

CUSTOM DESIGN

Do you have a playground that you are looking to design? Do you want to spice up your business with your own custom-made logo on the ground with high-quality detail and color? On the other hand, do you simply want some lettering or way finders done for your parking lot/store? Surface Signs can make all of these ideas possible. With our custom option, you can work with our in-house designers to replicate just about any graphic you could imagine. We aim to be the best at replicating logos and design. We are able to reproduce exact

replicas of existing signage or offer a redesign service through our own art department. Any corporate logos will be manufactured in our own factory from the highest-grade materials and installed by our own installers. Thus, we are able to ensure our quality control systems adhered to. Multi-national companies have appreciated the benefits of having customized car park markings and surface signage to distinguish its image. Our lineage is preformed to an exact width and is placed in

position before fixing so that exact specification can be achieved. So do you use this opportunity to impress your customers with your own personal corporate image or do you miss the opportunity? We have only just begun the utilization of surfaces for advertising.

We look forward to servicing your signage needs.
