daavidrockwell for  
**GESSI**<sup>®</sup>

The warm modern style  
of New York Design.

From surface and floor coverings to lighting and furniture, the firm celebrates product design as a natural extension of its immersive environments. Drawing on an encyclopedic knowledge of design, Rockwell Group creates flexible, transformable products that support new ways of living, working, and communicating. The collaboration with Gessi on the firm's first-ever line of bath fittings and accessories was a thrilling challenge for David Rockwell. Defined by simplicity and possibility, the Inciso Collection weds modern style with heritage details and finishes that invite tactile discovery.

**58014#187**  
Three-hole basin mixer without waste

The most perceptive consumers are expressing the need for a return to authenticity, and a desire to surround themselves with products that exude a feeling of reliability, true depth, and quality. They want products perfected over a long time with a purposeful aesthetic that arouses emotions.

“Golden age”  
solidity in a  
contemporary  
look.

Gessi's goal was to conceive a unique line of products that could fully embody the emotions of the skillful specifics of old era brassware manufacturers while making it fresh and contemporary by infusing it with modern architectural taste and the most advanced metal processing technology.

# R E T T A N G O L O K

Rettangolo is appropriately considered one icon; in fact, its form is so ideal it is capable of giving life to a new unparalleled splendor when it is torn off to create K, the "subversive" Rettangolo, forever and again one revolutionary concept.

THE ICON  
GENERATES A  
NEW FORM OF ART

Today, for the sake of security and staying inside of the “comfort zone”, the very idea of discontinuity is often rejected. It should rather be embraced as the instrument for a deeper personal comprehension, a reinvention, the redefinition of one’s own existence. Conformity imposes adherence to the model of aesthetic perfection proposed by the media, discouraging the search for diversities as elements infused with charm and uniqueness.

“Look at usual things with unusual eyes”

Vico Magistretti

**53002#706**  
Basin mixer without waste

**53002#149**  
Basin mixer without waste

**53004#149**  
High version basin mixer, without waste

A smart detour from the customary bears uniqueness and charm

A perfect object can “break” creating a new form of beauty

Far from causing a loss of value and beauty, a breach in what is perfect can indeed create a new form of exquisiteness. This is the message passed by the ancient Japanese sensibility for all things beautiful: according to the antique art of Kintsugi, the objects that break are meticulously recomposed, covering the fractures with a shimmering wire of golden powder.

**53002#708**  
Basin mixer without waste

**53004#708**  
High version basin mixer,  
without waste

# Fresh, different and beautiful

Breaks in objects, as those that occur in life, shall be treasured with a shining mark, as they result in the true essence of a story. This is why a disruption can generate an even more powerful form of beauty: what breaks, becomes more precious, as it is unique. This is very true for Rettangolo K. The design concept of the Line consists in cutting the celebrated solid body of the Rettangolo faucet with a transverse line that fractures it, subverting its iconic silhouette and creating an inedited angle. A new light redesigns the illustrious silhouette of Rettangolo and the result is amazing: while the object retains the accomplished harmony of the original figure, it is fresh, different, and absolutely beautiful.

“Where do new ideas come from? The answer is simple: differences. Creativity comes from unlikely juxtapositions”

# RETTANGOLO K

# GESI 316

## Woven Steel

Gessi's Creativity and style infuse a total new perceptibility into steel itself, giving a material which is usually "technical" and cold, an unprecedented heat, and a special furnishing capacity. Gessi has indeed enriched the body of the faucet with aesthetic and decorative details, such as textures and patterns with different tastes; the steel seems thus "dressed" by the texture. Handles and distinguishable reed valves, finishes of contemporary charm, and an innovative modular sink system complete the possibilities for customization.

TRAME

# Functional pieces of art

Inspired by high-end jewelry and its standards of excellence, Trame is formed from an extraordinary spiral drawing design. Trame is an object of refined furnishing, the perfect synthesis of timelessness, and contemporary design.

CESELLO  
**Striking style**

The metallic glows that are produced on a refined and discreet punched texture, give surprising light notes to the elements of the Cesello line. The line exudes sophistication with an industrial but glamorous style, able to be decorated with special charm and light up any type of environment.

# RILIEVO

The frenetic rhythm of work and daily life has compressed the natural dimension of the living space and time dedicated to oneself. As a result, people increasingly request quality from the furnishings of their habitat, as the place where to live gratifying private moments and healing emotions.

