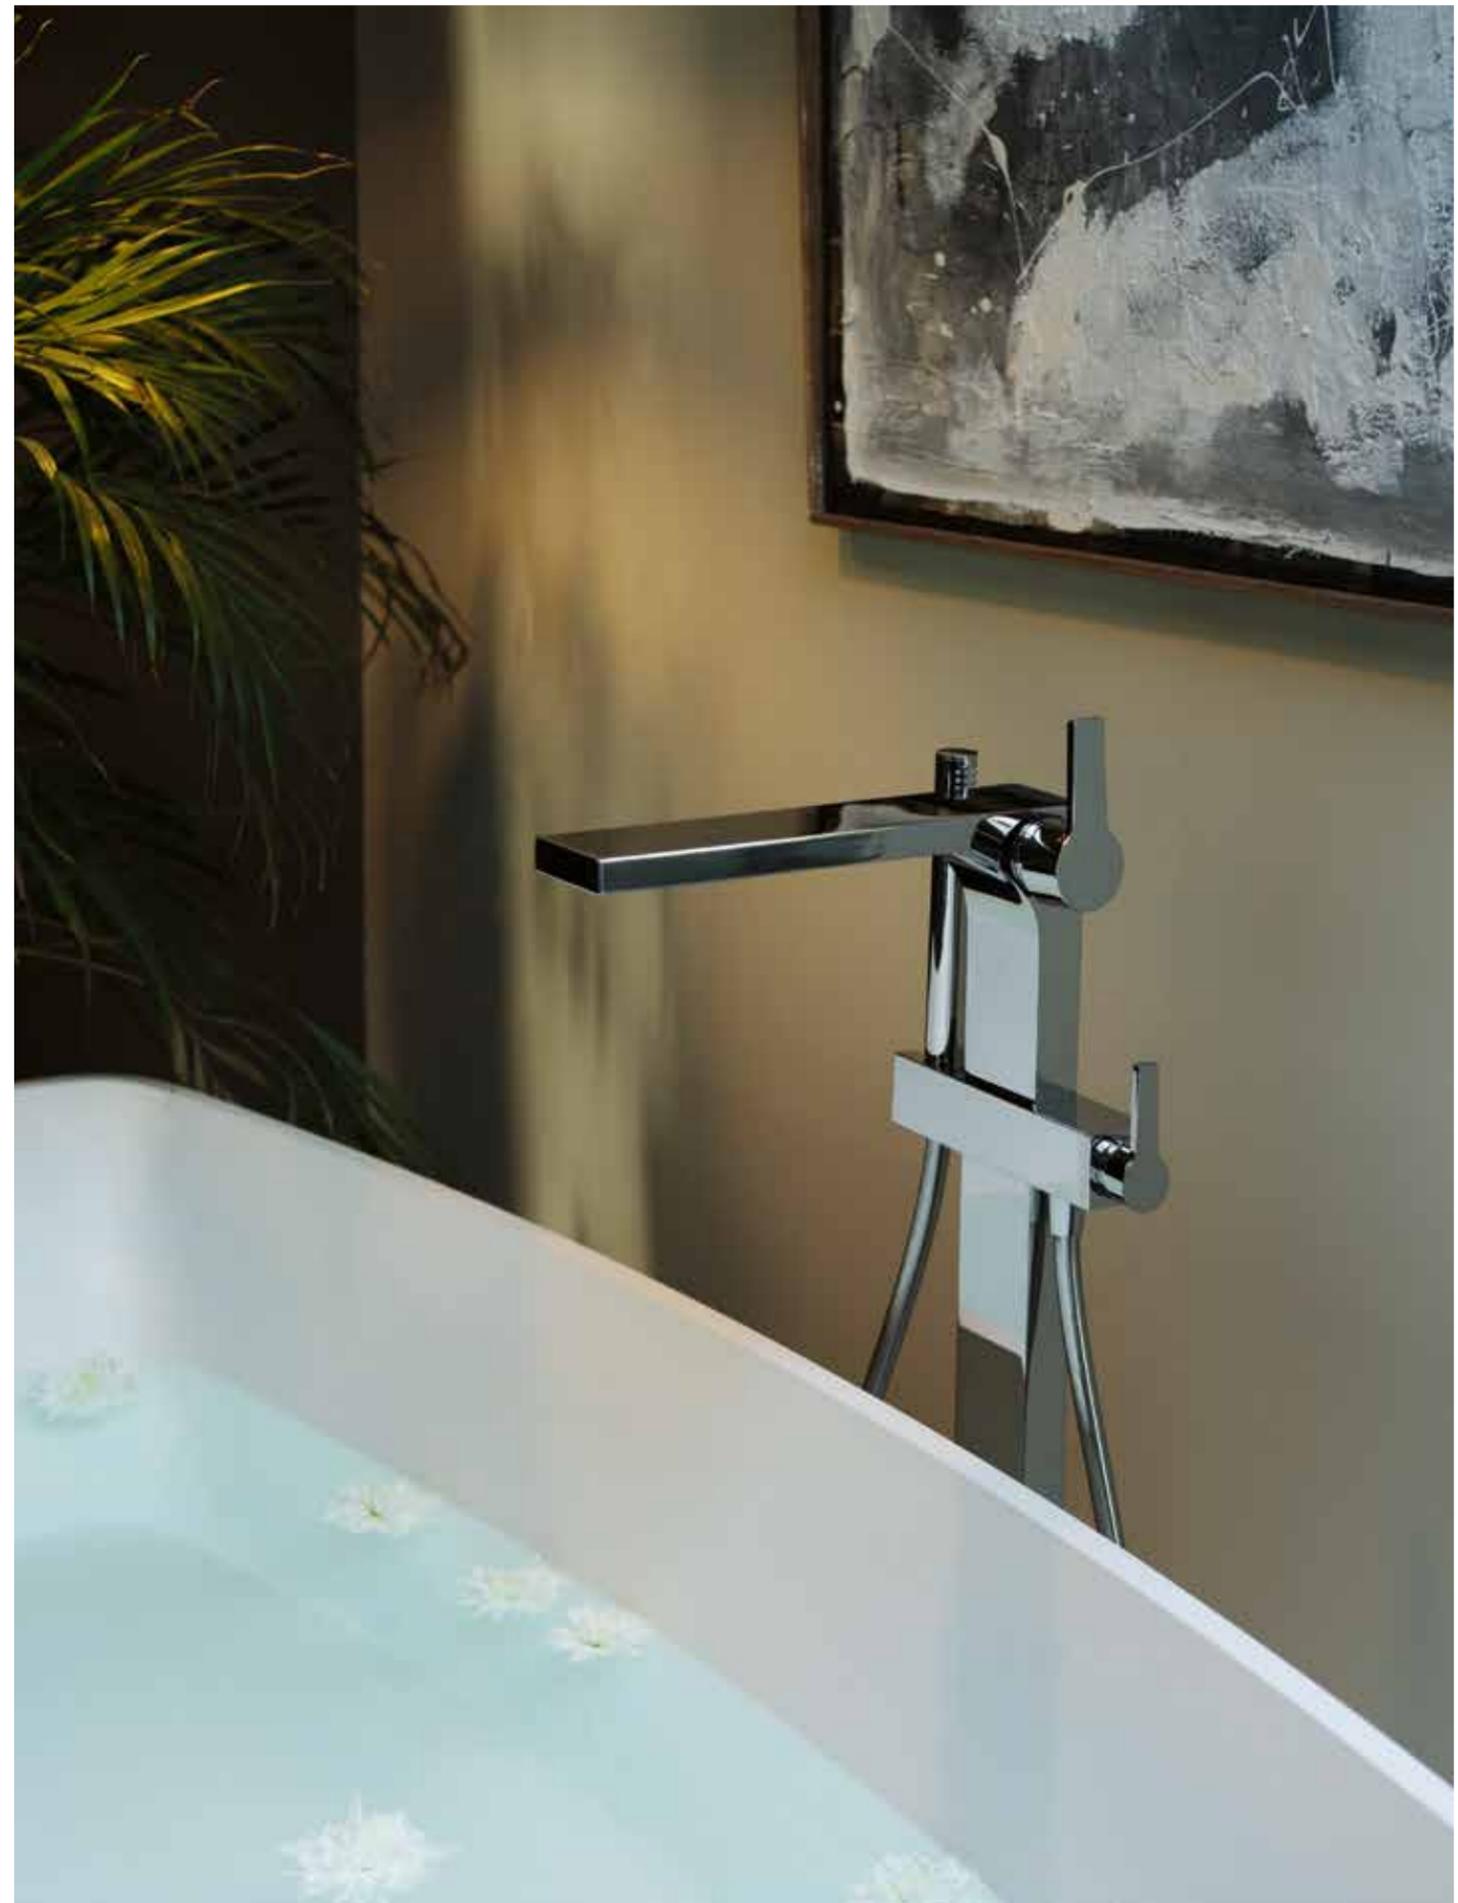

As with all EDITION 11 washbasin faucets, the wall faucet with single-lever mixer has a flow restrictor. It is available with three different spout lengths and reversible handle.

The particularly appealing design of the freestanding bath tub mixer with a separate waterway for the hand shower is very impressive. A gem in the bathroom, it can be combined with numerous bath tubs and, no matter what one's personal interior design is, gives every bathroom a special touch.

Shower rail and hand shower reiterate the weightless elegance of the design of EDITION 11.

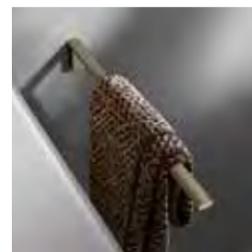

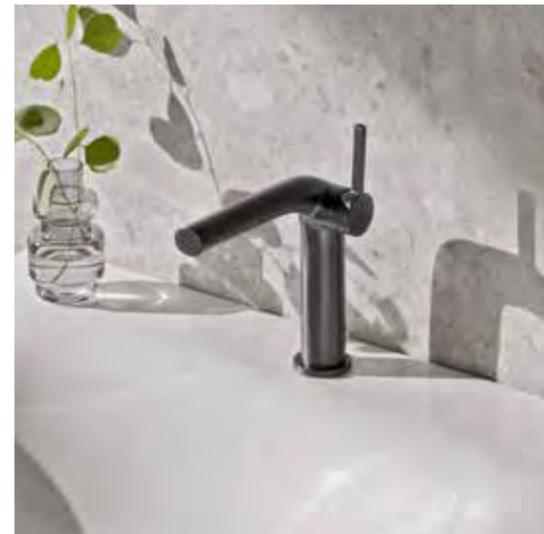

SOPHISTICATION MADE IN GERMANY

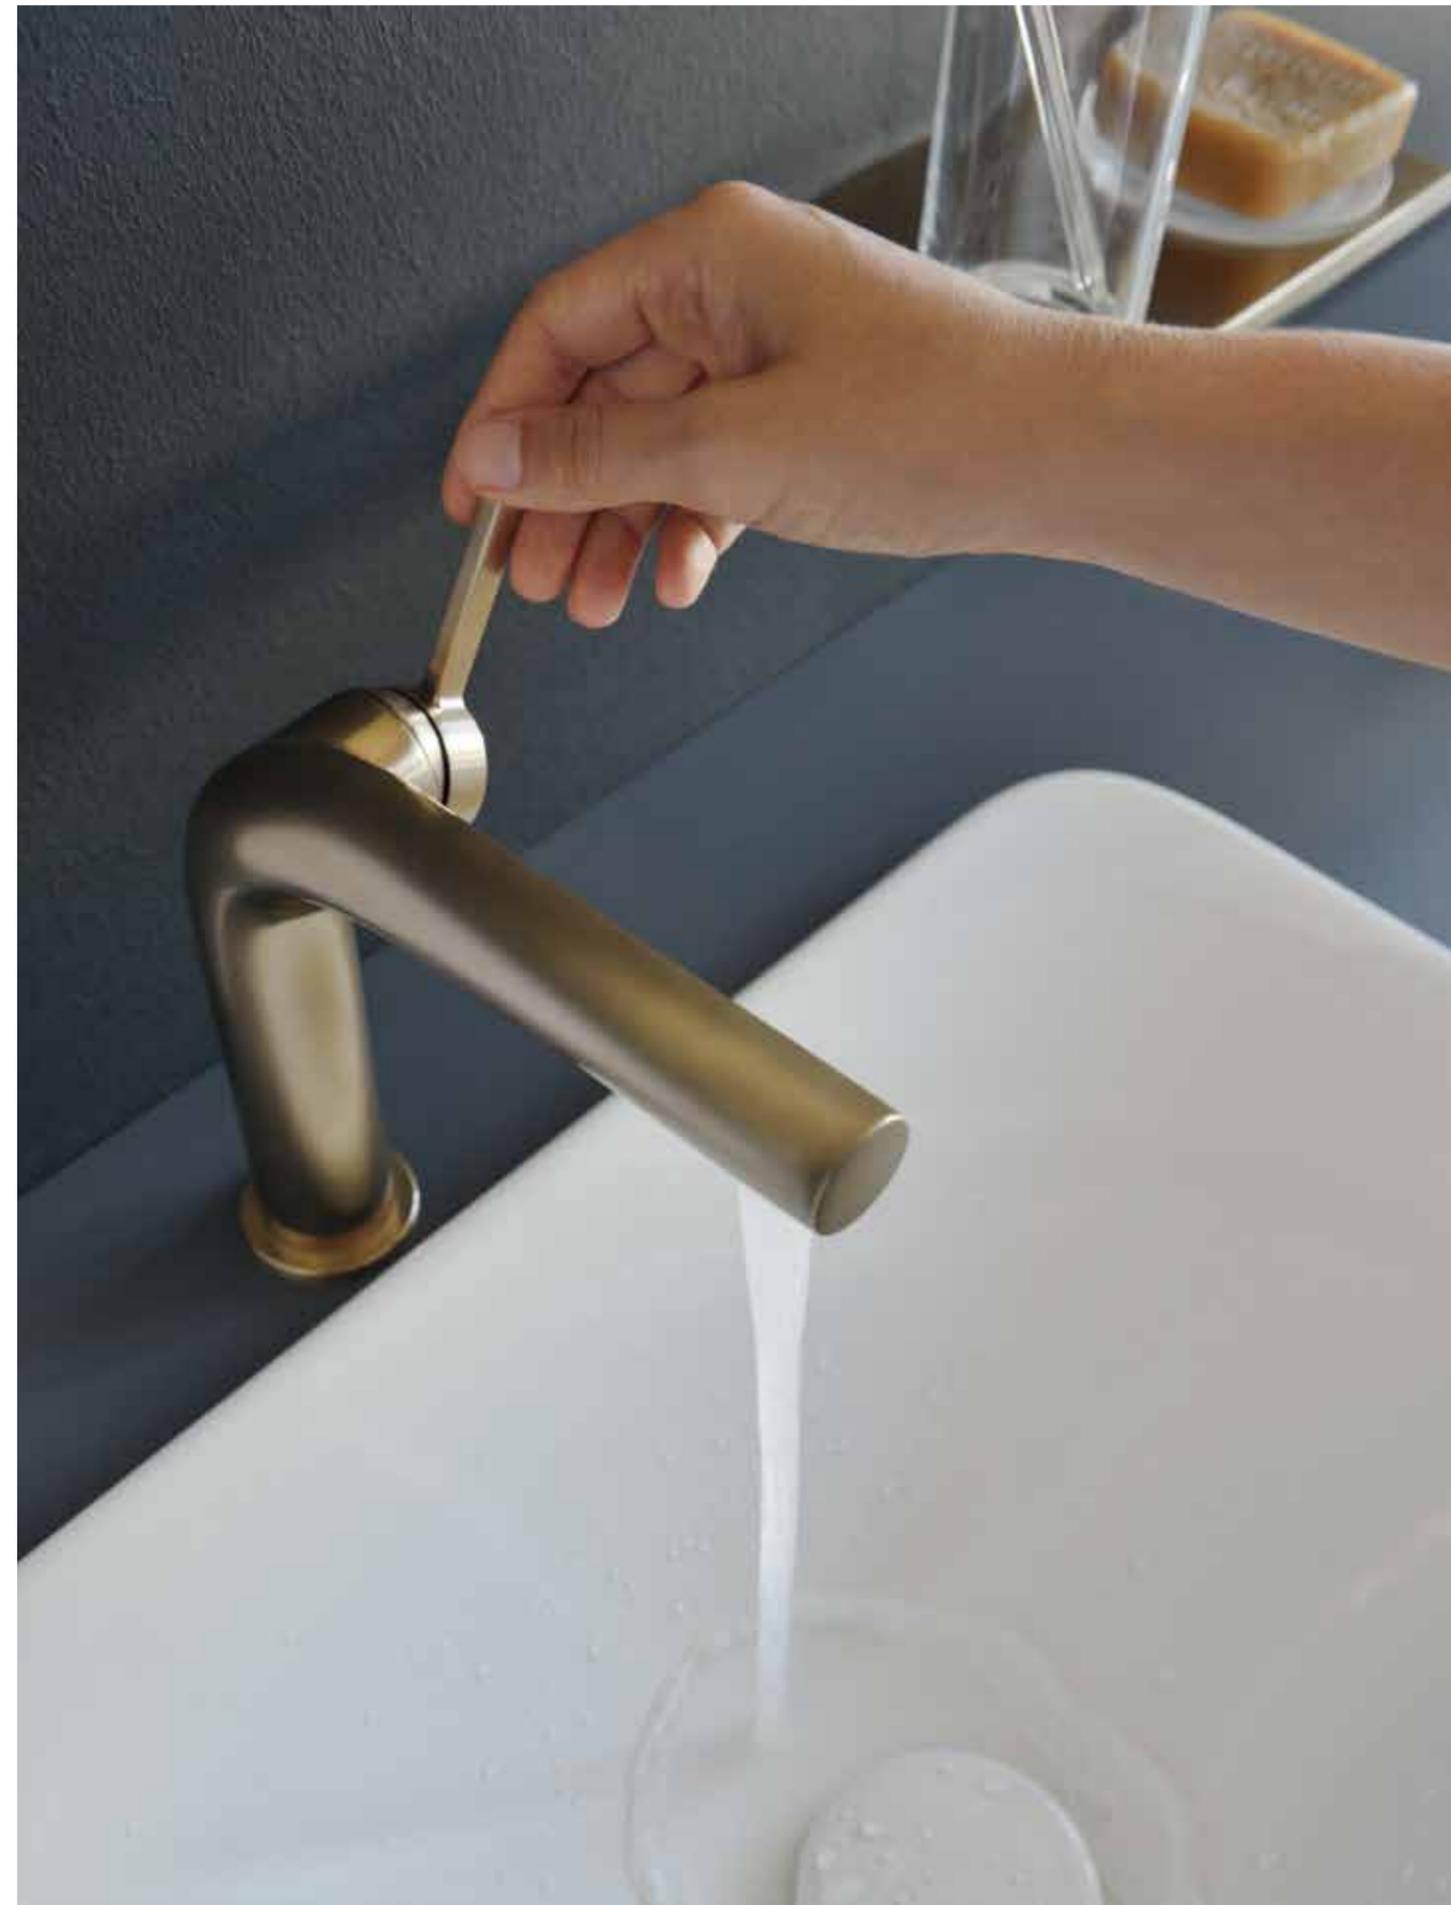

A characteristic of EDITION 400 is its sensuously beautiful style. The faucets of the series present themselves like slender sculptures. Virtually works of art, their extraordinary presence almost makes you forget their actual purpose. Conceived by the design agency Tesseraux+ Partner in Potsdam and rewarded the "Design Plus" seal of quality, they are a prominent stylish element in KEUCO's full range of bathroom furnishings.

