50 L/m @ 10.5m

Shutoff: 13.2m

TPG-100 Sewerage Grinder Pump

Performance Tests

Wet Wipes

Absorbent Cleaning Cloth

The TPG-100 is a 1HP grinder pump which moves 200L per minute at a four meter head, and 50L per minute at a 10.2 meter head. **Do not flush wet wipes or cleaning towels into your pump station** as it will reduce the life of the pump and void the warranty– the above images are a demonstration of the pump's abilities. TPG-100 pumps can be specified with many of our sewerage pump stations– visit our website for more information.