GESSI has therefore engaged in creating a bathroom furnishings collection that conveys purity and wellbeing as well as organizing the domestic scenery in an orderly and harmonious way. With the aim to attain a design beneficial to the body and mind. Gessi conceived a collection inspired by the neatness, clarity and harmony people demand from a private space of wellness.

# A concept of tidiness and harmony

If harmony, based on order, is dictated by a mathematical / geometric ratio between parts, the maximum expression of purity of form is probably the enrolment of a circle into a square. This geometric and architectural figure has been greatly evocative through time and across continents and cultures. The circle evokes eternal movement; the square symbolizes eternity and immutability. The coupling of these two geometries becomes the dynamic image of purity: the transition towards perfection and equilibrium. A circle inscribed into a square is the theme that RILIEVO brilliantly brings to life. This design gives gracing touch and sight and it evokes that body and soul equilibrium take center-stage in the bathroom. A new balance between style, emotion and functionality.

**59100#031**  
Wall-mounted spout

**26612\_59106#031**  
Built-in mixer

The embossed round relief under the handle, besides representing an absolute aesthetic innovation, stands as both an ergonomic and sensory element of great tactile pleasantness.

RILIEVO has been conceived to be simple to install, use, and maintain. These finely designed features have been devised expressly for the world of hospitality. The ultra-slim contour of the handle, with its progressive thinness, gives the product a slender and minimalistic look and adds to the ergonomics of its use.

# RETTANGOLO

## THE ORIGINAL DESIGN THAT HAS BECOME AN ICON

"Where do I want the water to fall? From the floor, the ground, the wall, the ceiling?"  
This is the revolutionary question posed by Gessi circa 2000, at a time when all taps were mere support valves at the bottom of the washbasin.  
To bring to life this unprecedented aspiration- moving the flow of water to wherever we desired- Gessi thought up a radical design based on the purity of an absolute, strong and rigorous form: abstraction in its essence, like parallel lines traced on a designer's sketchbook, in any form.

# The sign

Rettangolo was born from an expression of creative freedom, from the original and ironic exploration of iconic symbols, in simple yet evocative forms. The rectangle is a surprising and unusual geometric shape for taps, a perfect demonstration of how design, with its ability to infuse art and liveability in consumer and everyday products, can enrich the spaces in which we live, transforming simple, everyday actions and places into something special.

**26599#708**  
Ceiling spout / Bocca da soffitto

With Rettangolo, Gessi has breathed new life into living concepts with the widest range of products, styles, models and installation variants imaginable- their diversity ensuring unlimited freedom in water-based design.

With a multitude of models and lines, including the Rettangolo T, the expansive Rettangolo Collection has crafted new standards in home personalisation, embodying personal taste and lifestyle.

# RETTANGOLO T

# Understandable, essential beauty

The rectangle is an archetype speaking an ancestral language; a sign with the unexpected, shocking power of simplicity; a spontaneity that communicates truth, clarity, harmony. It cuts straight to the point, it is essential beauty.

**27037#030**  
Four hole bath mixer / Gruppo bordo vasca quattro fori

# Ground-Breaking Design

A structure that is not merely provocative: Rettangolo represents research. It captures and anticipates a need affirmed in the architecture of homes, a new geometricity in furnishing. Going far beyond the novelty of minimalism, Rettangolo is truly avant garde, forever altering the architectural landscape of the bathroom.

**48189\_24961#707**  
Freestanding bath mixer

**26691#707**  
Bath waterfall spout

**26648#707**  
Wall-mounted showerhead

No longer simple accessories or valves, but decorative objects with a strong sense of personality, Rettangolo taps become a means to emphasise architecture. They structure a re-design of the bathroom as not merely a place of service, but a space for living and display, invention and personalisation.

A personal and private environment where you can live fulfilling experiences, moments in which to celebrate the pleasure and well-being produced when surrounded by beautiful things. Rettangolo is the inherent essence of Gessi, the essence of Private Wellness.

the breath  
of art”

Frank Lloyd Wright

# Through to the last detail

Rettangolo develops a language of its own in its design, distinguishing it and strongly characterising the Collection in the essence of minimalist, yet highly empathetic lines. The extreme attention to the thoroughness of detail, the perfect harmony of the lines and proportions and the resulting formal cleanliness are the characteristic features making the original Rettangolo by Gessi unmistakable and inimitable.