What makes EDITION 400 faucets unique, is the perfection in the details. The extravagant metallic surfaces of the faucets are an excellent example of this, where the warm bronze, champagne-colored nickel, and opulent black so wonderfully underscore the exquisite character of EDITION 400.

Exclusively manufactured metal surfaces, prove our highest demands for innovation in design and technology of accessories.

STATUE FOR THE BATHROOM

KEUCO's sculptural EDITION 400 faucets speak a language of accentuation. The shower and bath faucets in different finishes provide the perfect excuse to spend a soothing time relaxing in the bathroom. Once again KEUCO has focused on the essentials here – the free-standing bath tub mixer with separate hand shower and practical glass shelf for bathroom utensils, which can be perfectly combined with a variety of bath tubs.

SHOWER EXPERIENCE FOR THE SENSES

Comfort and sensuality are at the forefront of this very special solution for shower faucets. The multi-functional concealed thermostat meTime_spa unites everything which one needs for an extraordinary shower experience – not only in an elegant but also innovative way.

The thermostatic mixer comes in various sizes and two orientations and incorporates polished chrome control elements to adjust the flow and temperature of the water as well as offers aluminum shelving on one or more levels. So that it integrates into your own personal interior design style in the best possible way, the glass panel is available in white, anthracite, petrol, truffle or cashmere.

meTime_spa

TURN ON AND TIME OUT

meTime_spa has the perfect accessories for your bath ensemble: With a separate hose connection and matching wall-mounted holder or as an integrated solution, the clear look and chrome-plated finish of the hand held rod shower head integrate harmoniously into the overall setting.

LITTLE HELPERS WITH A BIG IMPACT

QUALITY AND DESIGN FOR HIGH PERFORMANCE

High-quality materials, excellent workmanship and perfect surfaces – these are the common denominators of all KEUCO accessories. They allow you to perpetuate and effectively accentuate your own personal style of aesthetics in your home. Thanks to their large variety, KEUCO accessories offer the right solution for every kind of bathroom.

SELECTED SHAPES IN EVERY DETAIL

The KEUCO-typical variety of products offers a rich selection for attractive bathroom furnishing. This diversity of design is also manifested in the extravagant color options of warm bronze, nickel, and opulent black chrome. Alone for hanging up towels, the assortment ranges from the classic double towel holder to a chic one-armed towel holder and the vertical guest towel holder along with towel bin.

The vertical guest towel holder can hold several hand towels. The product range also includes an intelligent towel ring, which has an integrated spacer ensuring that damp towels can dry properly at a sufficiently ventilated distance away from the wall.

The shower basket comes optionally with a conveniently integrated squeegee. It is easy to clean, and offers generous space for soaps, shampoos, and such. With a rounded inner surface and concisely crafted edges, the support rail has an especially pleasant feel to it. Completing the EDITION 11 accessories are a soap holder with removable glass dish and a double tumbler holder, with mouth-blown tumblers made of genuine crystal glass.

All accessories add accents in bathroom design – aside from polished chrome, also available in warm bronze, nickel, and opulent black chrome.

DESIGN WITH STAYING POWER

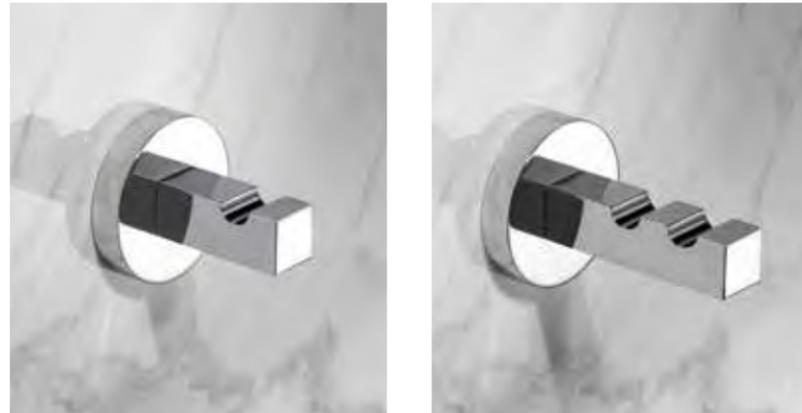

Genuine everyday heroes. Clever functions in an opulent design are guaranteed to bring an exclusive touch to any bathroom making it a luxurious place to spend time.

HOLISTICALLY DESIGNED

Perfection through to the smallest of details is evident in the appearance of the double hook. As with the single hook, the double hook is completely flat at the front and two minimalistic notches allow for the possibility of hanging towels or clothes.

The elegantly shaped shower shelf holds the magnetic squeegee masterfully and unobtrusively.

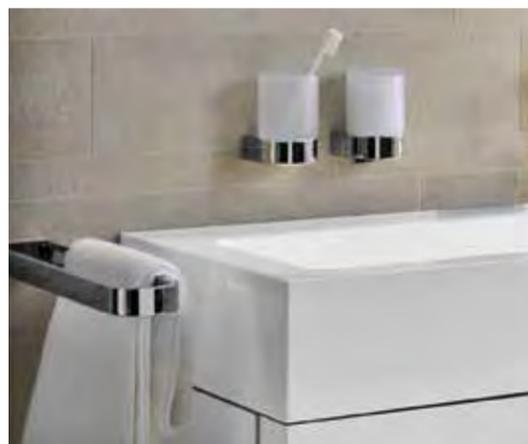

Exceptional design for ordinary everyday items: The toilet brush set presents itself in a bright chrome. Items such as a mobile phone and such can be placed on the shelf space of the toilet paper holder.

CONSISTENT COMBINATION MADE EASY

At KEUCO accessories are much more than just useful additions. It is also important that they can be blended in any combination to form a harmonious visual whole, perfectly coordinated to the characteristic design of the rest of the bathroom furnishings. EDITION 300 does this beautifully.

DELICATE DESIGN ACCESSORIES

An aesthetic of contemporary design, special functional features in the details, and high quality – this is how EDITION 400 accessories set special accents and create a sensuous atmosphere in the bathroom. With their practical functionality and elegantly slender appearance they pamper the user.

Harmoniously coordinated in design are also the lotion dispenser and tumbler holder – two perfectly matching companions. Combined with a utensil shelf, the accessories add functional comfort to the bathroom.

UNLIMITED HOSPITALITY

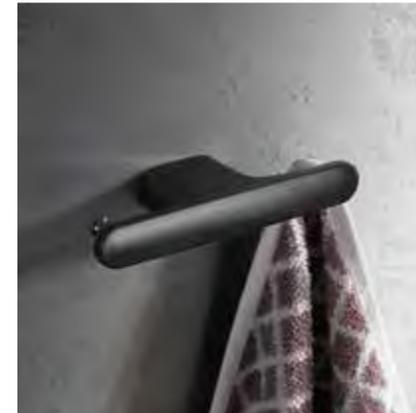

Even though EDITION 400 is at home in the discerning private bathroom, it can be found more and more in the upscale hotels and condominiums. For both areas of use, KEUCO has designed a remarkable towel rack with integrated towel holder. The elegance of the softly rounded forms and the slender rectilinear contours is underscored by a unique combination of materials comprising colored tempered glass and high quality aluminum.

Despite its extreme robustness the 24 inch wide towel rack seems to hover lightly in front of the wall, throwing fascinating shadows. The four glass colors of anthracite, white, cashmere and truffle are perfectly coordinated with the colors of many of KEUCO's furniture pieces. An eye-catcher for lovers of the unique.

The KEUCO-typical variety of products offers a rich selection and extravagant colors for discerning bathroom design: Produced using the PVD method, the accessories delight the eye with their warm bronze, nickel or black chrome finish. For towel storage along the assortment offers everything from towel hooks to towel rings and one or two-armed towel holders. A special feature of the double towel hook is that the towel is hung up from behind – ensuring that the design remains in full view.

EXTRAORDINARILY PRACTICAL

EDITION 400 is an integral bathroom furnishing concept. In a stylish EDITION 400 bathroom with a feel-good ambience, the intelligent functionality of the accessories is icing on the cake. The shower shelf and shelf for corner installation are made of solid, silver anodized aluminum, so they are particularly unsusceptible to wear and tear and very durable. They come with or without squeegee: integrated harmoniously in the design, it prevents shower utensils from falling. With their clear and minimalist design the shelves are perfect for every shower, but they are never in the way, despite the generous shelf space they offer.

DESIGN IN EVERY DETAIL

Also around the toilet area, the EDITION 400 accessories are harmoniously integrated into the architectural environment of the bathroom design. With its particularly delicate design, the toilet paper holder demonstrates that it has the potential to become the next new classic. It is hinged, extremely delicate and can be easily attached to the wall. Even the wall-mounted toilet brush set impresses with its little secrets: On the outside it presents itself in fine, satin glass; inside it has a practical removable holder. The toilet brush hangs hygienically inside and it is concealed behind a lid.

THE DESIGN CLASSIC WITH PROFILE

Initially begun in 1967 purely as line of accessories, COLLECTION ELEGANCE established itself internationally over the decades and became the biggest selling bathroom series in the world. Today, COLLECTION ELEGANCE offers a comprehensive assortment with a wide array of models. The demand for COLLECTION ELEGANCE products still remains steady today due to among other things to its timelessly modern design.

.molldesign
Reiner Moll

HIGHLIGHTS

COLLECTION ELEGANCE accessories bring aesthetics, ergonomics and ease of cleaning under one umbrella. All metal parts are chrome-plated to a high standard of quality. The soap foam dispenser is made of matte opal glass; the lotion dispenser and the toothbrush tumbler are made of matte crystal glass. The matte crystal dish can be removed for cleaning from the soap dish on the right.

COLLECTION MOLL

INSPIRATION AND INNOVATION

The COLLECTION MOLL lets accessories shine in a new light: An inspiring design, highest innovative details and needless to say, the complete KEUCO competency for precise workmanship and durable quality. The unobtrusive, sleek design gives the collection a lightless and timeless beauty that bears the signature of the designer Reiner Moll, and harmonizes with numerous KEUCO washbasin and furniture ranges.

.molldesign
Reiner Moll

IDEAS RIGHT DOWN TO THE LAST DETAIL

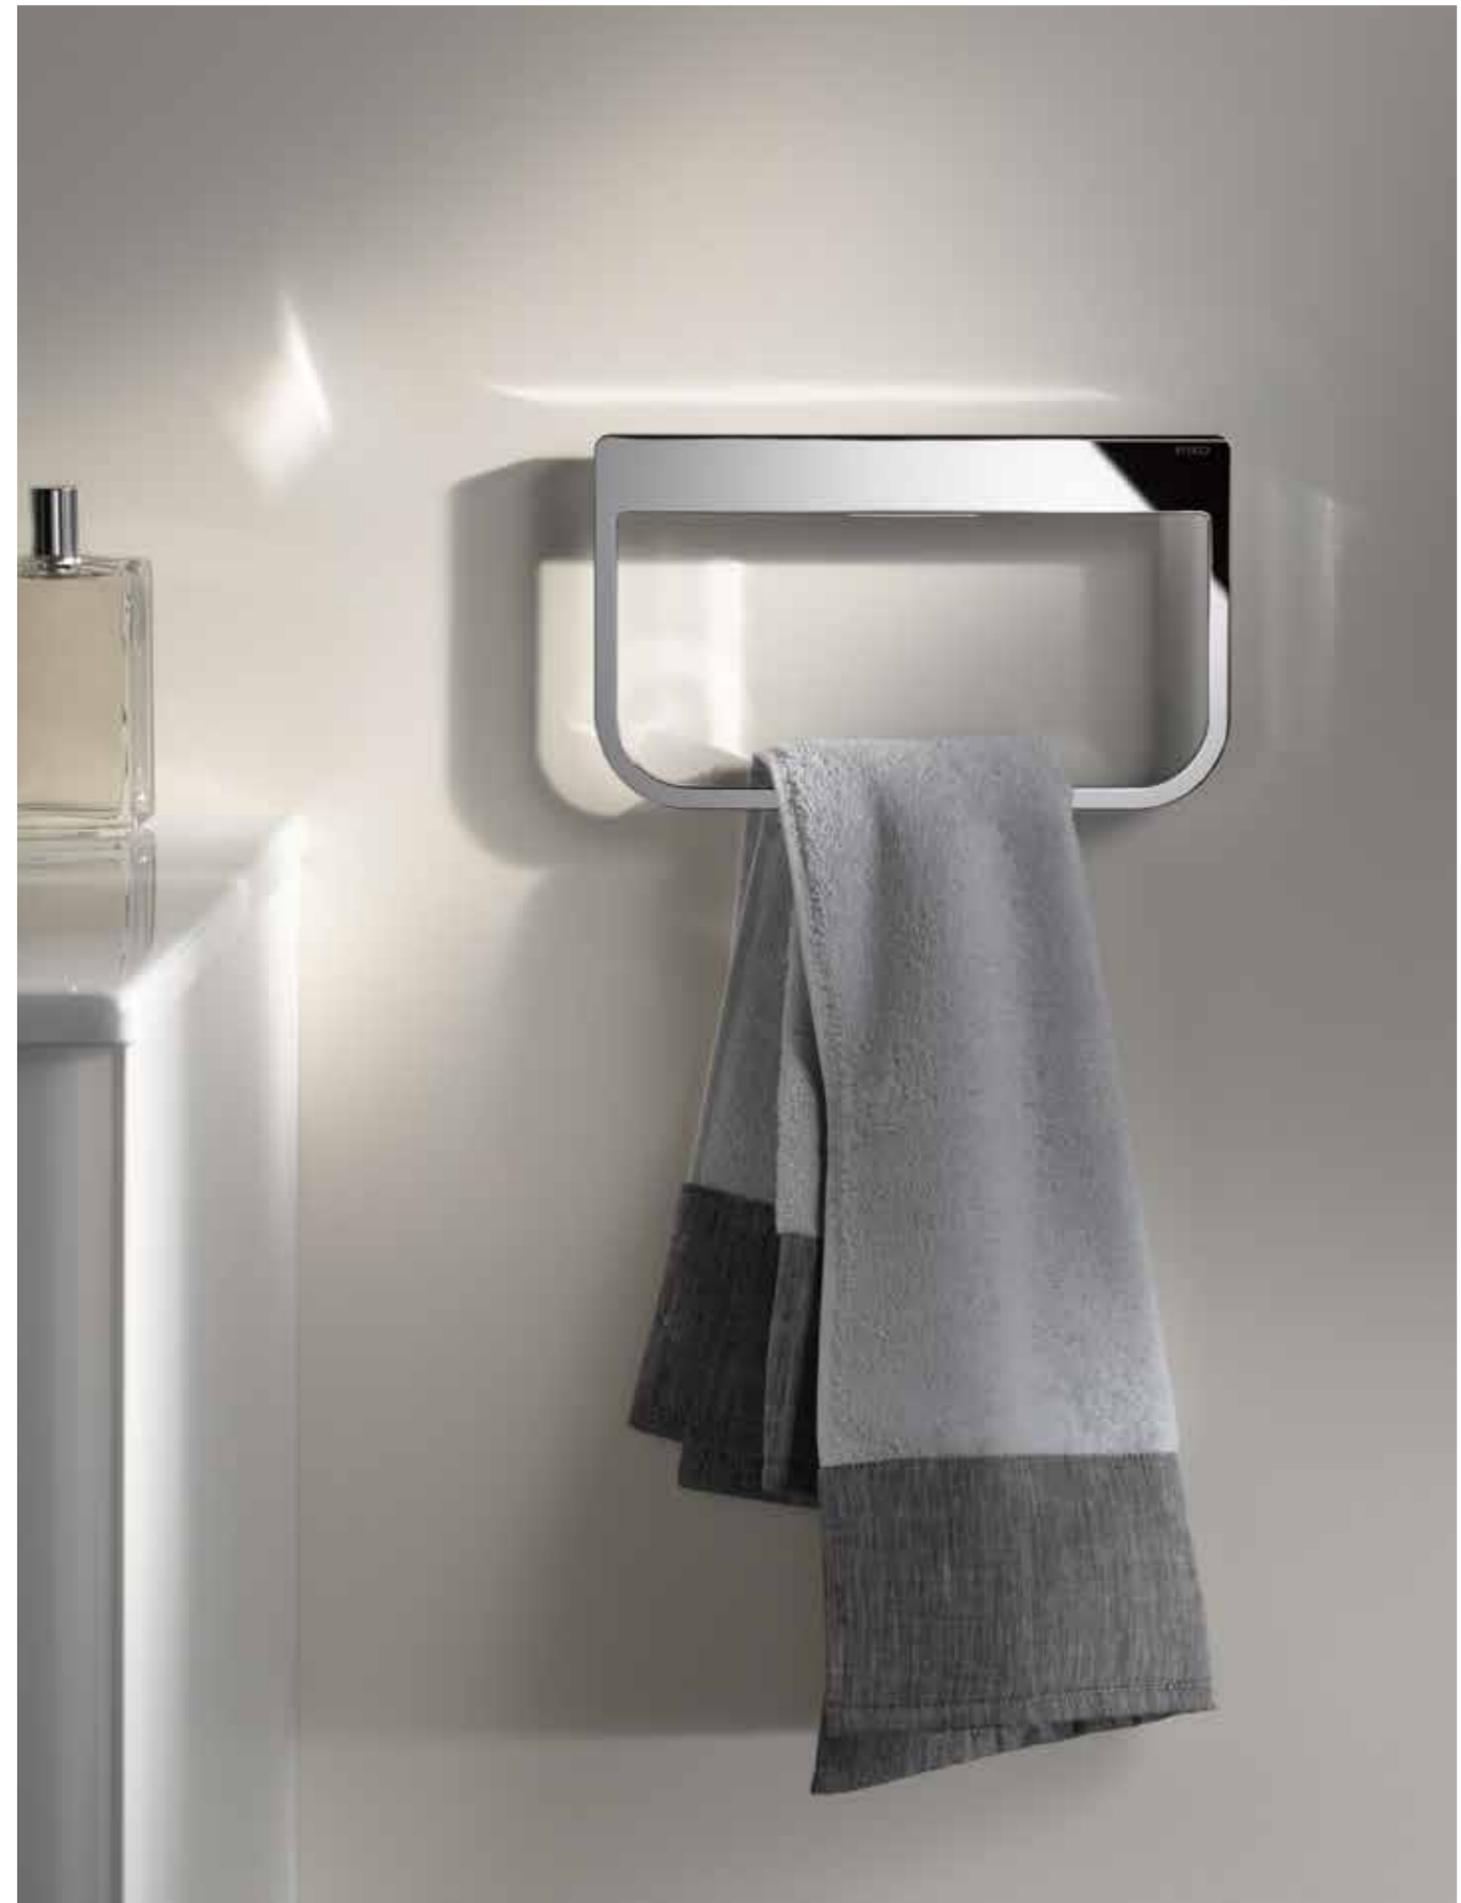

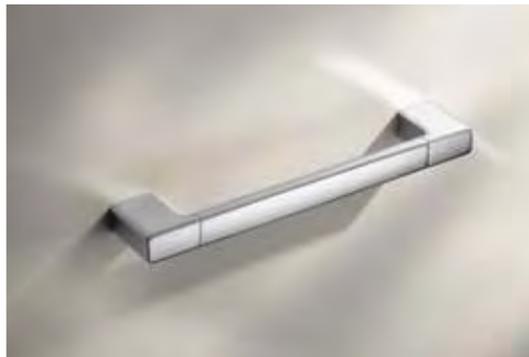

Whether for corners or walls, the shower baskets of COLLECTION MOLL have a removable, break-proof synthetic insert – hygienic and easy to clean.

