'Sipper' Submersible Pump

The 'Sipper' is designed for draining clean water at levels below what conventional pump floats handle, such as surface water in basements. It automatically activates when the water level rises to 40mm– draining to approximately 5mm.

Features

- Automatic activation based on water level, activating at 40mm. At 30mm, a timer ensures the pump does not over-run.
- Top discharge
- Base accessory available to stabilise pump on uneven surfaces
- One-Year Warranty

Power	230 volt 'phase 1' AC motor
Motor	100w, 1/6 HP.
Maximum Particle Size	3mm
Maximum Head	6m
Power Lead Length:	3 meters, with 3-pin plug
Maximum Liquid Temperature	40 degrees Celsius
Outlet Size	25mm-20mm connector tail
Item Number:	PC-160