# The visionary soul of Gessi

Gessi created Rettangolo, and the Rettangolo design has shaped Gessi's most authentic soul: its vision, daring, and unconventional, creative, revolutionary language. This story telling began with Rettangolo, making Gessi unmistakable in the world of design. In writing a page of design history, Rettangolo by Gessi incites a story of great, uninterrupted success.

THE BRILLIANT BEAUTY OF WATER

# Goccia. Water goes into the living room

Goccia is the first tap for a living room. This new collection incorporates the idea of a totally new product with enhanced functional and aesthetic content. It opens the way for unlimited and brilliant interior settings. For the first time, the outstanding design of Goccia brings a spout into the living room with a sleek and spectacular effect. Water can even spring directly from the dining table, as the Goccia tap and washbasin can become part of the table itself.

Goccia is not a mere complement, it's the very distinguishing feature of the design of an interior. It's an original concept that induces new gestures, new interactions with water, living space and the person. Goccia makes the beauty and usefulness of water available wherever it is needed or desired, with charming and fresh solutions.

**39135#519**  
Counter wash basin

Goccia demonstrates how creativity and innovation, together with a content of poetry and respect for the world can turn dreams into objects. This is all Gessi's accomplishment, a company different by nature.

Goccia stands as an unprecedented product concept which elevates matter, form and function. In fact the collection comprises a unique range of furnishing items, encompassing an impressive mix of models, materials and finishes.

The winding forms of the liquid are set in the solid form of washbasins and accessories, in the metal of the taps, in the ceramic of the sanitary ware. All of the Goccia items feature a natural elegance, that makes them fit gracefully in both private and public interiors.

The soft and familiar contours of Goccia are lovely to be seen and touched; they make one's living space personal and cozy, modern yet relaxing.

**35299 #031**  
Ceiling-mounted spout

Goccia is a clever beauty. Not only is Goccia a style and a product philosophy, it's also an eco friendly creation. All of the Goccia taps are equipped with a technology allowing for a 50% saving of water without compromising the functionality of the tap itself. Goccia is indeed the epitome of a more intimate feeling for luxury, one attentive to the elegance and glamour of the objects as well as to their impact on the environment.

# OVALE

The pure shape of contemporary harmony

**26801#299**  
Basin mixer, without waste

The Ovale collection by Gessi is a stylish bathroom range designed for Gessi by Prospero Rasulo.

Breaking once again the “rules” set by tradition and common sense, Gessi introduces an unprecedented oval section for the tap body and the coordinated accessories. In fact each piece of the vast collection has been styled in the form of an elegant oval suggesting a beautifully sculpted appearance and sense of softness and delicate harmony.

# FASCINO

IN THE BATHROOM BECOMES WELLNESS

The elegant objects, furnishings and designs with which we surround ourselves say something about us, and embody the essential need for beauty and style that we express throughout our daily lives. Gessi has embraced this aspiration by creating Fascino, a refined total look collection for the bathroom inspired by the pursuit of a tangible design to shape the intangible concept of elegance. This resulted in a comprehensive range of furnishings that convey the concept of elegance in all of its forms. The Collection underpins the idea that elegance should shape a unique, enduring and tangible habitat that can be privately enjoyed on a daily basis.

**48001#031**  
Basin mixer with waste

**48004#080**  
High version basin mixer with waste

Exquisite furnishings, design objects and atmospheres, define the universe of elegance as embodied by bathroom environments that are capable of arousing dreams and desires. In these surroundings everyone can imagine their ideal lifestyle as the fulfilment of a personal concept of style. Just like with the selection of one's attire, the desired allure can be realized via the masterful selection of furnishings and accessories. The living space can in fact be modified beyond dreams by using a multitude of highly versatile elements. These create a world of beauty where an individual can express his/her refined taste.

**48089\_48090#031**  
Built-in three-hole basin mixer with spout, without waste

**48413#031**  
Wall-mounted soap dispenser

If refinement lies in attention to detail, the distinguished details of the Fascino Collection evoke the high quality artistry of its designers and manufacturers.

The Collection's combination of high-quality design aspects are capable of elevating any bathroom environment, thus resulting in a stylish and charming atmosphere. The craftsmanship, design and innovative production processes, some of which are reminiscent of ancient foundry techniques, allow the realization of unique design elements of exceptional beauty.

**32973#031**  
Lateral body-jets

As the poetry of essentialism, elegance embodies a form of beauty that is inextricably bound to the spirit of life, and that never fades. Where beauty is not an empty façade devoid of content, but it is rather realized with care and in good taste, design goes beyond fashion and ultimately it becomes art.