The sponge basket, with its integrated, retractable squeegee, demonstrates what aesthetically technical innovations could look like. After use, the squeegee disappears into the sponge basket, which is open at the bottom so water can drain away.

From a towel ring and double hook, via a single or double-armed towel holder: The COLLECTION MOLL offers a generous collection for an attractive bathroom design style. The towel ring, for example, is made entirely in one piece and its seamless aesthetic stands out. The ergonomically designed towel rail invites to be touched.

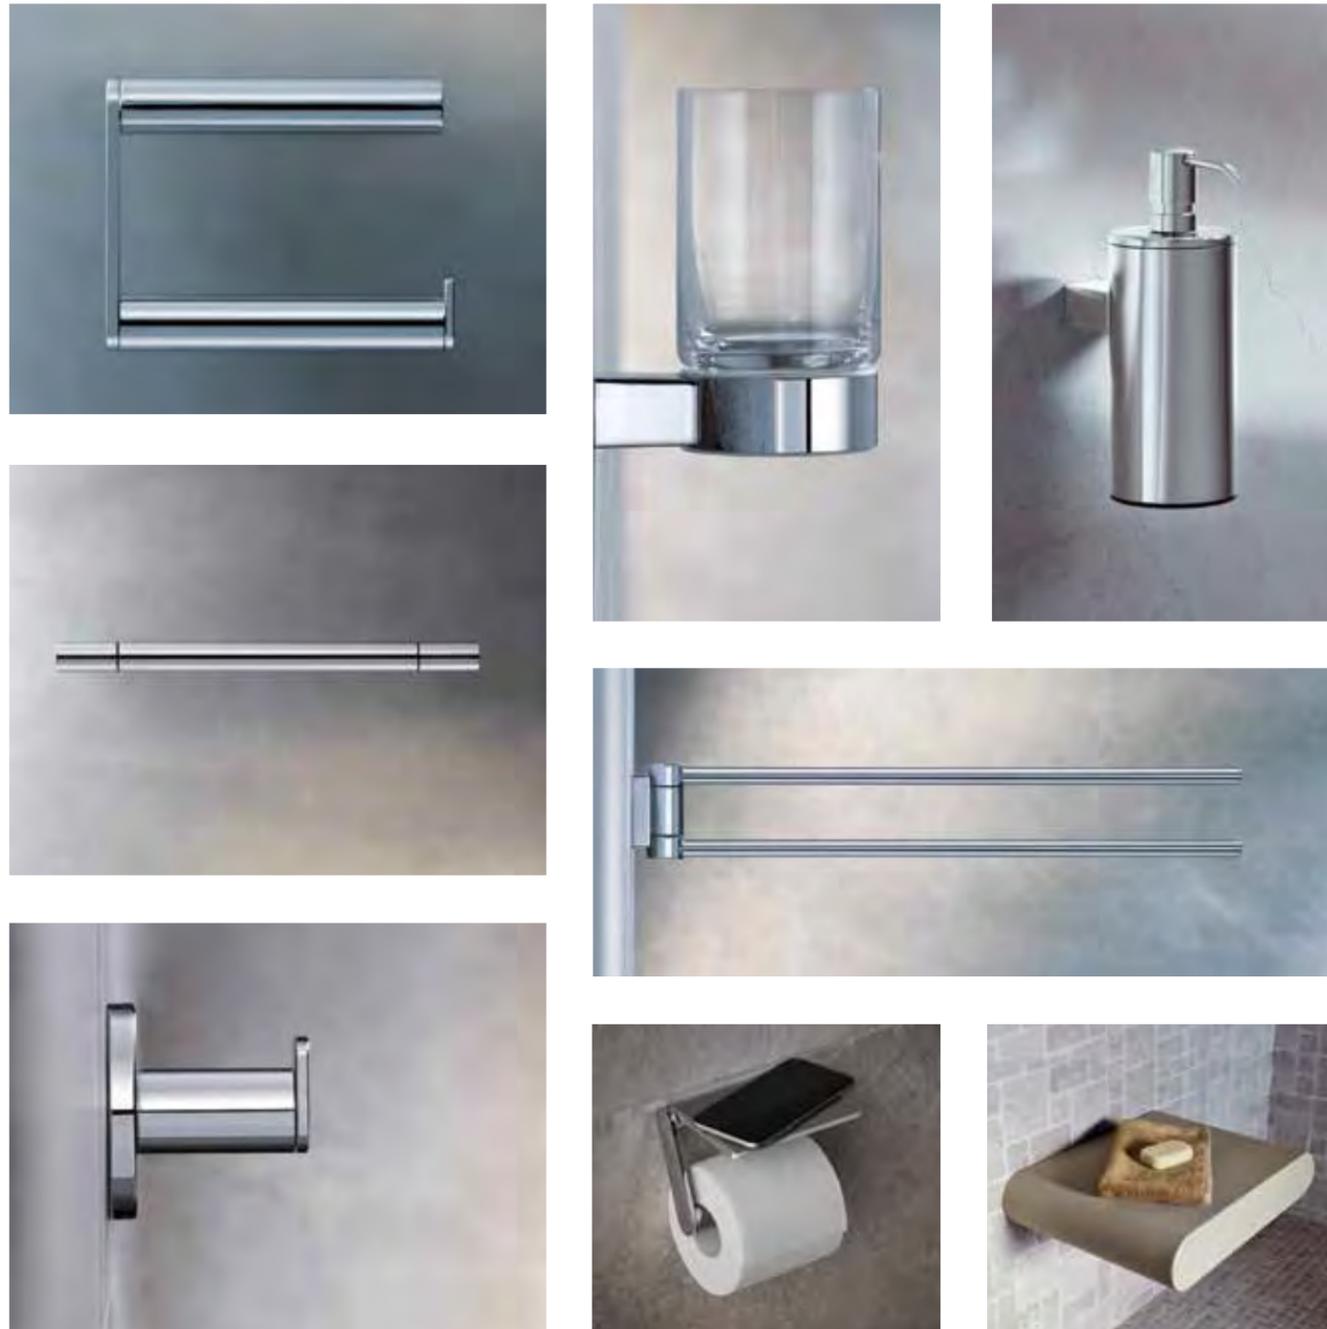

NEW TIMELESSNESS

Maximum functionality and attention to detail are also special features of COLLECTION MOLL products for the toilet – from the toilet paper holder with or without lid, right to the toilet brush set, as a wall or floor model: For example, the toilet brush set, in which the brush hangs in the brush holder and therefore avoids showing directly the brush.

TIMELESSLY MODERN AND INCREDIBLY VERSATILE

With 450 individual products, COLLECTION PLAN is one of the most extensive bathroom collections in the world. COLLECTION PLAN is as varied as the lifestyles of today and the breadth and depth of its large assortment enables individual, tailored solutions to be found. COLLECTION PLAN leaves nothing to be desired – not from an aesthetic or an ergonomic point of view, as the main focus of the COLLECTION PLAN care range offers an additional wide collection of universal design products to choose from.

EYECATCHER IN EVERY BATHROOM

The wide range of surface variants multiplies the diversity of COLLECTION PLAN even more. Choose from chrome-plated, aluminum and stainless steel. Or between lotion dispensers as free-standing model (left) and the mounted model (top), suitable for installation in the washbasin or washtop.

SUPERBLY DESIGNED EVERYDAY HEROES

COLLECTION PLAN accessories are popular worldwide and have proven their worth a million times over – in hotels, public buildings and private bathrooms. By constantly talking with architects, planners and installers, we are still discovering new places where demand exists for aesthetic and useful solutions. The lotion dispenser with its practical single-handed operation and the cup for easy filling are worth showing off at the washbasin. The one-armed towel holder from the extended COLLECTION PLAN product range is available in two sizes: 14 and 18 inches.

FUNCTIONALITY IN THE DETAILS

How much design and functionality can be incorporated in accessories? More than meets the eye – at least with the new COLLECTION PLAN shower shelf. Because, a squeegee is integrated almost invisibly in the design. Available in brilliant chrome, matte aluminum and high quality stainless steel like all new COLLECTION PLAN accessories, the shower shelf optionally also comes without the squeegee.

The perfect counterpart to this is the robust 135-degree-angled rail. The integrated soap holder can be taken out for cleaning, and the grip is available as either right or left-sided version. The shower shelf, glass wiper and soap dish are available in the colors dark gray, light gray or white.

The luxurious towel rack made of safety glass offers sufficient space for the shower towels of hotel guests.

EVERYTHING CONSIDERED

COLLECTION PLAN accessories are at home all over the world, offering an extra amount of intelligent functionality anywhere they are found. The new 1.3 gallon COLLECTION PLAN cosmetic waste bin finally solves the problem of that unsightly bit of bin liner that is always visible. Because, cleverly and elegantly, an exterior jacket in chrome, stainless steel, aluminum or white is slipped over the inner bin and liner. So, from the outside the bin liner is not visible.

Specially developed for commercial use, the double toilet paper holder with roll brake integrates itself seamlessly into COLLECTION PLAN tradition. And anyone who values comfort will appreciate the box for moist tissues with sealing ring, allowing it to be closed airtight.

AMENITY, OPEN TO THE PUBLIC

PLAN INTEGRAL recessed installation modules for the washbasin and toilet are perfect for highly frequented public sanitary areas. Not only do they convince with advantages such as easy cleaning, sturdiness and easy refilling, but also through their elegant and unobtrusive design.

On the left a toilet module with sanitary bag dispenser and sanitary waste bin. Beside that two washbasin modules – tissue box dispenser and paper towel dispenser along with waste bin. In total there are five different modules available, which can be flexibly combined according to need and that fit in 6 inch or deeper walls. Available in aluminum/polished chrome or white/polished chrome.

Polished Chrome/Aluminum lacquered

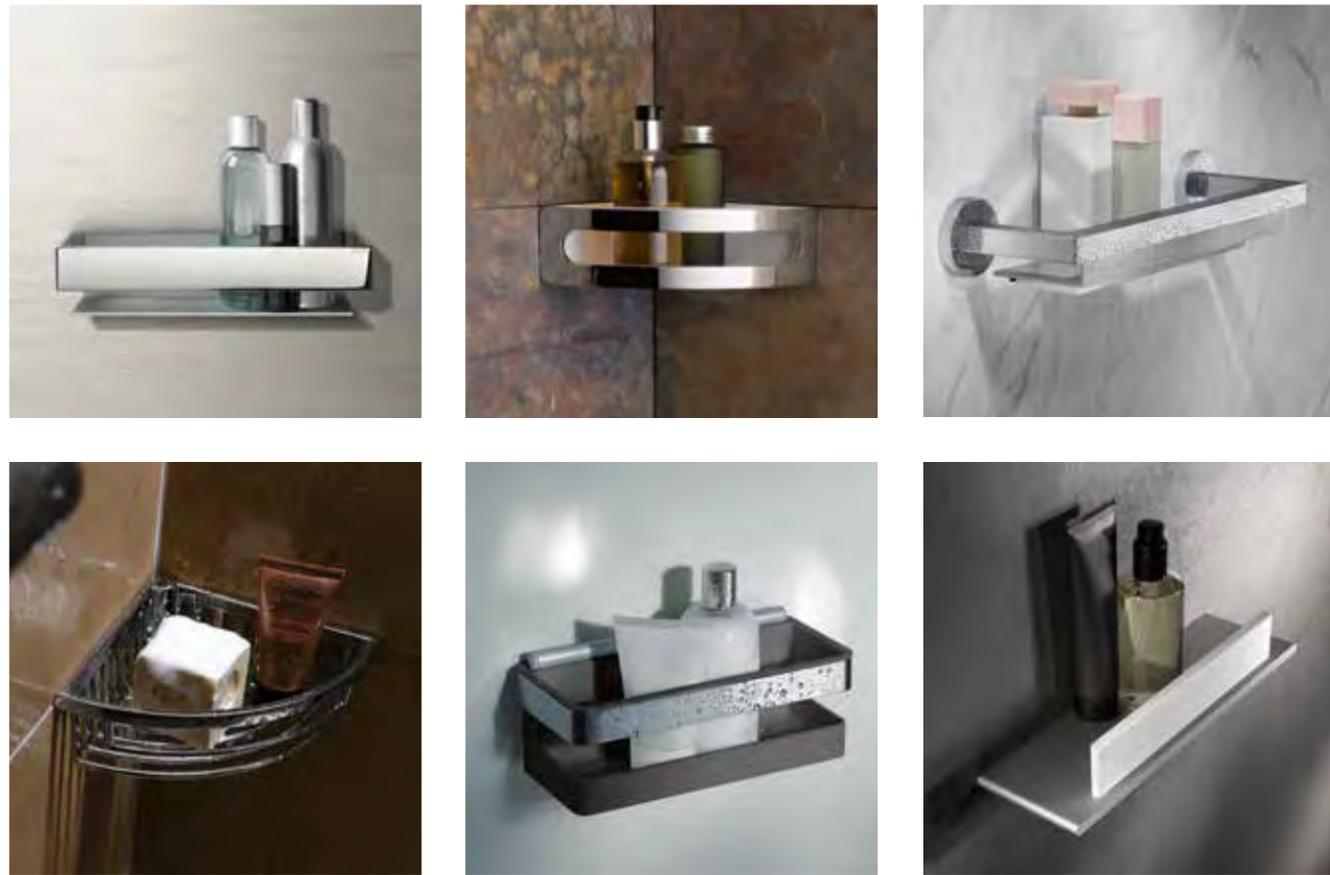

Polished Chrome/White lacquered

STYLISH AND TIDY

Nowadays there is a need for more space for care products in the shower. Shower shelves in different sizes, up to 39 inches offer more options. The new KEUCO shower shelves appear in an attractive design together with added functionality. While offering a lot of space, in their popular white or gray-black, powder-coated aluminum finish, they also add stylish design to the shower. In addition to two wall-mounted models there is a shower shelf that can be hung on the glass of the shower cubicle for added practical and visual appeal. Another convenient feature is the quick and easy removal and lift out for cleaning. The modern, rectilinear design matches virtually any style of furnishings, so KEUCO shower shelves are suitable for universal use and removable for cleaning. Available in standard or custom sizes.

Durable, easy-to-clean – and simply beautiful. The huge variety of KEUCO accessory designs carries on with the shower baskets. The different shapes, surfaces, dimensions and versions for corner or wall mounting offer the right solution for every bathroom – including practical details such as an integrated glass squeegee (right bottom), which can be easily taken out from the front.

SHOWER BASKETS

Sometimes simply functional, sometimes full of useful surprises as can be seen on the right with an integrated squeegee: KEUCO shower baskets enchant with their wealth of options.

UNIVERSAL DESIGN

HIGH QUALITY, CONVENIENT, BEAUTIFUL AND SAFE

The PLAN CARE products on this page can be flexibly combined for universal design solutions. The PLAN railing system enables, among other things, a shower to be made barrier-free in a jiffy, if need be, thanks to the attachable tip-up seat. The firmly mounted soft seat, 18 inches wide – also available in 14 inch width – meets the requirements of DIN 18040-1 and is ADA compliant.

A stable grab bar in the bathroom can provide significant safety and ease-of-use, while still looking stylish. The wall-mounted horizontal and vertical bars as well as the foldable support bar in the PLAN CARE series feature uncompromised functionality combined with a uniquely beautiful aesthetic quality.

The PLAN CARE grab bars are available as special production items in a peened finish for larger project quantities.

Support rails are also in demand in and around the toilet area. Fixed or removable foldable bars, featuring intelligent details such as an integrated paper holder and a soft suspension mechanism for easy lowering and raising, help make life easier and more comfortable for the user.

The toilet brush set with extended handle features a brush head that is fabricated from high-grade, easy-to-clean white plastic.

LIGHT AND MIRRORS

BEAUTY HAS TWO ALLIES: LIGHT AND MIRROR

CREATE THE PERFECT SETTING FOR YOU AND YOUR BATHROOM

As a practical tool for daily beauty care, the glare-free iLook_move cosmetic mirror shines with its slender, refined design in round or square form, with illuminated or unilluminated mirror surface. The hinge technology works brilliantly too: The height, distance, inclination and lateral angle can each be adjusted with a simple action. In the illuminated model with control panel on the glass surface, this innovative mirror with **5X** magnification designed by Tesseraux+Partner offers two different light modes: A daylight function, like the ones that can be found in professional beauty institutes, and a second luminous color in flattering warm white – ideal for the perfect evening makeup, for example. Unique to date is the 5-step variable adjustment feature between both luminous colors.

Whether unlit, with a single light color, or with a 5-step variable light capability with the control panel on the glass surface with sensor system, the iLook_move is simultaneously high tech for beauty care and an aesthetically pleasing, perfect masterpiece. The LED lamp is long-lasting and has minimal power consumption. If direct wiring is not an option, a version is also available with a plug.

Now that's an eye-catcher: Cosmetic mirrors with many kinds of adjustment options, including various light modes according to your individual preference. After all, not only should your bathroom look good, but you should too.

A cosmetic mirror is at the top of the list of priorities when it comes to daily accessories for beauty care – no matter whether it is for use at home or in the hotel. Our iLook_move with rocker switch offers convenience and ease of use. This model offers 1 light color, 6500 Kelvin, and can be switched on and off directly on the cosmetic mirror. When it comes to mounting, the cosmetic mirror offers a further advantage – power adaptor and rocker switch are integrated and therefore a standard mains connection is all that is needed. If desired, the lighting can also be controlled via the room light switch.

Different surface types complement the range: in addition to a shiny chrome finish, all models are also available in a brushed bronze, nickel or black chrome finish, we also offer this in aluminum and stainless steel.

