HERITAGE

When the seven Jacuzzi brothers immigrated to the United States, they had no idea that a pump they designed for orchards would revolutionize hydrotherapy in the home. While the family's critical need to change the life of a child triggered this therapeutic invention, a desire for wellness founded an industry.

Hydrotherapy

(The therapeutic use of water)

Jacuzzi® bathtubs are ergonomically designed to maximize the benefits of hydrotherapy, allowing people of all body types to fully immerse in warm water.

Benefits of a Full-Body Soak:

1. Relieves the weight of gravity on joints
2. Provides 360-degree support for sore and tired limbs
3. Decreases swelling and inflammation
4. Increases circulation and oxygen in blood cells

Why soaking makes you feel better

- Up to 104°F - Hot water**
Relaxing, promotes sleep by inducing drowsiness
- 93°F - 100°F - Water at body temperature**
Reduces tension, adding Epsom salt facilitates sweating to cleanse the skin and help eliminate lactic acid
- 81°F - 92°F - Lukewarm water**
Helps eliminate water retention
- 65°F - 81°F - Cool water**
Alleviates fatigue
- Below 65°F - Cold water**
Aids muscle recovery from physical exertion

Pure Air® Bath adds soothing bubbles to your soak

Thermal Lumbar Comfort™ (TLC) air injectors target relief to the lower lumbar area, a common trouble spot. TLC is a unique part of the Pure Air® bath experience.

Hydromassage

(Moving water for the optimal massage)

What makes Jacuzzi® hydromassage effective

Gentle pressure on muscle tissue increases circulation. This stimulates blood flow, which can help muscles and joints recover from fatigue or injury, and makes it easier to move.

The exclusive, patented TargetPro™ jetting offers adjustable jet stream direction and intensity for a personalized massage experience.

THE JACUZZI® BRAND HISTORY

**EARLY
1900s**

The seven Jacuzzi brothers emigrated from Italy to California. Hard-working inventors, they broke new ground in aviation and agricultural hydraulics.

1956

Brother Candido Jacuzzi developed the J-300 pump to provide pain-relieving hydrotherapy to his son, who suffered from arthritis.

1968

Third-generation Roy Jacuzzi designed the jetted bath, which was the first to incorporate jets into a bathtub, leading to family-sized bathtubs and eventually, the modern hot tub era.

2000

Jacuzzi® Brand bathtubs and hot tubs were sold in more than 75 countries, and new advancements emerged, including pump systems and jet technology.

2017

Launch of CleanLine® anti-microbial piping on all jetted products as well as Whisper+ Technology® for the quietest bath in the industry.

2019

Jacuzzi Luxury Bath expands offering into other bathroom categories, including fillers, faucets, sinks and medicine cabinets.

TODAY

Jacuzzi Luxury Bath introduces the Arga™ Collection, the first freestanding bathtubs that deliver the Swirlpool™ Experience and Epsom Salt delivery in the U.S.
