

# SURFACE SIGNS

Surface Signs are the experts when it comes to Thermoplastic. Preformed Thermoplastic is a tried and tested way of putting graphics on the ground - and its competition doesn't even compare. While most paint products will wash away, lose color, and get dull, our product will last 6-8 times longer without losing color or detail. Whether you are a landscape architect, playground designer or just a small business looking to spice up your open space, Surface Signs is the choice to make! As you can see, we have worked with numerous planners and designers in order to fit their needs and budgets; whether it be custom designs, or custom sizes of our catalogue's choices- our in-house designers are available to help you

along every step of the way! Surface Sign's standard designs can be made to fit your specific space and we have over 20 colors to choose from. Surface Sign's graphics cover everything you would need for coloring and enhancing your outdoor spaces. Our products provide a safer, exciting, cost-effective, educationally and physically stimulating nature based play area- a great way to enhance environmental awareness and education. Surface Sign's available designs include classic playground games (hopscotch, mazes, sports courts), educational graphics and games, tips on healthy eating, and even road safety; we have everything you need to transform your concrete and asphalt areas into inspiring, fun, and educational areas for all. Be it a poem on a bike path, a way finder for guidance, or a business logo. Treat your open space like a blank canvas and watch Surface Signs bring it to life!