LIGHT MIRRORS

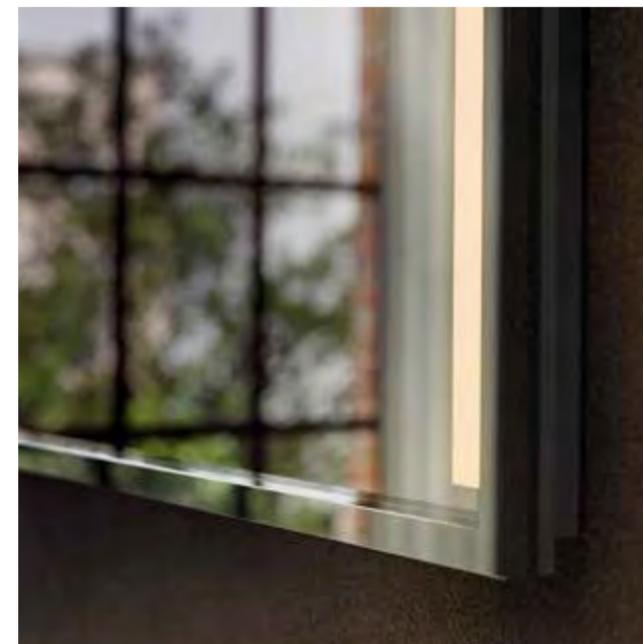

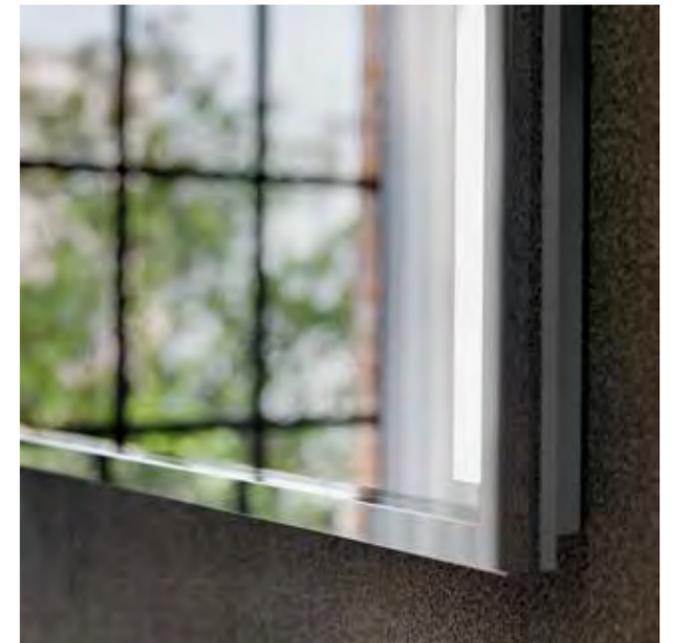

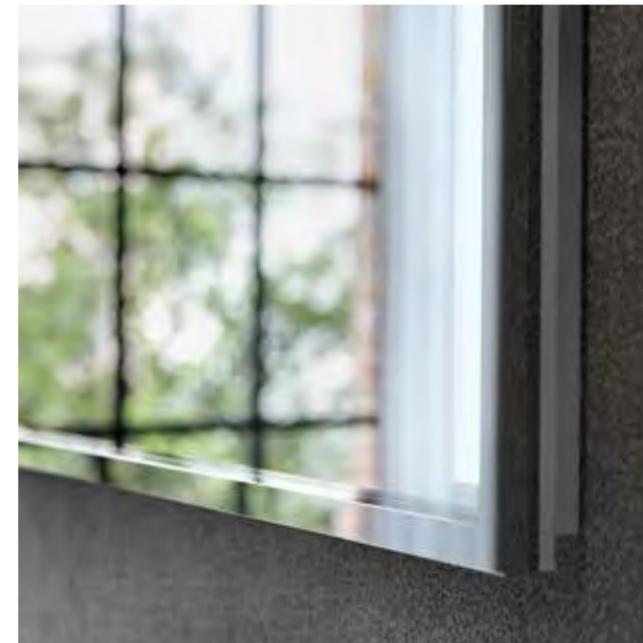

LIGHT AS REQUIRED

HIGHLIGHT IN THE BATHROOM

KEUCO light competence is manifested in the EDITION 90 light mirrors: Double-sided LED sources guarantee a glare-free and shadow-free illumination of the face. The significance is underlined by the circumferential chrome frame. The EDITION 90 light mirror offers variable light color between 2700 K and 6500 K, is infinitely dimmable, and has an optional defogger for wet spaces. Additionally, the main (side) lighting and down lighting are independently operable, and can be switched on and off separately.

PURE DESIGN – THE LATEST TECHNOLOGY

The innovative illuminated mirrors are a special highlight. The EDITION 400 illuminated mirror presents itself with remarkably elegant slenderness and a surrounding aluminum edge. Customized dimensions are available on request. Its secret: A special light-conducting material conducts the light of the LED to the surface and provides the ideal lighting for the room or face at all times. With unobtrusive and intelligent sensor controls the light can be dimmed and the light color altered in an infinite number of steps: From bright-white daylight for ideal, day-to-day beauty care, right to a warm white light, ideal for perfect evening make-up or an atmospheric bathing ambience. Moreover in every light situation the LED lighting is glare-free and long lasting, and it also saves energy and is maintenance free.

But the EDITION 400 light mirror can do much more: It is optionally available with defogger, which is a practical feature that prevents the mirror from misting up after taking a shower. Of the highest technical standard, the sensor-controlled defogger switches off again automatically 20 minutes after being switched on.

PICTURE PERFECT

Like all KEUCO products, the PLAN crystal and light mirrors feature both aesthetic as well as practical components. Combined with the linear furniture, they form a harmonious whole. The surrounding frames emphasize the perfectly-coordinated colors to great effect. Although it must be said that the lacquer finish of the premium aluminum frame is still very durable and easy to care for.

Innovative LED lights are integrated in the upper edge of the PLAN mirror frame, as well as an up-light casting toward the ceiling to create an interesting effect on the wall directly above the mirror, and a down-light, illuminating the faucet and washbasin. Thanks to the careful sorting of the individual LED modules, the effect of the light is very harmonious, ensuring perfect illumination of the face. The control unit is integrated in the slender frame and offers very intuitive operation. The light color can be varied, and the washbasin and main lighting can be switched on or off and dimmed separately. The next time it is switched on again the intelligent electronics remember the most recent lighting scenario. A practical defogging feature is available as a further option.

BLACK CONCEPT

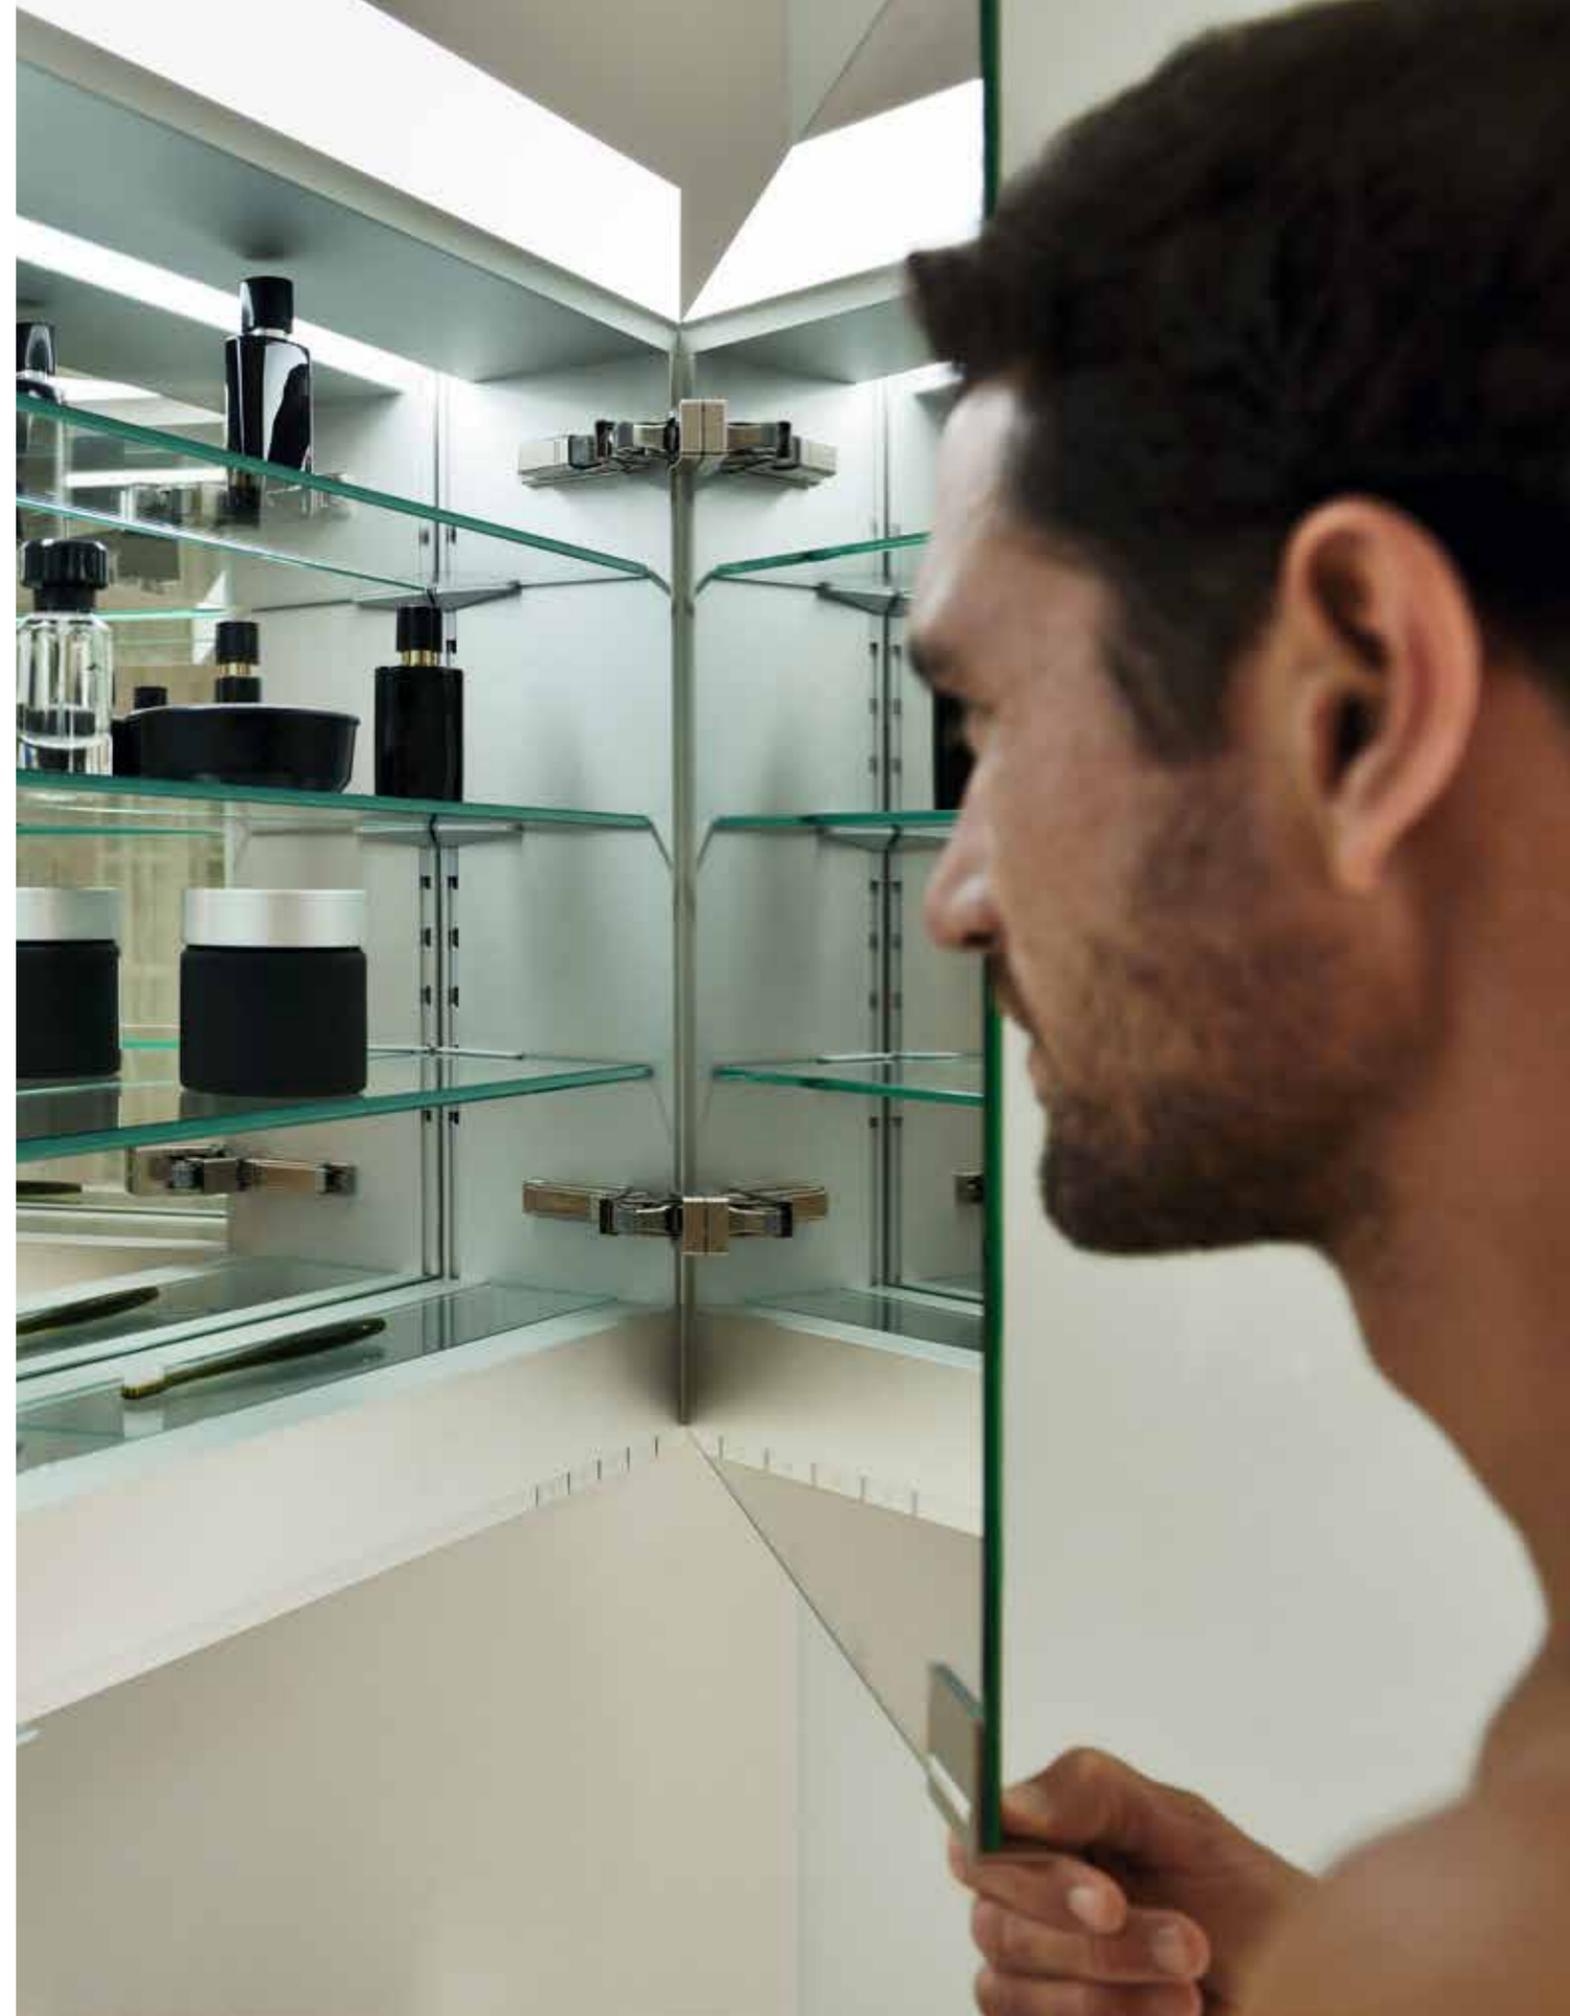

The ROYAL LUMOS light mirror with a black anodized frame is a shining highlight. Two LED illuminating sources – main illumination and washbasin illumination – can be dimmed intuitively via the control panel which at the same time offers the possibility to set the light color variably. The beveled light shades cast light inward and directly onto the face, making it the most task-oriented light option available. A practical defogger is an optional extra. The iLook_move cosmetic mirror with its brushed black PVD surface is the finishing touch to the dark accentuated bathroom design. The synchronized design and consistent matte black finishes with a metallic look guarantee a luxurious KEUCO bathroom design where sophisticated interior design is concerned.

MIRROR CABINETS

LED LIGHTING CONCEPTS

BEAUTIFUL OUTSIDE, SMART INSIDE

Our passion for mirror cabinets has many causes. One of them is the fact they are veritable space savers. They create room for a large quantity of bathroom accessories, without wasting precious space in the bathroom. This is where KEUCO has always had an eye for optimum convenience at and around the washbasin. Various height and width formats, various methods of opening – upwards or with one or several doors – vertical or horizontal lighting, mirrors inside and out, flexible interior features with numerous glass or aluminum shelves, and optionally with drawers and the ability to mount the mirror cabinet on or in the wall. With so many different possibilities, we can contribute to fulfilling every wish.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

KEUCO's EDITION 300 mirror cabinet incorporates an upward-lifting door, eliminating any seams, and allowing the user to keep the integrated horizontal light strips visible when working inside the cabinet. The lighting is covered with glare-free light shades to create the perfect light at the washbasin. Inside, the freely-positionable glass shelves also provide space for tall bathroom utensils. The interior mirror can be slid freely side-to-side in front of the shelves, so it can always be positioned where it is needed.

STORAGE SPACE MEETS LIGHT TECHNOLOGY

The EDITION 400 mirror cabinet is impressive, with its timeless beauty and technical functionality. Its intelligent sensor control, light intensity and light color are continuously variable – from warm white light at 2700 Kelvin to bright white daylight at 6500 Kelvin. This is how the person looking into the mirror is reflected in the best light according to the time of day and individual preference.

An optional mirror defogger is incorporated in the slim doors. This practical extra will prevent misting of the mirror cabinet after showering. Extra clever: The sensor-controlled defogger switches off again automatically 20 minutes after switching on.

Available in three sizes ranging from 27.5 to 55 inches, EDITION 400 mirror cabinets offer individual design possibilities for different bathrooms, both large and small. With the different types of surface and recessed mounting possibilities, KEUCO cabinets cater for a generous amount of planning freedom for modern bathroom architecture.

Features such as the interior lighting, illuminating everything from the back forward, as well as the extra storage compartment and the integrated sockets make the mirror cabinet a sensible and sensuous component of your bathroom.

INTELLIGENT EVEN BEHIND THE SCENES

A clear case of aesthetics: The recessed mirror cabinet is done in a clever way and blends with the room. At a first glance, the delicate silhouette does not reveal the secret of the generous depth of its interior.

Both light intensity and light temperature from daylight to warming light can be controlled in an easy-going and continuous manner, so that you will happily spend a little more time in front of this mirror.

ELEGANCE FROM ALL SIDES

KEUCO's expertise in light and storage space is incorporated in every KEUCO mirror cabinet. With its sleek design the ROYAL 15 prominently features overhead LED lights incorporate a crystal shade for perfect light dispersion in an unobtrusive chrome plated frame. The LEDs provide frontal room lighting and indirect wall lighting. During the night the additional LED washbasin lighting serves as a night light. Together they offer ample light to illuminate the entire room. All three lighting scenarios can be seamlessly controlled with the intuitive rotary dimmer, which always remembers the most recent setting.

This mirror cabinet offers impressive interior features: variable configurable storage space, fully mirrored revolving doors with soft-close hinges, and two power sockets inside. At a width of 19.5 inches, the ROYAL 15 has one door; at 25.5 to 39 inches two doors, and at 47 inches it has three. As such it is perfectly at home when installed above double washbasins and also combined with different styles.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

The ROYAL K1 mirror cabinet for a recessed or surface mounted installation takes up hardly more space than a mirror as the storage is neatly hidden in the wall. Visually, the collection follows the elegant design and intelligent lighting system of all KEUCO mirror cabinets. As for the quality of the interior the collection features dust seal, adjustable shelves, socket and an integrated light box providing ample illumination. The ROYAL K1 is available in two heights (27 and 39 inches), three widths (15, 19 and 23 inches) and two depths (4 and 6 inches), also without lighting and a full-size mirrored door instead.