Our times leave too much space for vulgarity, exaggeration, exteriority and sensationalism, which often conceal the absence of any true substance. Rather than naturalness, spontaneity, subdued refinement, modesty and understated sophistication, distinction is now pursued through excess and exhibitionism. The modern era, in fact, is in dire need of candour, harmony, simplicity, elegance.

Far from a retro style, the true charm of the Fascino Collection lies in the attention to detail and the perfect harmony of its contours, which exude Italian style and class, all with a contemporary and minimalist feel. As the embodiment of a timeless aesthetic, the Fascino collection expresses all the beauty, purity and elegance of an interior décor style that's perfectly suited to any environment.

# ((( SENSOR TAPS

Inciso by David Rockwell, Rilievo by HBA, the gleaming steel of Gessi 316, all the latest, multi-award winner creations of Gessi come available in an electronic hi-tech technology. The sophisticated minimalism of the design by Gessi acquires an advanced technology that combines the beauty of the lines with the functionality of "no touch" electronics. The water supply doesn't need to be handled or touched as it can be switched on by a move as simple as the passage of the hand before the sensor.

Gessi electronic taps are in the vanguard and come available with different technological solutions. The sensor can be incorporated into the tap body or into the very spout, otherwise it can fit into a proper remote plate. In the first two cases the water flow is automatically switched on or off by bringing the hands towards the spout. In the case of the remote detector, the flow is activated or turned off simply by the hand crossing over the detector: it's almost like a magic move.

The technology of the electronic taps by Gessi not only makes life easier but it's also environmental friendly. Thanks to the automatic activation of the flow, water is delivered only for the time it is actually needed. Without any waste.

# Pure beauty

Thanks to its no touch system, the beauty of shapes is pure and free from prints, guarantying the hygiene and avoiding tap's damages.

Gessi electronic taps first provide the refined elegance of most sophisticated design to public settings, where electronic devices have usually simply aesthetics. What is more they are available in many finishings, giving the possibility to choose different nounce for the first time in this field. Of course, this beautiful taps are suitable also for private space.

# RILIEVO

The electronic detector can be connected to the normal electricity network or to a lithium battery, ensuring in both cases a minimum water consumption. The electronic technology fits in a graceful way to the tap, preserving the perfect shapes of its studied design, or even better enhancing its essential and simple beauty.

230 VIA  
ALESSANDRO MANZONI  
1785 - 1873

# VIA MANZONI

Emporio Gessi combines formal research and functionality with optimization of production processes and eco-friendly technical solutions. Each Emporio Gessi collection offers a various solutions for bathroom ranging from different types of washbasin mixers that can be wall or deck mounted to traditional or thermostatic bath and shower mixers. Emporio Collection offers also a wonderful selection of accessories.

# Emporio Gessi Milano, the perfect balance between beauty and functionality

Via Manzoni proposes an eco-friendly technology, "Design for Nature" as an added value: the faucet of the Collection is indeed provided with a mixer able to considerably reduce the consumption. When the lever of the mixer is positioned in the center, the tap dispenses only cold water, avoiding an automatic activation of the boiler and consequently of the power consumption, often totally not needed. If the user needs mixed water or hot water, he will keep turning the mixer, until he reaches the desired temperature.

Gessi stands out as the most advanced expression of modern design with Emporio Gessi collection where shape and functionality are based on water: a contemporary look that puts together elegance, comfort, technology and care for our environment.

# VIA TORTONA

Designed by Gessi Interior Design Studio in order to satisfy the needs of style in different environments and realized in the leading technology and eco-friendliness plants of Parco Gessi, every Emporio collection is sophisticated and modern. Emporio Gessi Design focuses on lightness and slender shapes, projected into space. This concept comes from the cohesion between minimalism and grace, essential accuracy and contemporary design. It combines, in an original way, soft and strict shapes, arches and gently squared profiles: different solutions of balance between essential lines and well-proportioned curves.

**18602#1299**  
Basin mixer, without spout

Gessi Emporio Via Tortona is also available in matt black finishing. Black has more depth and versatility than people usually think. Gessi Emporio collections available in a bold and chic matt black finishing, can be installed in different bathroom settings with assorted results. It can create an environment totally dark with a dramatic effect, or simply an inventive feature. It can also create an environment really intense and airy: Via Tortona in matt black finishing results as a timeless and modern design at the same time.

## Sophisticated modernity
