

CHESAPEAKE NATURAL SOLUTIONS

NATURAL SOLUTIONS

Responsible choices for people, pets & the environment.

A practical guide to how thoughtful property management can support people, landscapes, water resources, and long-term site health.

ASSESS

IMPROVE

PROTECT

MAINTAIN

Natural Solutions is our commitment to looking at the whole property before choosing a treatment. We emphasize prevention, plant and soil health, targeted applications, and lower-impact or naturally derived options when they are appropriate for the problem and approved for the intended use.

Natural does not mean doing nothing. It means choosing thoughtful, targeted solutions that support the property while minimizing unnecessary impact.

What This Approach Means

- Identify the actual cause of the problem before recommending treatment.
- Use cultural, mechanical, biological, naturally derived, or other targeted methods where they fit the site objective.
- Avoid unnecessary blanket applications when a focused treatment can address the problem.
- Consider people, pets, pollinators, desirable plants, soil, nearby water, drainage, and wildlife when planning work.
- Follow product labels, application requirements, weather restrictions, and applicable regulations.

People & Pet Conscious Property Care

- Plan applications around how residents, employees, children, and pets use the property.
- Communicate any required re-entry times or temporary access restrictions.
- Reduce standing water, overwatering, plant stress, and other conditions that can contribute to pest problems.
- Use the minimum effective intervention appropriate for the target and site.

Where Natural Solutions Can Fit

- Lawns, trees, shrubs, gardens, and landscaped areas.
- Mosquito, tick, flea, and nuisance-pest management using appropriate registered products and integrated practices.
- Ponds, shorelines, drainage areas, and stormwater properties.
- HOAs, commercial campuses, municipal sites, residential properties, and managed open space.

A More Complete Definition of 'Safe'

- No treatment should be described as completely risk-free. Even naturally derived materials must be used correctly.
- Safety depends on the product, concentration, target, application method, weather, site conditions, and label directions.
- Our goal is environmentally responsible property care with clear recommendations and responsible application practices.

What Chesapeake Natural Solutions Clients Can Expect

- A site-specific discussion of goals, concerns, and sensitive areas.
- Recommendations based on observed conditions rather than a one-size-fits-all program.
- Clear explanations of treatment purpose, timing, follow-up, and maintenance needs.
- Responsible attention to labels, application requirements, weather, water, people, pets, and applicable regulations.

Important Information

This educational guide describes Chesapeake Natural Solutions' service philosophy. Specific products, claims, treatment methods, application intervals, certifications, permits, and availability depend on the property, target condition, product label, and applicable federal, state, and local requirements. An on-site assessment may be required before a final scope is prepared.