LIGHT, JUST AS YOU NEED IT

Naturally, it isn't possible to re-invent light. But it is possible to optimize it aesthetically and practically for new applications. And that is exactly what we have done with the innovative ROYAL L1 mirror cabinet series. Come and enjoy a bathroom mirror cabinet with us, with three modern LED light sources and a completely new kind of intelligent rotary dimmer. It will allow you to create the perfect atmosphere of light in the bathroom for every occasion.

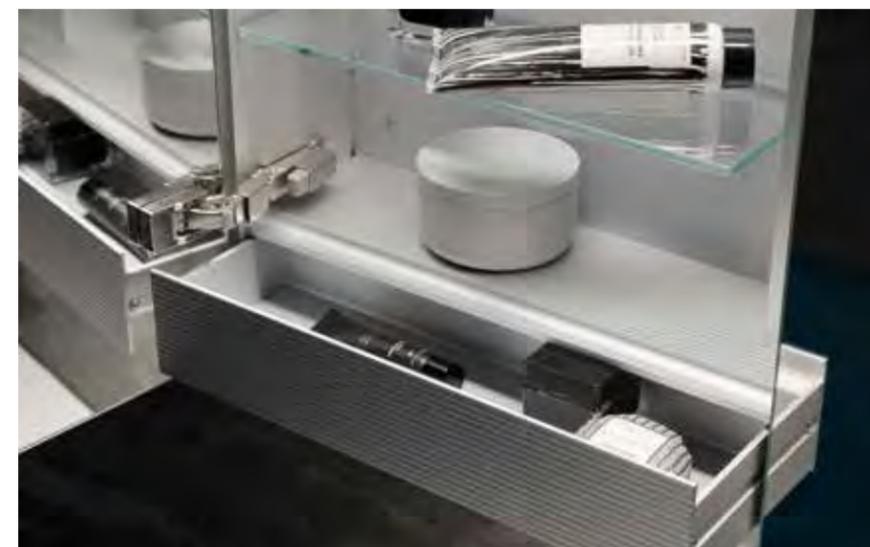

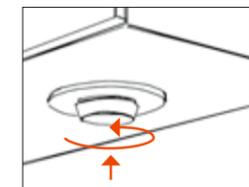

The generous yet elegant overhead LED light is literally the highlight of the ROYAL L1 mirror cabinet. It is enthroned above the fully-mirrored cabinet body and radiates a warm white light of 3000 Kelvin. The washbasin lighting, concealed on the underside of the body, lets the faucet sparkle in the perfect light. And the integrated wall lighting surrounds the mirror cabinet with an extraordinary aura. All three light sources impress with an extremely high level of brightness and color fidelity.

Not only does the ROYAL L1 mirror cabinet capture glances, but it also knows how to direct them perfectly. One reason for this is the three light modes, which can be adjusted to any setting with the help of the intelligent rotary dimmer. Another reason is the many proven details in the fitments, which allow you to make optimum use of the storage space. The glass shelves can be adjusted individually to different heights. Optional anodized aluminum interior drawers are also available.

The ROYAL L1 comes with 1, 2 or 3 doors mirrored on both sides, ranging in size from 19.5 to 51 inches, therefore being compatible with virtually every standard washbasin format. Starting at a length of 47 inches the washbasin lighting is designed for double washbasins with two faucets – to highlight polished surfaces and uniquely designed forms in a particularly prominent way.

The rotary dimmer can always be found to the right on the underside of the cabinet body. Its intuitive operation allows adjustment of the light mode and intensity by pressing and rotating. Both settings are saved when it is switched off and automatically activated again the next time it is switched on.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

Mode 1: Wall and front lighting

The “working light” is ideal for routine walks to the bathroom. The overhead light illuminates the front; subtle wall lighting can be found at the back.

Mode 2: Only washbasin lighting

The warm and glare-free “orientation light” is perfectly suited to the walk to the bathroom in the night or for a relaxing time in the bath tub, because only the washbasin and the faucet are illuminated.

Mode 3: All three light sources

Since wall, washbasin and front lighting are all activated in this mode, everything is in a perfect light. The washbasin, the person standing in front of it, and even the wall behind.

ONLY ONE LIGHT MATTERS: THE RIGHT ONE

Is this still considered a mirror or is it actually a piece of art? In the case of the ROYAL LUMOS mirror cabinet, that is the question that comes to mind. With its illuminated frame on three sides it appears to slightly hover. The open shelf compartment makes it ideal for daily use and offers a perfect place to display all your favorite items in a prominent position.

The ROYAL LUMOS, developed by the blisse-zetsche design agency in Munich, has three separate LED light sources: The translucent frame serves as the main source of lighting, which establishes the right light for the room and the face. The washbasin lighting radiating downwards adds accents of atmospheric lighting on the faucet and washbasin. The indirect lighting makes the shelf compartment a functional and aesthetic highlight with its mirrored back.

The color and intensity of the high performance LEDs behind the surrounding translucent frame can be adjusted to an infinite number of levels: From a daylight white light of 6500 Kelvin, ideal for daily care, to a warm white light of 2700 Kelvin, for a perfect evening makeup or an atmospheric bathing ambience. The intuitive sensor control panel allows individual control of the various light functions. And yet again KEUCO sets the standard with this specially developed lighting concept. The innovation doesn't stop there. The unique design of the light shades cast the light inward on 3 sides, flooding the face with light no matter how near or far one is from the mirror cabinet.

SIMPLY AMAZING

Even the interior of the ROYAL LUMOS mirror cabinet sparkles with design and reflects quality made in Germany. Prominently featured in the design is the integrated shelf compartment, giving priority to the practical. Even with the mirror doors closed, it still allows easy access to frequently used utensils. A premium inlay offers a scratch-free shelf surface for watches or jewellery.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

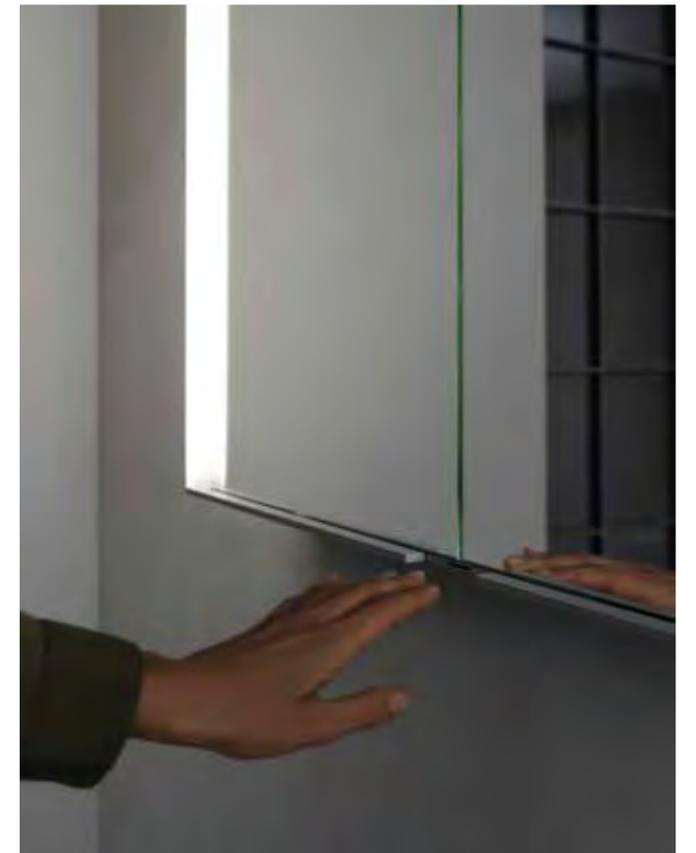

The ROYAL LUMOS is outstanding. It can be installed as a classic surface mounted mirror cabinet or as a semi-recessed model.

The interior features of both are of the highest quality: Rear and side walls as well as revolving doors have mirrored inner surfaces and the height of the glass shelves can be adjusted. The soft-close hinges mean that the doors shut lightly and softly. Available in six sizes ranging from 25.5 to 55 inches, it opens up individual design possibilities for different bathrooms, both large and small. Depending on the width it is fitted with up to three mirror doors and is perfect for both single or double washbasins.

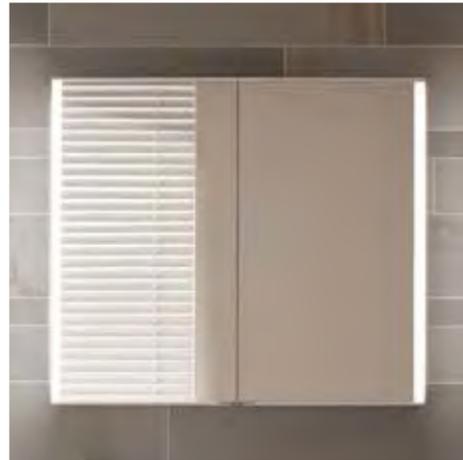

HIGHLIGHT AND MIRACLE OF ORGANIZATION

The intelligent lighting concept, individually organizable storage space, and attractive design make ROYAL MATCH the universal mirror cabinet suited for every bathroom.

The classy design is accentuated by high quality aluminum edges. With its modern and rectangular design, which harmonizes with virtually any style, the ROYAL MATCH mirror cabinet – ranging in size from 25.5 to 51 inches – is a visual highlight in any bathroom. The special thing about the lateral LED illumination is that it can be dimmed continuously with the electronic sensor switch, and as an indirect source of light, ROYAL MATCH always creates a pleasant atmosphere in the bathroom.

Also the interior of the ROYAL MATCH mirror cabinet speaks for itself: Here, you can experience the comfort which is typical of KEUCO products. An elegant glass rear wall, internal lighting and the thought-over position of the power sockets are the proof. The central divider of the glass shelves allows one to adjust the heights of the glass shelves differently for the left and right sides, so one can organize things individually. The revolving mirror doors on both sides also offer a generous panorama-like view.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

ARCHITECTURAL ADAPTABILITY

The ROYAL MODULAR 2.0 mirror cabinet can be adapted to fit nearly every bathroom. With available widths every 3", ranging from 20" W - 63" W, 2 heights, 2 depths, and various door configurations, the mirror cabinet offers a wealth of options. Available with electrical outlets, USB ports, and a variety of optional accessories, the cabinet offers unrivaled technological innovation.

INTRIGUING INTERIOR FEATURES

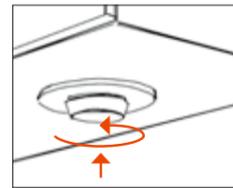

Minimalistic design meets a multi-faceted interior. The outside fascinates with the brilliant color and intensity of the infinitely dimmable light of the mirror. High-performance LEDs guarantee a shadow-free, glare-free and bright illumination of the face and stage the washbasin at the same time. The light control of the mirror cabinet is enabled by the hidden operating panel inside the cabinet.

The interior of the ROYAL MODULAR 2.0 will surprise you with its high-contrast and luxurious design, featuring smoked black glass shelves which can be arranged to suit your preferences, and a rear wall of white glass. Pivoting doors with mirrors on both sides offer a generous view. The exclusive "soft-close" technology ensures that they close very gently, and can also be adapted on the black hinges to close slower or faster according to your liking. One very practical feature is the cosmetic mirror, which can be flexibly attached to the glass shelves and doors or can also be placed on a countertop. A magnetic strip helps organize small beauty accessories. Further special features are the power socket options and the double USB connections, which are concealed by aluminum covers.

EVOLUTION OF LIGHT

The credo, "set to become a classic", is relevant for the ROYAL REFLEX.2 mirror cabinets because in each case uncompromising appearance rubs shoulders with innovative technology and functional features.

The very latest in LED technology provides the lighting. Thanks to the high level of brightness and color fidelity, the lamps radiate a cozy light with a warm white luminous color of 3000 Kelvin. The mirror cabinet also offers an additional light source: The washbasin lighting establishes the perfect illumination for the faucet and washbasin.

In each case the LEDs are controlled by an innovative, intelligent rotary dimmer. You can adjust the light intensity to any setting and choose between three different lighting modes: Washbasin lighting, front, or both light sources together. Naturally the wide range of sizes fit everything from the small 19.5 inch model for the powder room through to the 51 inch model for double washbasins – in this case with two light sources to illuminate the washbasin.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

SLIMLINE THANKS TO LEDS

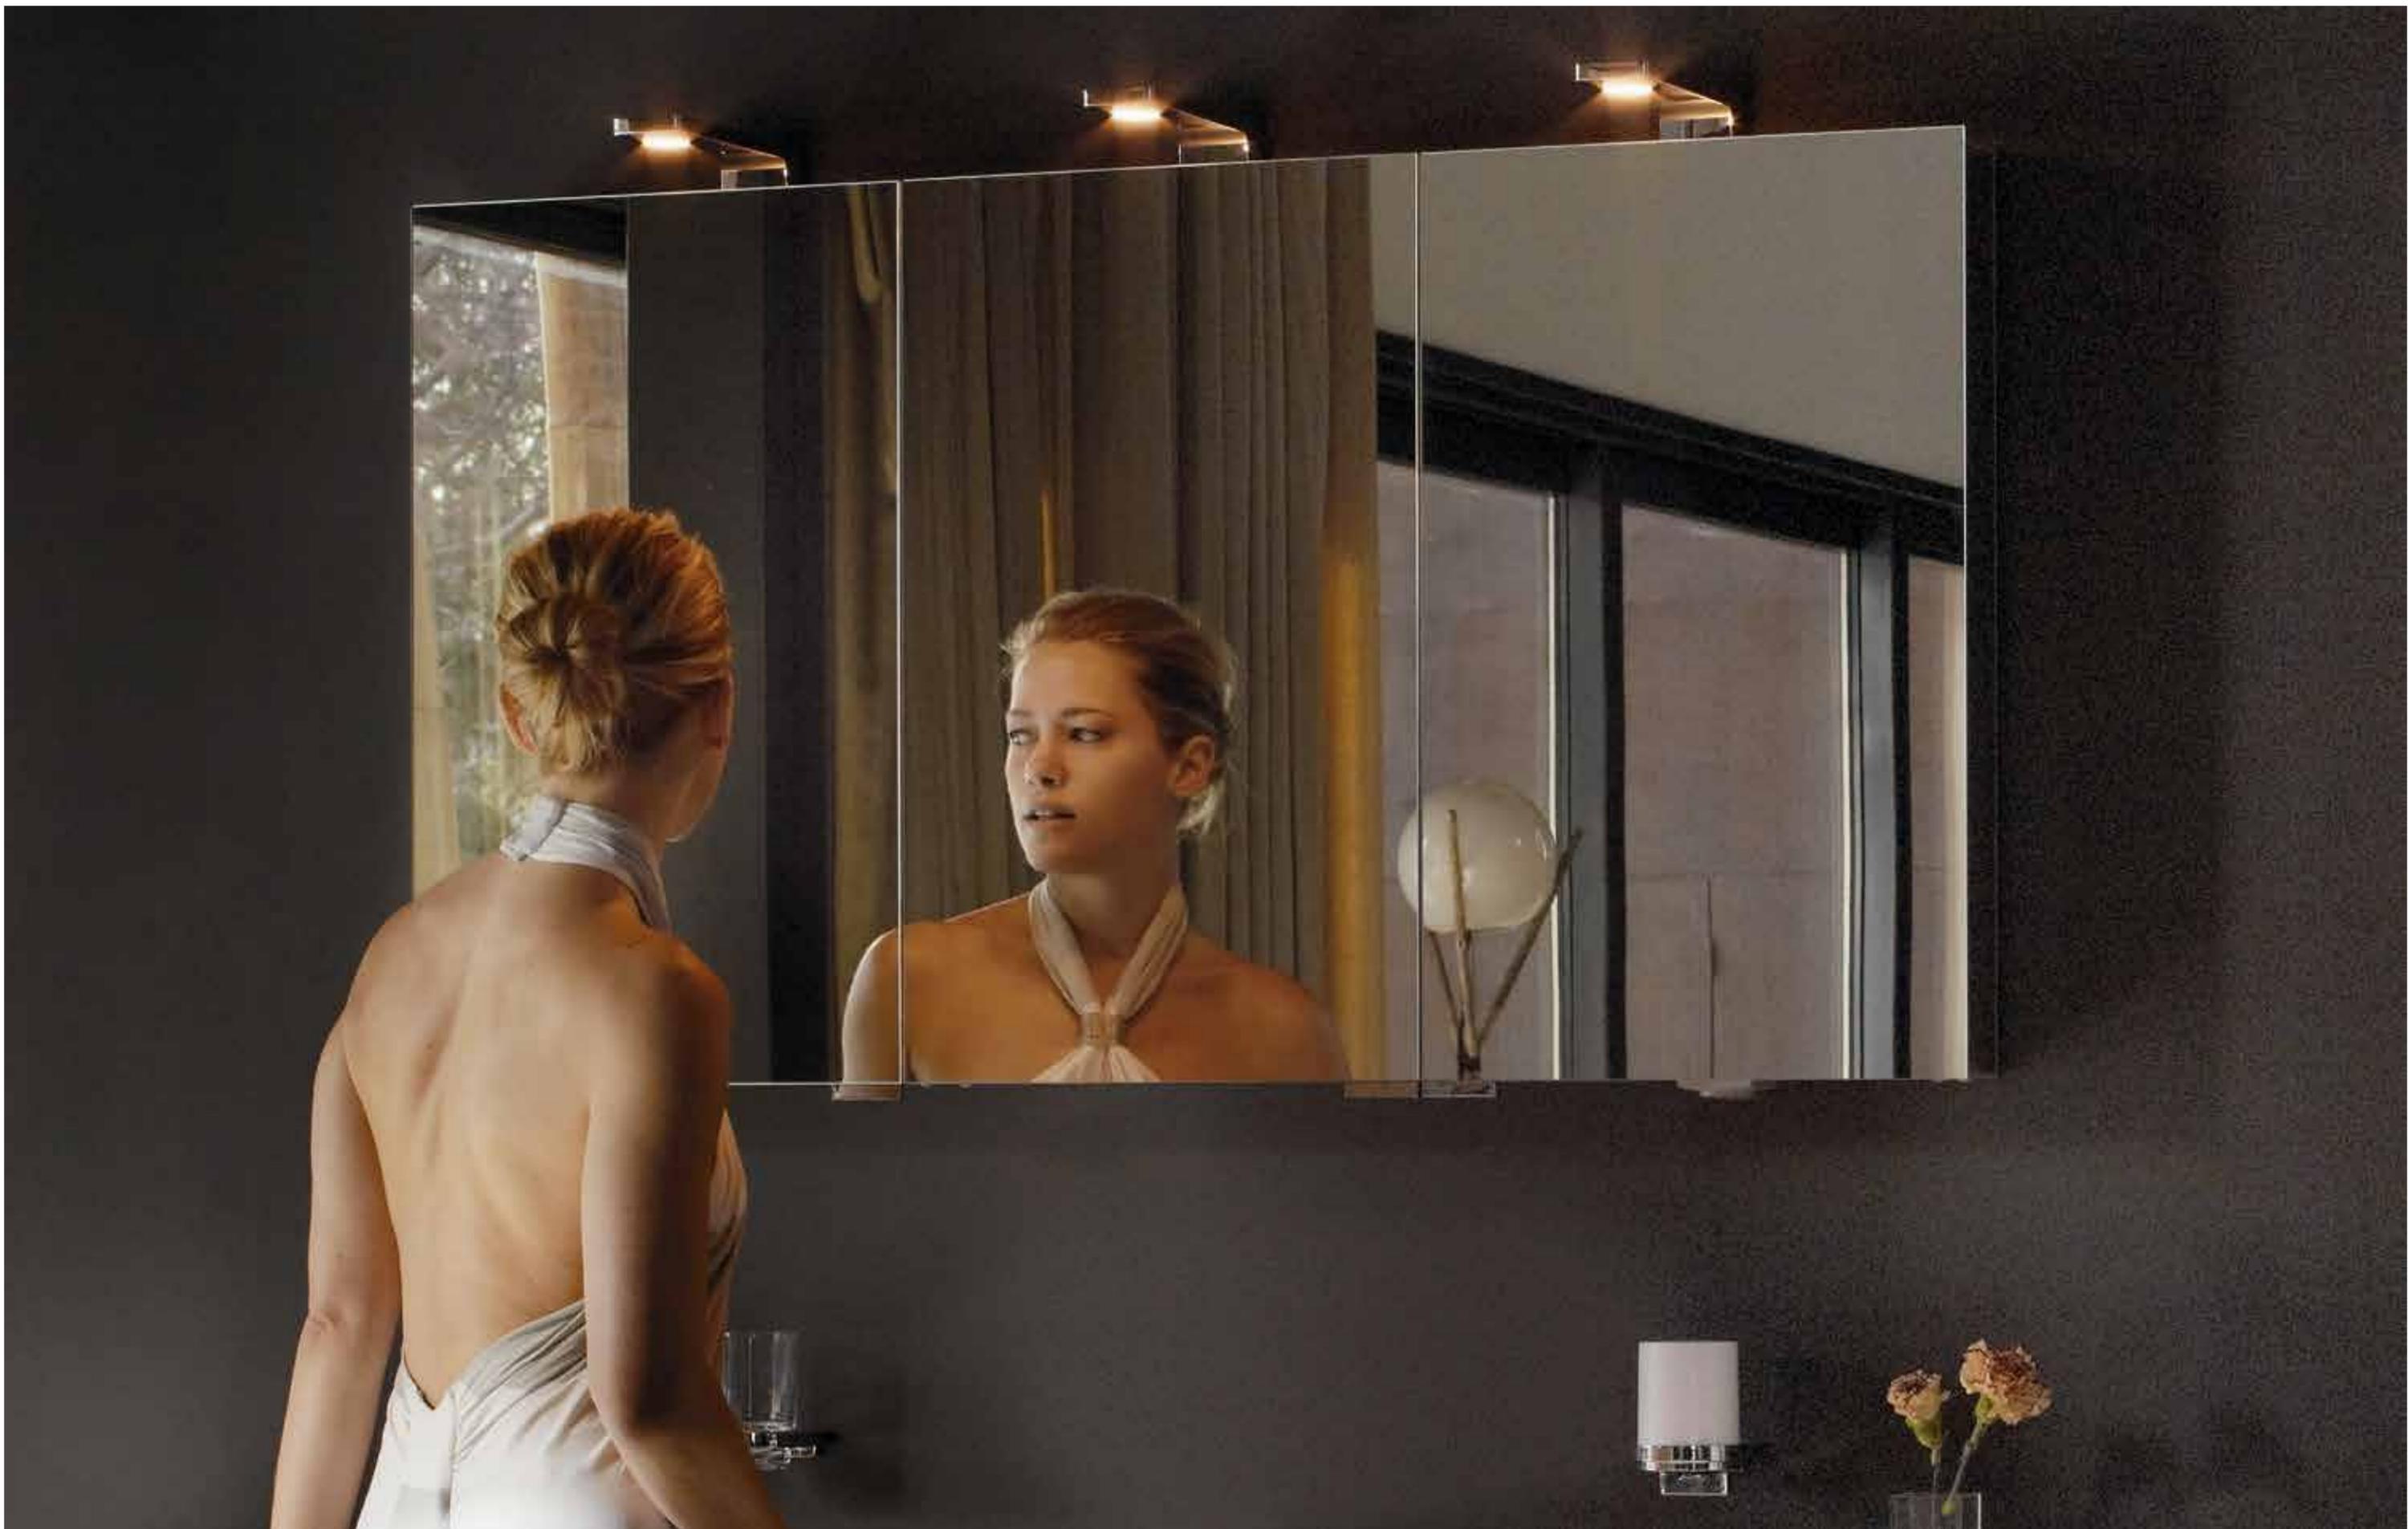

The particularly slim design of the ROYAL UNIVERSE lights was made possible by the use of space-saving LED technology. Modern semiconductor technology provides high light output with significantly reduced energy use – and emits a pleasant, warm white light. Thanks to the freely positionable glass shelves, the storage space inside can be adjusted to suit personal use.

ROYAL UNIVERSE can be combined with any kind of bathroom furniture and style. Behind the revolving doors, which have mirrors on both sides, there is ample space for care and cosmetic utensils. At the same time it provides a luxurious panoramic view.

Please note: All switches and sockets pictured in this brochure are German fittings. All North American products are shipped with North American electrical sockets.

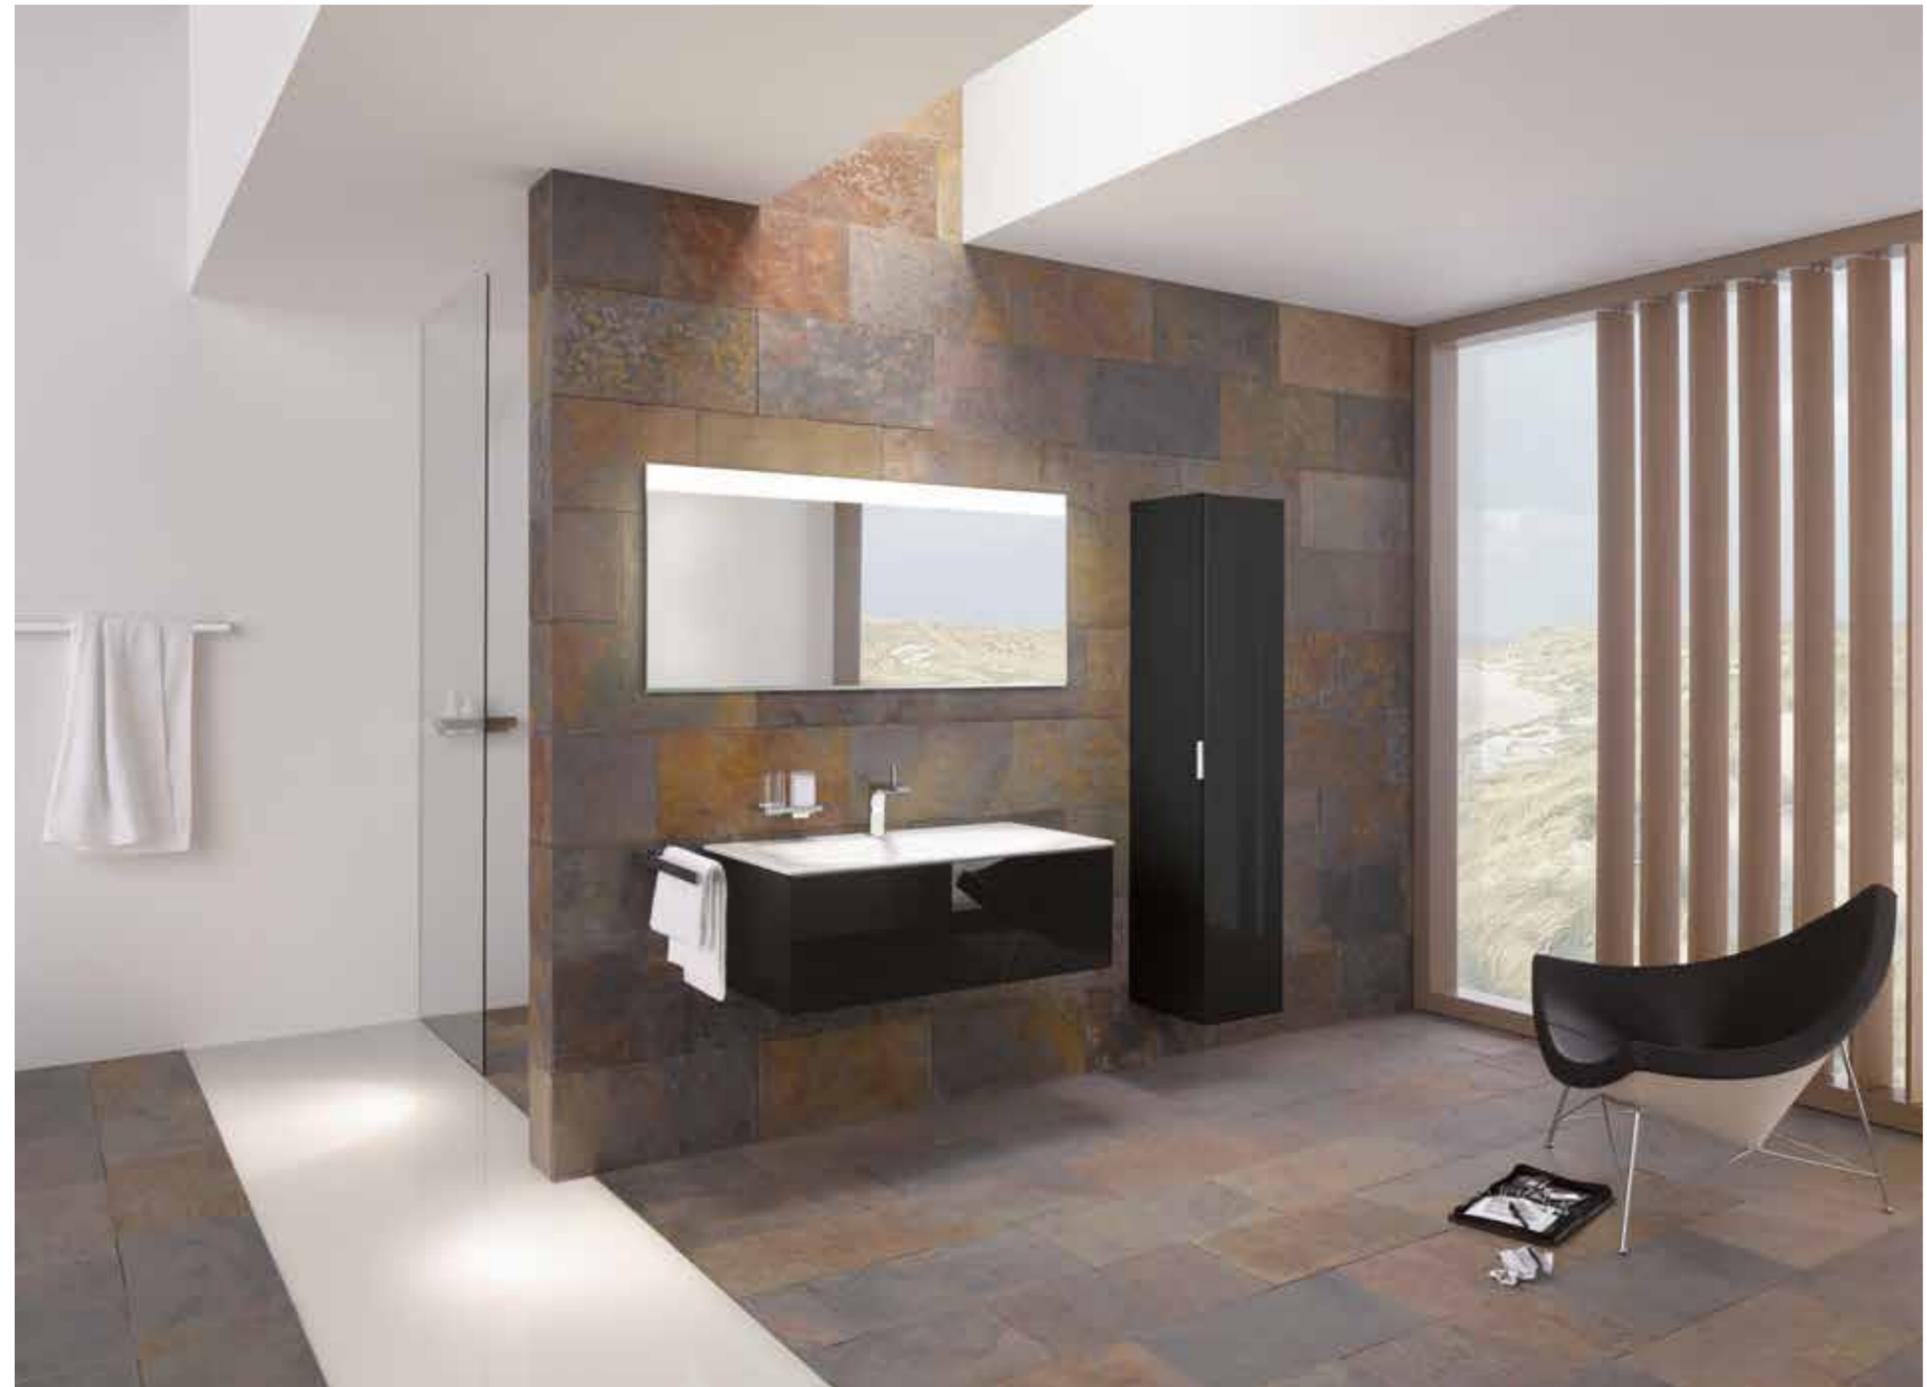

FREEDOM IS
HAVING A VARIETY
OF POSSIBILITIES

PURE DESIGN – BUT NOT PURISTIC

A linear design, multiplied with an enormously rich variety from bathroom furniture to mirror cabinets and from faucets to accessories – that is EDITION 11. Designed by the renowned design agency Tesseract+Partner, all components stand out with their sense of visual lightness, gentle beauty and feeling of uncompromising quality. One really feels their careful workmanship and innovative functionality at every use. This creates your own quality class in the bathroom, which is apparent for everyone and which always pays off.

Tesseract+Partner
Dominik Tesseract

LIGHTWEIGHT AND SUSPENDED

Because of its versatility, EDITION 11 offers the highest degree of freedom in bathroom design. This is assured by the selection of surfaces, the range of sizes and many other areas where a choice is available. The fronts, which seem to float on the face of the furniture, lend a special lightweight and elegant feel to the furniture. When the front drawer of the vanity unit glides open, its optional LED interior light switches on automatically. Tidiness is made easy with the freely positionable storage boxes. By combining two sizes, a generous work area is created beside the ceramic washbasin. The washbasin is produced in white ceramic, and is available with an oval basin or softened rectangular basin. Also available upon request, our matte white Varicor washbasins in single or double, allowing for modular customization between 28 and 110 inches width.

PERFECT HARMONY

EDITION 11 – The innovative furnishing concept offers a linear design and soft forms, multiplied by an enormous range of variations. For lovers of consistently thought-through designs the ROYAL 60 washbasin represents the perfect complement to the mirror cabinets and bathroom furniture of EDITION 11. In classic, rectangular form, the most convincing thing about the ceramic washbasin both inside and out is its precise, high quality workmanship and flat design. With its generous shelf space all round in the three sizes of 27.5, 41.5 and 55 inches, it offers individual and creative planning potential for bathrooms of any size. Together with the EDITION 11 vanity unit, which borrows from the washbasin's filigree, linear vocabulary of form, the ensemble adorns any bathroom like an extraordinary jewel.

A washbasin from the ROYAL 60 collection combined with an EDITION 11 vanity unit

LUXURIOUS AND INCORRUPTIBLE

Black accents in bathroom design are modern and appear luxurious – they contribute to the bathroom with an incorruptible character. KEUCO offers a new finish in a metallic brushed black for the EDITION 11 furniture. The unobtrusive and rectilinear design of EDITION 11 furniture is characterized by a view without handles. In addition to the vanity units, tall units and side units are available with this new special finish. The noble matte black look exudes a secretive extravagance and at the same time gives the bathroom a comforting atmosphere. The haptic eminent, cozy, velvet matte quality is reflected in a special resistance to finger prints and easy care. Adapted from the kitchen industry, the special metallic brushed black surface is anti-fingerprint and heat resistant, making it ideal for any bathroom application.

SHAPED TO YOUR PREFERENCES

Soloist furniture can be shaped almost without limits where interior design is concerned: KEUCO bathroom furniture is available either as a wall-mounted version, with base, or as a more modern version with legs. Genuine wood veneers and textured lacquers with matte or gloss finishes radiate elegant comfort and holistic flair in the bathroom – your personal space. Cover plates made of glass or ceramic with a marble or slate finish are available for the side units as a tasteful upgrade.

CHARACTER INSTEAD OF INDIFFERENCE

A STRIKING, ERGONOMICALLY WELL THOUGHT OUT DESIGN

KEUCO design is determined by aesthetics, functionality and ergonomics, not by the kind of logic that characterizes mass production. The furniture and accessories of EDITION 300 clearly exemplify this philosophy and make it something to be experienced. Convenience of use coupled with striking elegance. The brilliance of the perfectly worked surface emphasizes the characteristic contours.

Uncompromising in bathroom planning: For everything you envision EDITION 300 has a matching product for you. All according to our motto: The more freedom there is in planning, the longer the enjoyment in use. When opening, the drawers of the vanity units slide without a sound. Their dividers offer you intelligently organized storage space in which your body-care utensils won't get mixed up.

OUR IDEA OF FREEDOM OF DESIGN

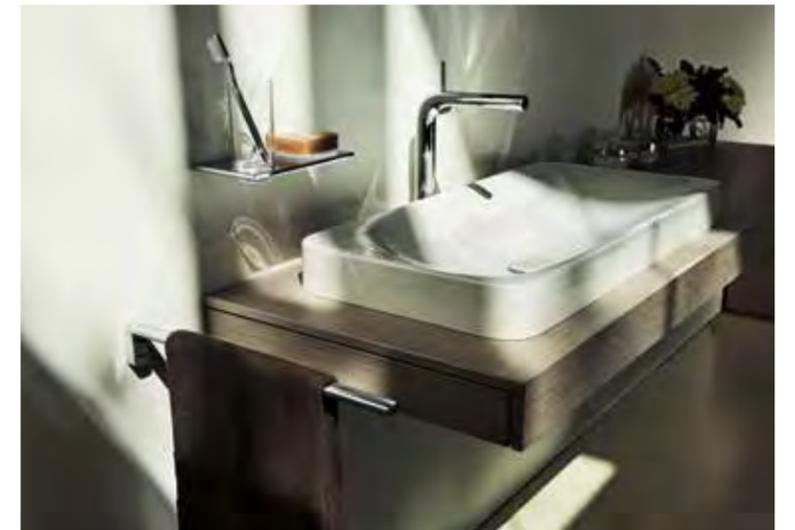

PASSION MAKES THE DIFFERENCE

With EDITION 400, KEUCO is setting new trends in modern bathroom design. The design-oriented bathroom furnishing concept has a strong focus on individualization. Every single one of the products in the series – from the bathroom furniture to the washbasins, the faucets to the accessories, the mirror cabinets to the light mirrors – beautifies with its uniquely delicate and simultaneously sculptural language of form. Versatile combination potential, colors and materials offer a wide spectrum of possibilities for intelligent, room-specific arrangements. Useful functions add order and convenience to the bathroom and establish a unique ambience. Distinguished with the “Design Plus” seal of quality, EDITION 400 – conceived by the design agency Tesseraux + Partner in Potsdam – sets new standards for the bathroom of the future.

MODULARITY WHICH HAS BEEN THOUGHT THROUGH

Fully in accordance with preference and demand, but always extremely clear: Versatile furniture and washbasin combinations offer a room-specific bathroom design and lifestyle in the bathroom. Thanks to the modular concept and the large variety of colors and materials of EDITION 400, there are no restrictions to personal creativity for planning your bathroom – regardless whether it's for families, couples or singles.

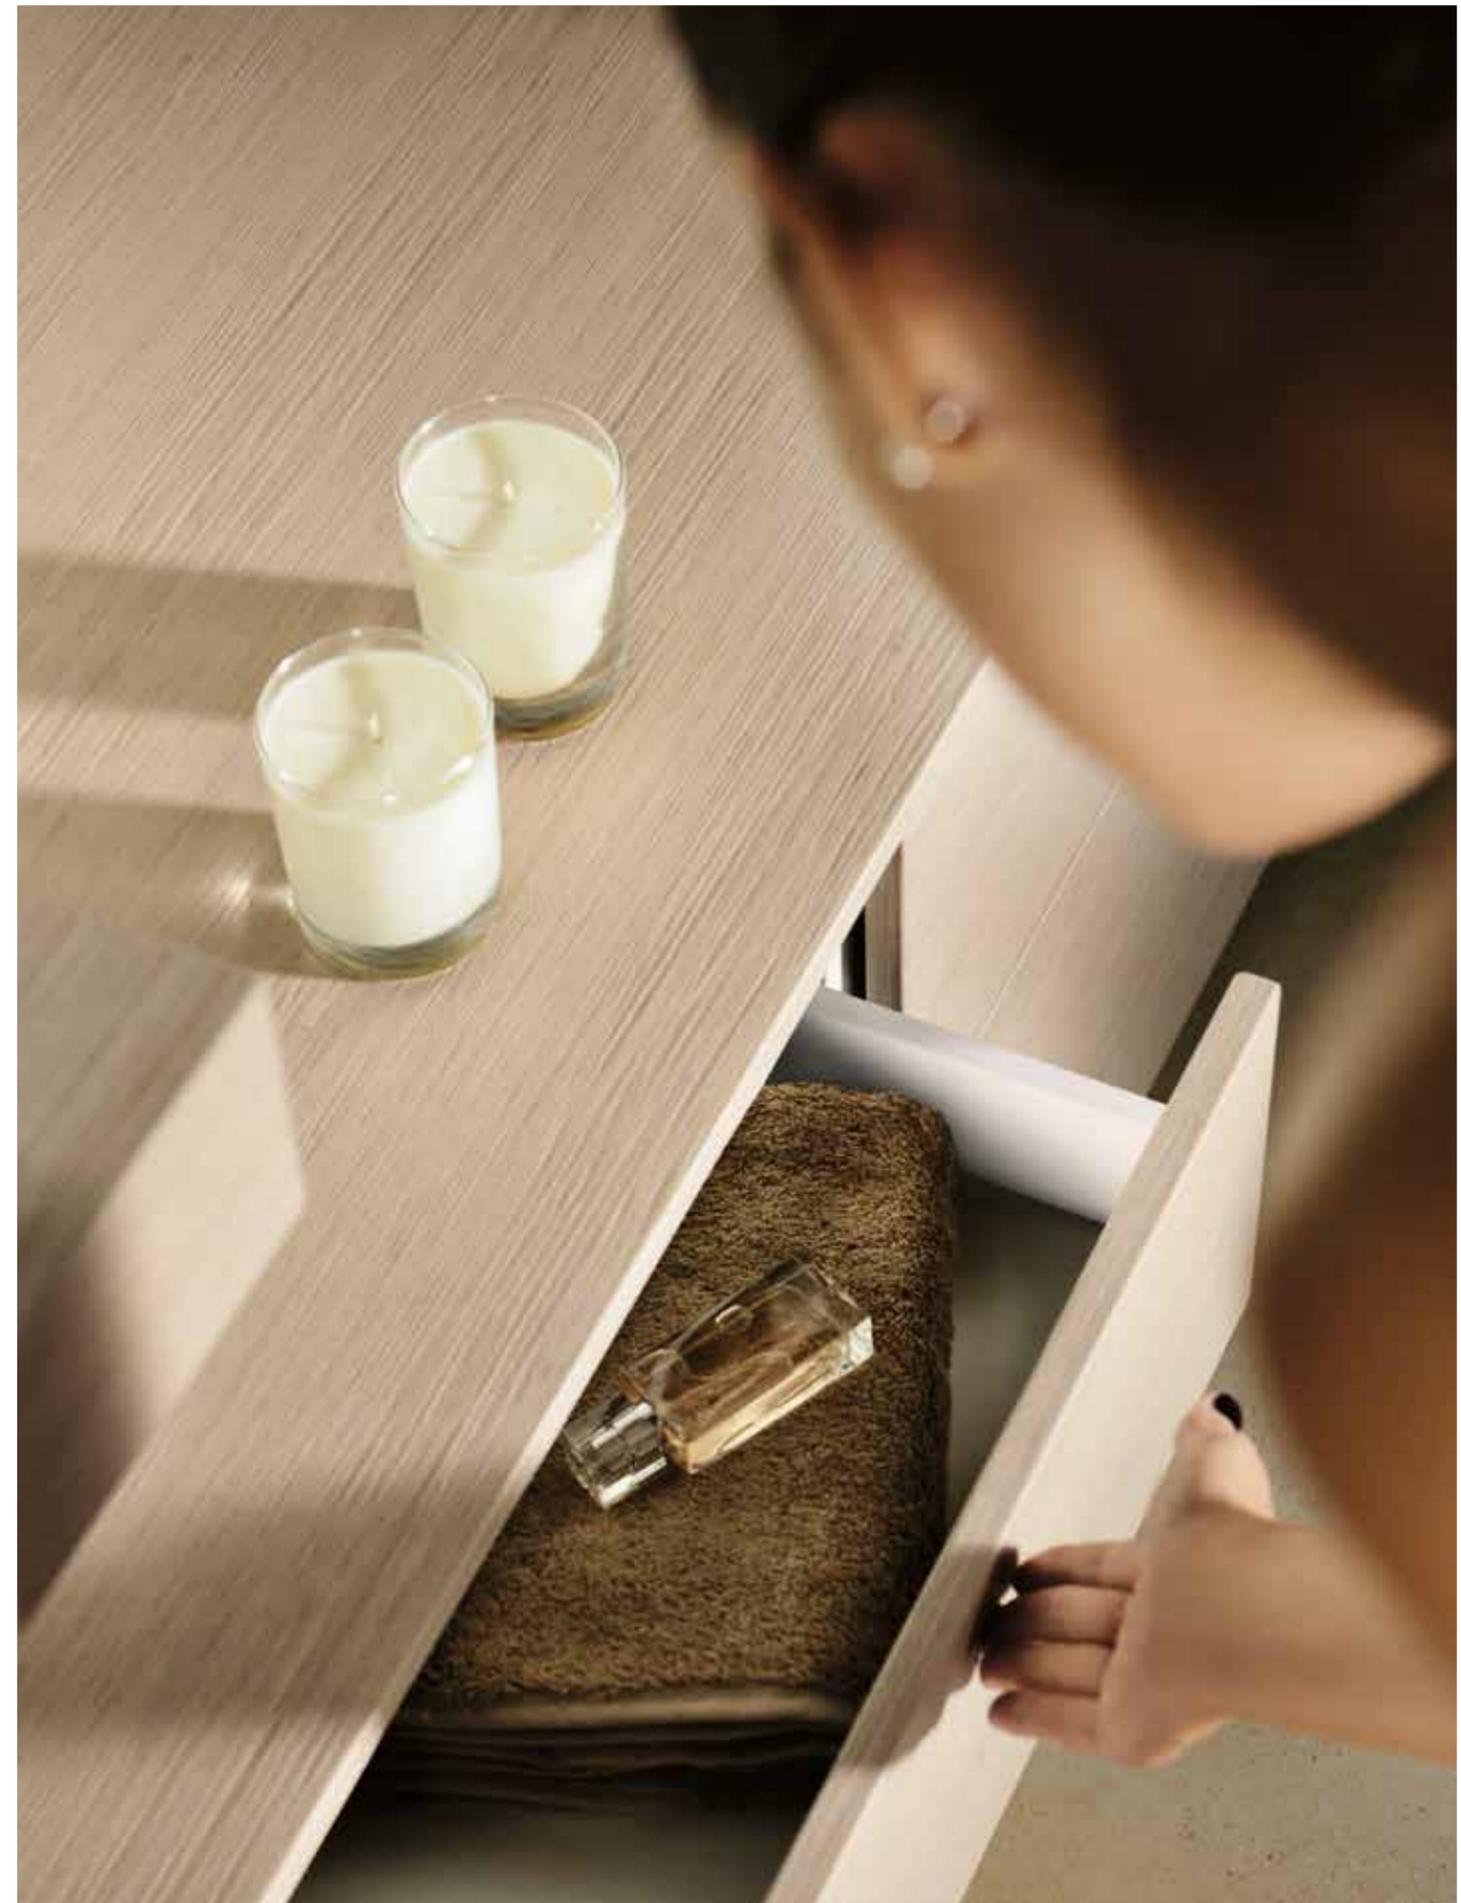

The wide range of furniture for the washbasin is completed by either wall-mounted or floor-standing side units, and middle and tall units. In the large selection of front surfaces, too, no wish is left unfulfilled: For example, various colors of structure lacquers are available whose special surface resembles natural materials. Classy real wood veneers, such as walnut, create a sensuous, natural atmosphere. Shiny or satin glass cover plates add an extravagant flair.

CLEAR ORDER WITH LOTS OF ROOM

The reduced size of the external vanity unit provides generous interior storage space. This offers a large amount of storage space with system. The drawer units are available in two heights. The drawers are opened with functional push-to-open technology and closed by means of a soft-close technology. Therefore, everything fits in to the structured geometry without handles and forms a clear architectural line. The high quality inner compartment of the drawers ensures that everything remains where it belongs.

STYLE ACROSS THE BOARD

The perfect complement to KEUCO faucets is the linear bathroom furniture, washbasins and light mirrors of the PLAN series. Here Tesseraux+ Partner in Potsdam again played a leading role.

The integral architectural approach is evident in every detail. The furniture is unobtrusively linear. From the cubic body to the luxurious glass fronts to the rim of the light mirror and even the filigree base support, the design and color concept is omnipresent. The base supports are optionally available in seven widths from 18 to 47 inches for washbasin base units, tall units or sideboards.

In the naturally-inspired colors of cashmere, truffle and inox or classic white or anthracite, each piece of furniture is uncompromisingly modern. Crowning them are washbasins with flat designs. Impressive across the board.

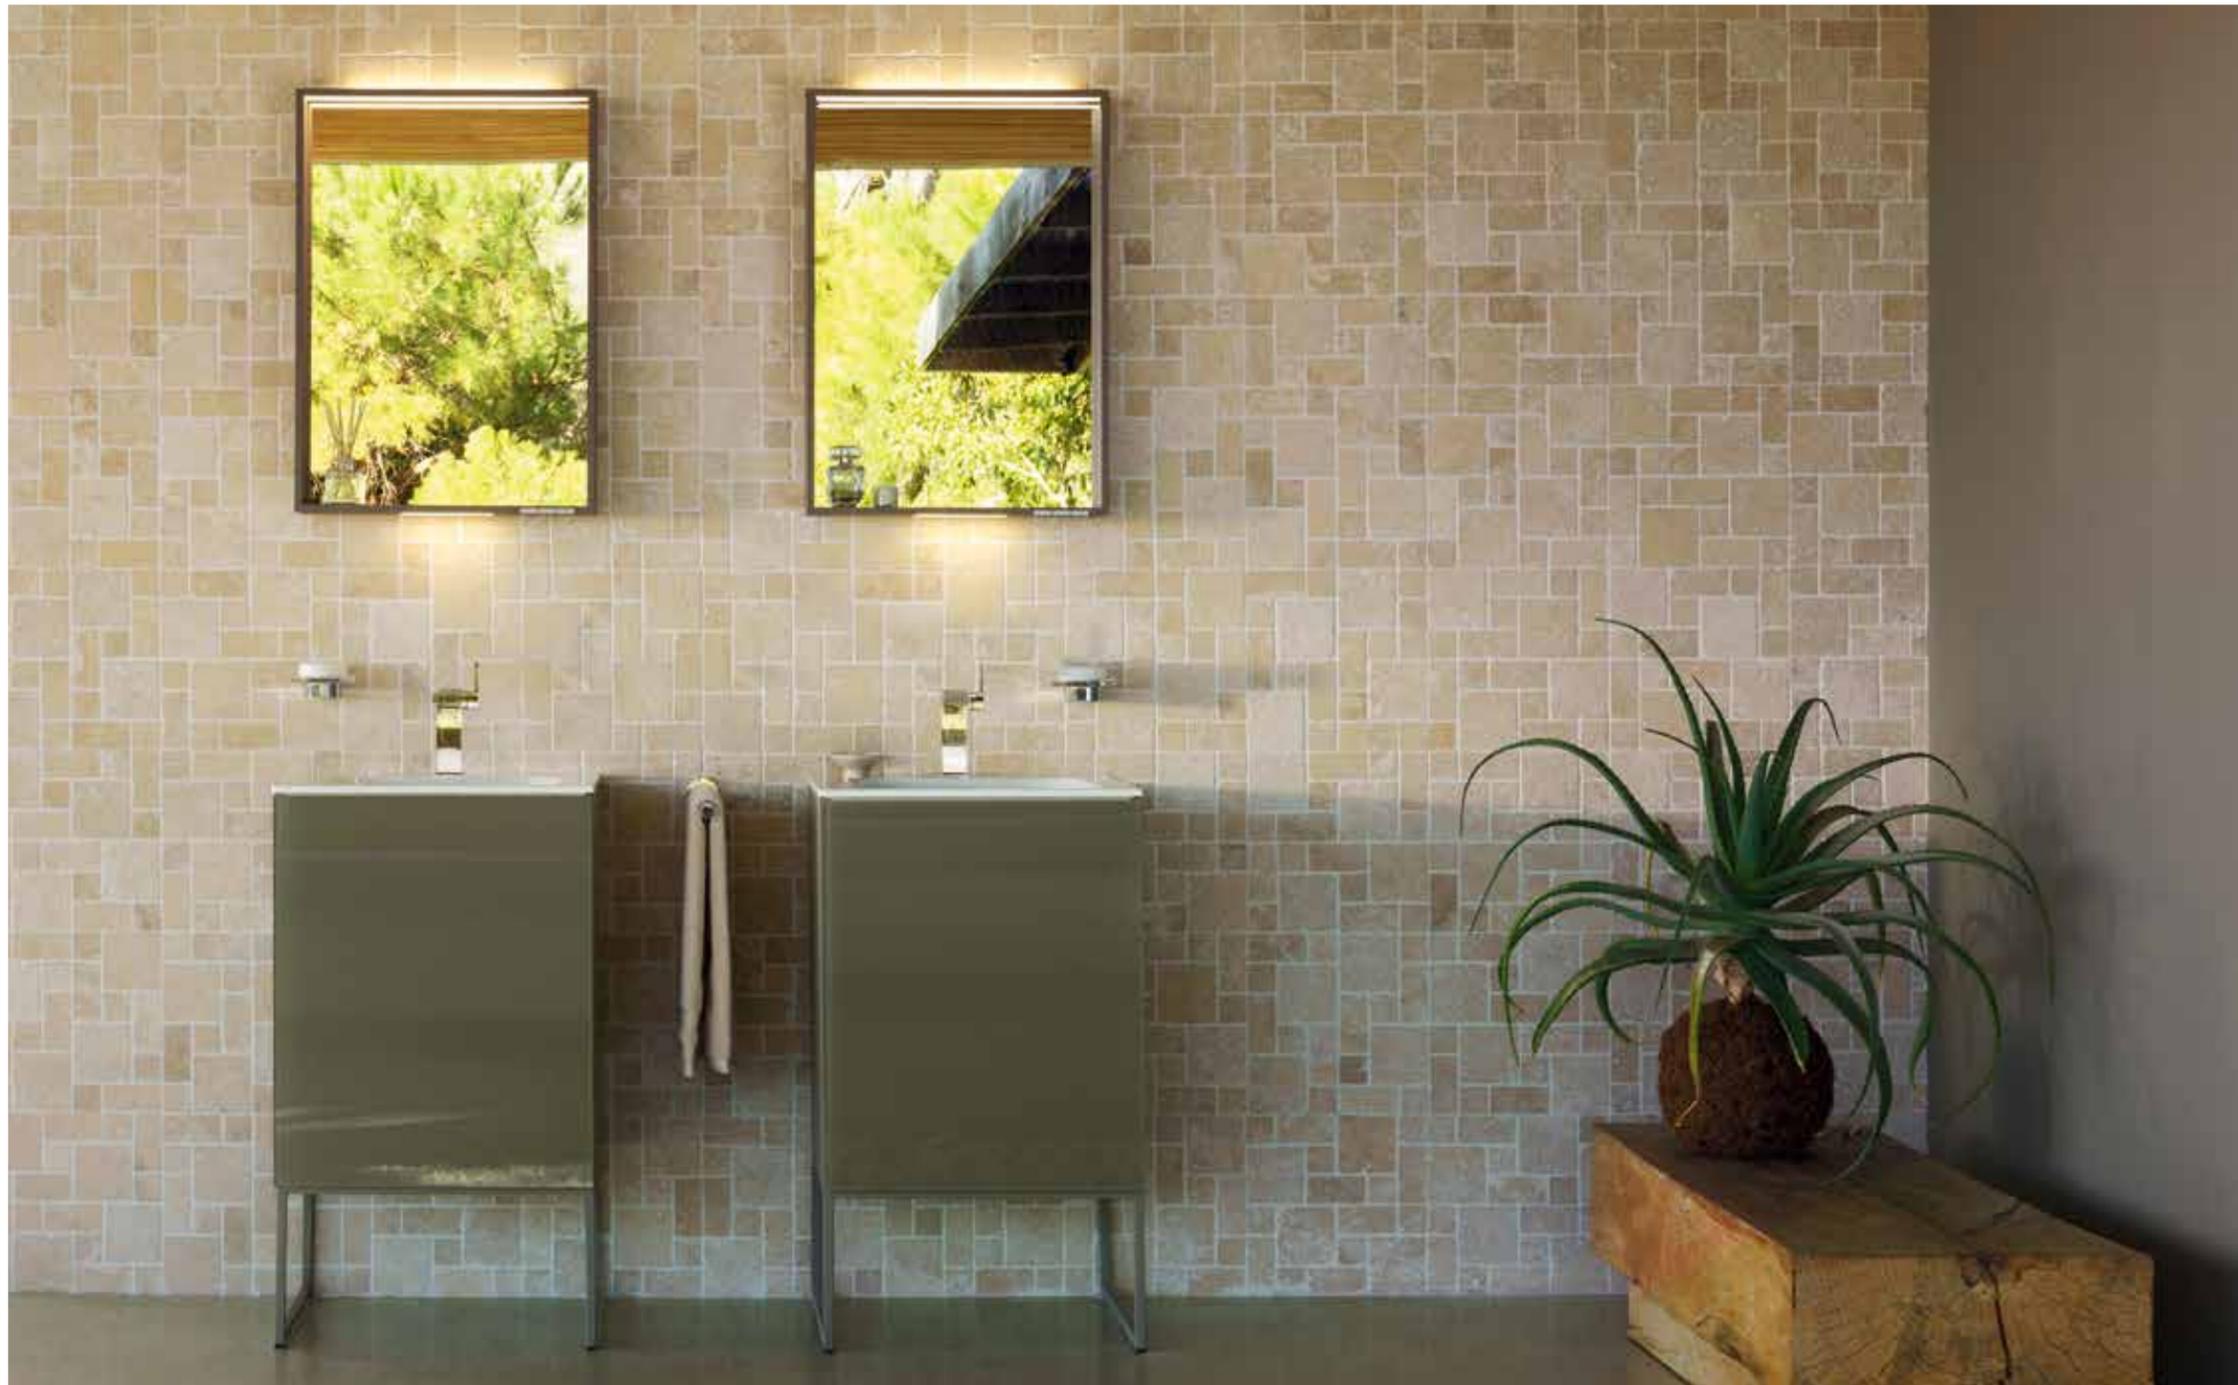

FREE-FLOWING LANGUAGE OF FORM

The impressive thing about PLAN ceramic washbasins is the soft, flowing shape of their flat design. Being the extremely easy-to-care-for material that it is, fine ceramic stoneware satisfies the highest standards of durability and hygiene. Depending on the chosen width from 18 to 47 inches, single or double washbasins are available with generous surface space for different faucets. Of course, all solutions can be combined with the KEUCO faucets.

DOWN TO EARTH DESIGN

However you view it, the PLAN bathroom furniture is exciting. Aesthetic contrasts are its heart and soul. Mounted on the wall, the furniture exudes presence, but still emanates a certain calm and lightness. This may be due to the tone-in-tone look of the body and the handleless glass finish. Whatever the case, it is trend-setting.

Combined with the optional filigree metal support, the unobtrusive furniture makes a strong statement in the room. With their high quality lacquer finish, their color perfectly matches the chosen body. Regardless of the bathroom size, the furniture and washbasins in sizes ranging from 18 to 47 inches in two heights create a special atmosphere.

THE CONCEPT UNFOLDS

The integral PLAN bathroom furnishing concept also includes sideboards and tall units. Here, sensuousness pairs up with sensibility. The body is available in five contemporary colors. The premium glass fronts have a lustrated lacquer coating on the back. The inox look has frosted glass.

The tall unit surprises with a shelf integrated on the side. Indiscernible from the front, the unit offers abundant space for one's daily bathroom utensils.

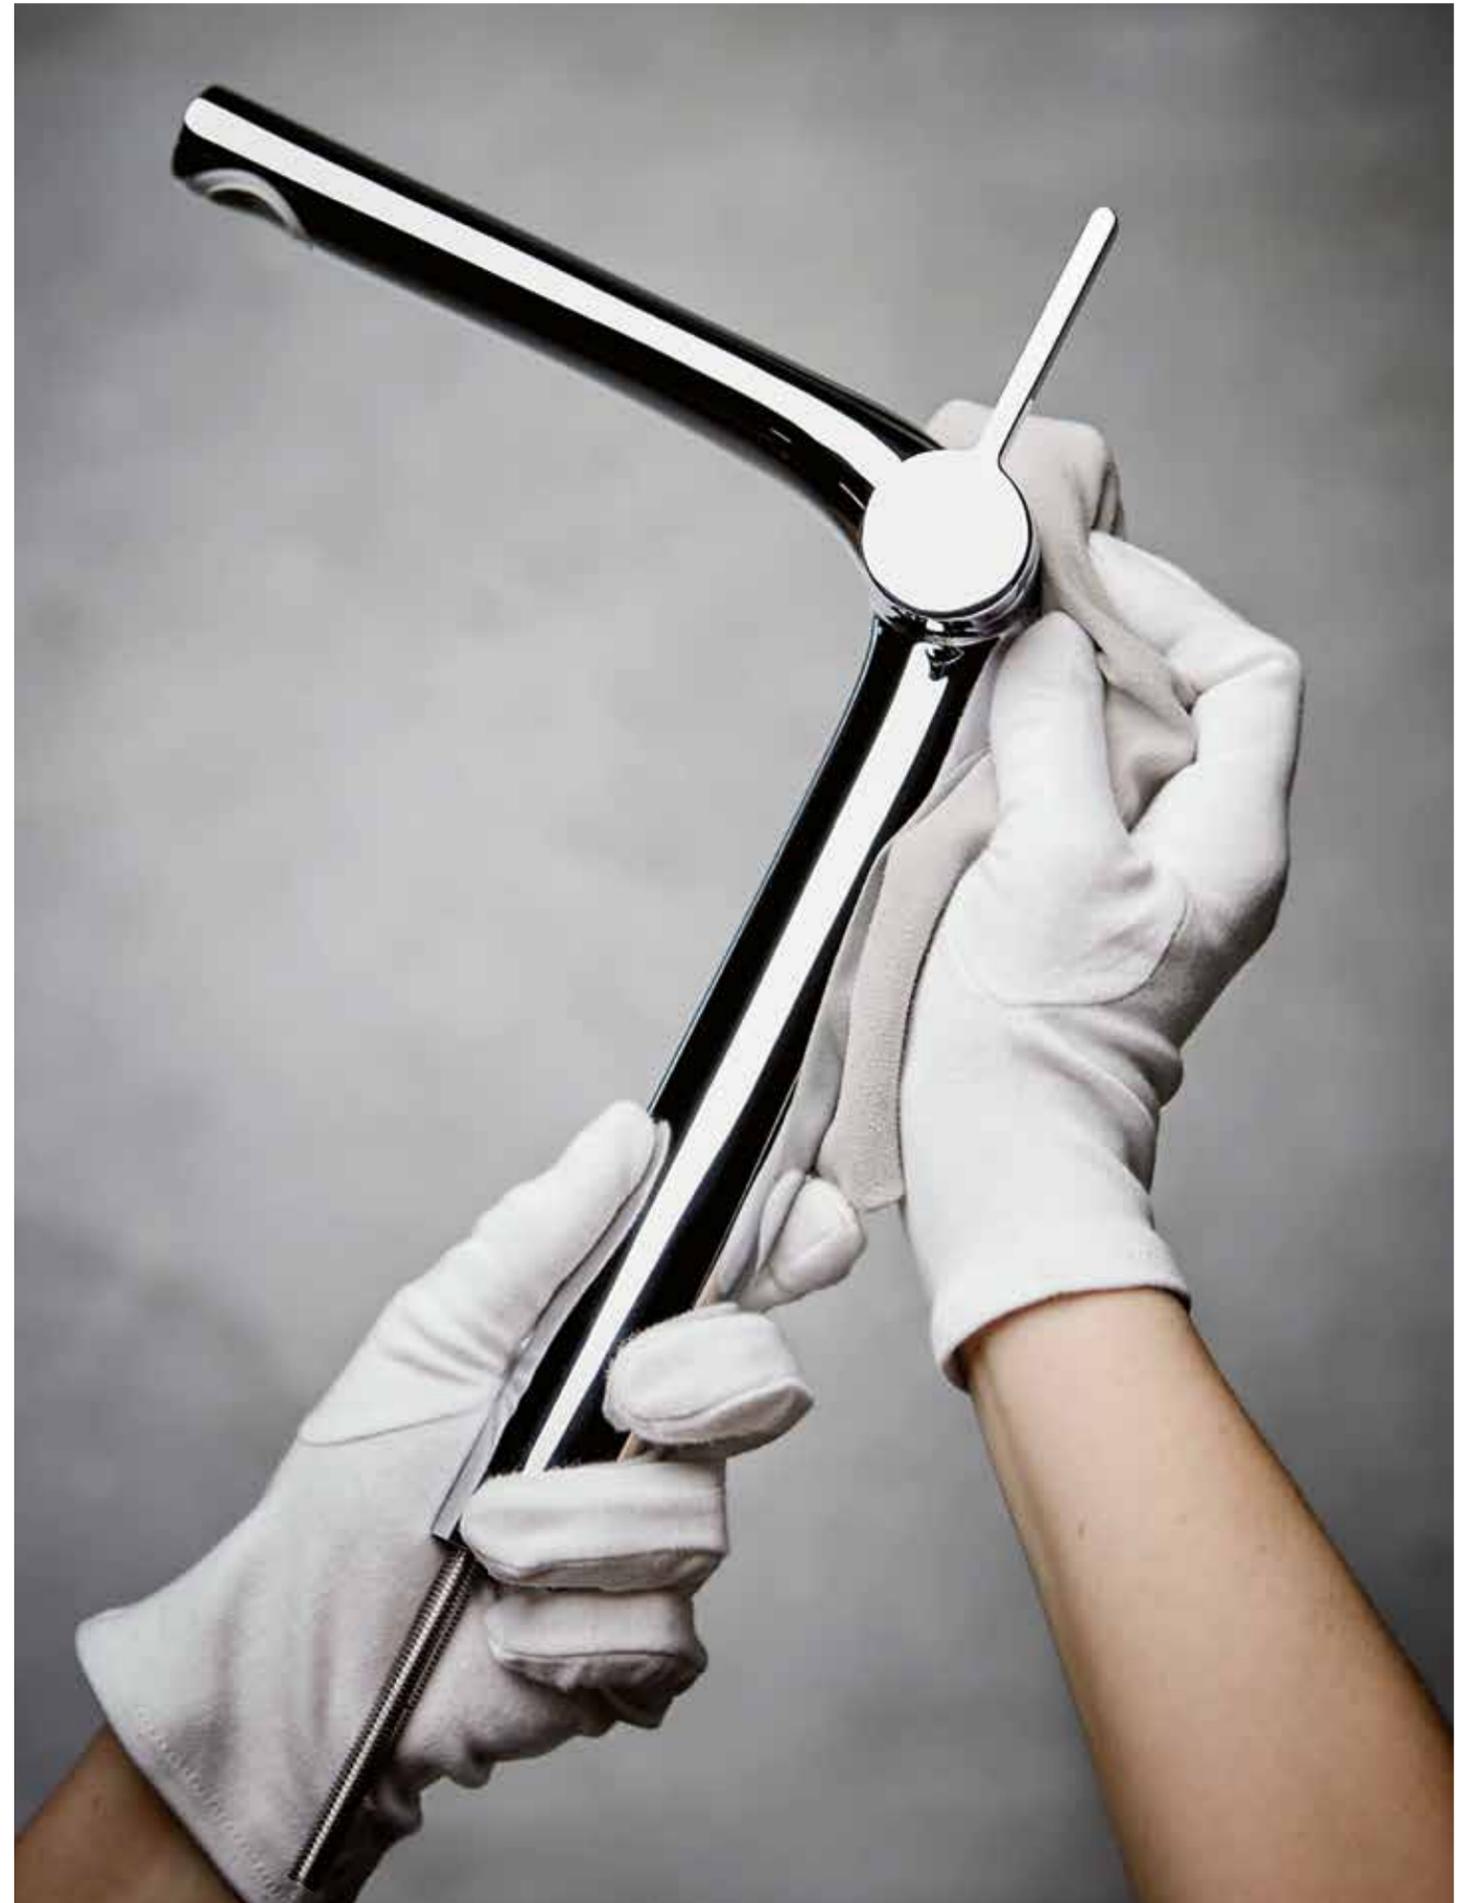

The design of PLAN furniture also features intelligent functionality in the details. With its additional interior drawer, the high vanity unit has a surprise in store. The tidy arrangement inside allows direct access to your care articles and is tailored practically to your needs.

Shower curtain PLAN maxxii
100% polyester 0.015 lb/ft², vertical seams, reinforced for stainless steel eyelets, distance between eyelets appr. 7-7/8", weighted seam 1.76 oz per 39-3/8", impregnated, fungicide, antibacterial, antistatic, washable at 30°C/86°F, shrinkage appr. 3%, complete with curtain rings, white
Color: white
Full length: 70.87"
Width: 55.12", 70.87", 78.74", 118.11"

Information concerning the measurements:
All dimensions refer to actual finished size. In order for the shower curtain not to touch bottom of bath tub or the floor we recommend the following: Distance between floor and bottom edge of curtain appr. 1-3/16". Distance between centre of curtain pole and top edge of curtain appr. 1-9/16". Please allow appr. 1.3 to 1.5 times curtain pole length when calculating required width of curtain.

for two 3-15/16/4-3/4" wide paper rolls

14973
Toilet paper holder
with shelf, open form,
for 3-15/16/4-3/4" wide paper rolls,
with anti-slip insert in gray

11573
Toilet paper holder
with smoked glass shelf, open form,
for 3-15/16/4-3/4" wide paper rolls

19073
Toilet paper holder
with smoked glass shelf, open form,
for 3-15/16/4-3/4" wide paper rolls

12769
Toilet brush set
wall mounted,
complete with opaque synthetic insert,
brush with handle and lid, spare brush head
in white or anthracite

16064
Toilet brush set
floor-standing model,
complete with genuine matte crystal insert,
brush with handle and spare brush head

04969
Toilet brush set
floor-standing model,
complete with opaque synthetic insert,
brush with handle and lid,
spare brush head in white or anthracite

11170
Towel holder
holds 6 small towels

30070
Towel holder
holds 6 small towels

11172
Guest towel basket
removable, medium density fiberboard
white lacquered matte finished
Dimensions (w x h x d): 7-7/8 x 13-5/8 x 7-7/8"

Finishes:

* Also available in special finishes: white, cashmere, truffle, and anthracite.

Finishes:

17649
Cosmetic mirror
 non illuminated, double jointed arm, adjustable in three dimensions, double-sided mirror concave/straight, magnification factor x 2.5
 Diameter: 7-1/2"

17649
Wall plate
 optional – to strengthen wall installation, suitable for cosmetic mirrors art. no. 17649

17612
Cosmetic mirror iLook_move round
 non illuminated, on pivoted rail, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Diameter: 8-3/8"

17612
Cosmetic mirror iLook_move round
 illuminated, 1 light color 6000 kelvin (day light), cable switch, spiral cord (length 15-3/4"), on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification x 5
 Operation: cable switch
 Power supply: connection via plug-in power supply unit, 12 V plug-in power supply unit, input 110 V, Standby consumption: < 0.3 watt
 Illumination: LED 4.5 watt (lifespan > 50,000 hours)
 Diameter: 8-3/8"

17612
Cosmetic mirror iLook_move round
 illuminated, 1 light color 6500 kelvin (day light), operation via rocker switch, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: with integrated rocker switch
 Power supply: 12 V power supply integrated into wall arm, input 110 V
 Illumination: LED 4,5 watt (lifespan > 50,000 hours)
 Diameter: 8-3/8"

17612
Cosmetic mirror iLook_move round
 illuminated, 1 light color 6000 kelvin (day light), operation by light switch, in-wall cable layout, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: light switch (not included in delivery)
 Power supply: connection via wall socket 12 V in-wall adapter, input 110 V, standby consumption: 0 watt
 Illumination: LED 7 watt (lifespan > 50,000 hours)
 Diameter: 8-3/8"

17612
Cosmetic mirror iLook_move round
 illuminated, 5-stage adjustable light color from 2700 kelvin (warm white) to 6500 kelvin (daylight), glass control panel, in-wall cable layout, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: glass control panel with capacitive touch sensor and LED display
 Power supply: connection via hard wire installation, concealed power cable, 12 V in-wall adapter, input 110 V, standby consumption: < 0.5 watt
 Illumination: LED 4.5 watt (lifespan > 50,000 hours)
 Diameter: 8-3/8"

17612
Cosmetic mirror iLook_move round
 illuminated, 5-stage adjustable light color from 2700 kelvin (warm white) to 6500 kelvin (daylight) glass control panel, spiral cord (length 15-3/4") on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: glass control panel with capacitive touch sensor and LED display
 Power supply: connection via wall socket, 12 V in-wall adapter, input 110 V, standby consumption: < 0.5 watt
 Illumination: LED 4.5 watt (lifespan > 50,000 hours)
 Diameter: 8-3/8"

17613
Cosmetic mirror iLook_move squared
 non illuminated, on pivoted rail, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Exterior measurement: 7-7/8 x 7-7/8"

17613
Cosmetic mirror iLook_move squared
 illuminated, 1 light color 6500 kelvin (day light), operation via rocker switch, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: with integrated rocker switch
 Power supply: 12 V power supply integrated into wall arm, input 110 V
 Illumination: LED 4,5 watt (lifespan > 50,000 hours)
 Exterior measurement: 7-7/8 x 7-7/8"

17613
Cosmetic mirror iLook_move squared
 illuminated, 1 light color 6000 kelvin (day light), operation by light switch, in-wall cable layout, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification x 5
 Operation: cable switch
 Power supply: connection via plug-in power supply unit, 12 V plug-in power supply unit, input 110 V, Standby consumption: < 0.3 watt
 Illumination: LED 4.5 watt (lifespan > 50,000 hours)
 Exterior measurement: 7-7/8 x 7-7/8"

17613
Cosmetic mirror iLook_move squared
 illuminated, 1 light color 6000 kelvin (day light), operation by light switch, in-wall cable layout, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: light switch (not included in delivery)
 Power supply: connection via wall socket 12 V in-wall adapter, input 110 V, standby consumption: 0 watt
 Illumination: LED 7 watt (lifespan > 50,000 hours)
 Exterior measurement: 7-7/8 x 7-7/8"

17613
Cosmetic mirror iLook_move squared
 illuminated, 5-stage adjustable light color from 2700 kelvin (warm white) to 6500 kelvin (daylight), glass control panel, in-wall cable layout, on pivoted arm, adjustable in three dimensions, one-sided mirror, magnification factor x 5
 Operation: glass control panel with capacitive touch sensor and LED display
 Power supply: connection via hard wire installation, concealed power cable, 12 V in-wall adapter, input 110 V, standby consumption: < 0.5 watt
 Illumination: LED 4.5 watt (lifespan > 50,000 hours)

30201/30203/30202**Mirror cabinet EDITION 300**

wall mounted,
1 lift-up double sided crystal glass mirrored door
with sealed edges, mirrored sides
Body: aluminum silver anodized
Lighting:
– fluorescent lamps
2 x 14 watt T5 (30201)
2 x 21 watt T5 (30203)
2 x 28 watt T5 (30202)
Interior fittings:
– 1 light switch (external)
– 3 sockets (1 of them external)
– 1 sliding cosmetic mirror (7-7/8 x 20-1/2")
– 5 adjustable glass shelves with brackets
(3 shelves 14-3/4 x 3-9/16" and 2 shelves 10-13/16 x 3-9/16")
Dimensions (w x h x d):
25-9/16 x 25-9/16 x 6-5/16"
37-3/8 x 25-9/16 x 6-5/16"
49-3/16 x 25-9/16 x 6-5/16"

21501/21502/21503**Mirror cabinet EDITION 400**

for recessed installation,
2/3 hinged double sided crystal mirrored doors
Body: aluminum silver anodized, interior rear wall mirrored
Operation:
– key panel with capacitive touch sensor
– integrated extension function for e.g. light switch
Illumination:
– adjustable light color from 2700 kelvin (warm white)
to 6500 kelvin (daylight)
– LED (lifespan > 30,000 hours), infinitely dimmable,
lamps non-exchangeable
Interior fittings:
– 2 sockets
– 3/2 x 3 adjustable glass shelves
– 1/2 storage boxes with slidable glass lid
– interior lighting
– soft-closing doors
Dimensions (w x h x d):
28 x 25-9/16 x 6-1/16" / 26 watt
41-3/4 x 25-9/16 x 6-1/16" / 39 watt
