

Vertical 1: Agri-Commodities Aggregator

Farm-to-consumer flow via strategic connections.

MLDC Agro supply agricultural produce primarily Wheat, Maize, Paddy, Mustard etc to manufacturing companies to fulfill their raw material needs Pan India

Vertical 2: Warehousing Services

MLDC Agro provides essential warehousing facilities, enabling farmers and small businesses to store crops like maize, wheat, paddy, and mustard after harvest. This service allows them to avoid distress sales and capitalize on contango markets, where future prices are higher than current spot prices.

Harvest Storage

Secure, climate-controlled facilities designed for optimal preservation of diverse agricultural produce.

Market Analysis

Leveraging real-time data and expert insights to forecast price trends and demand shifts.

Strategic Timing

Releasing stored stock at optimal market windows to achieve the best possible prices for farmers and traders.

Premium Sales

Maximizing farmer profitability by securing significantly higher returns on their stored produce.

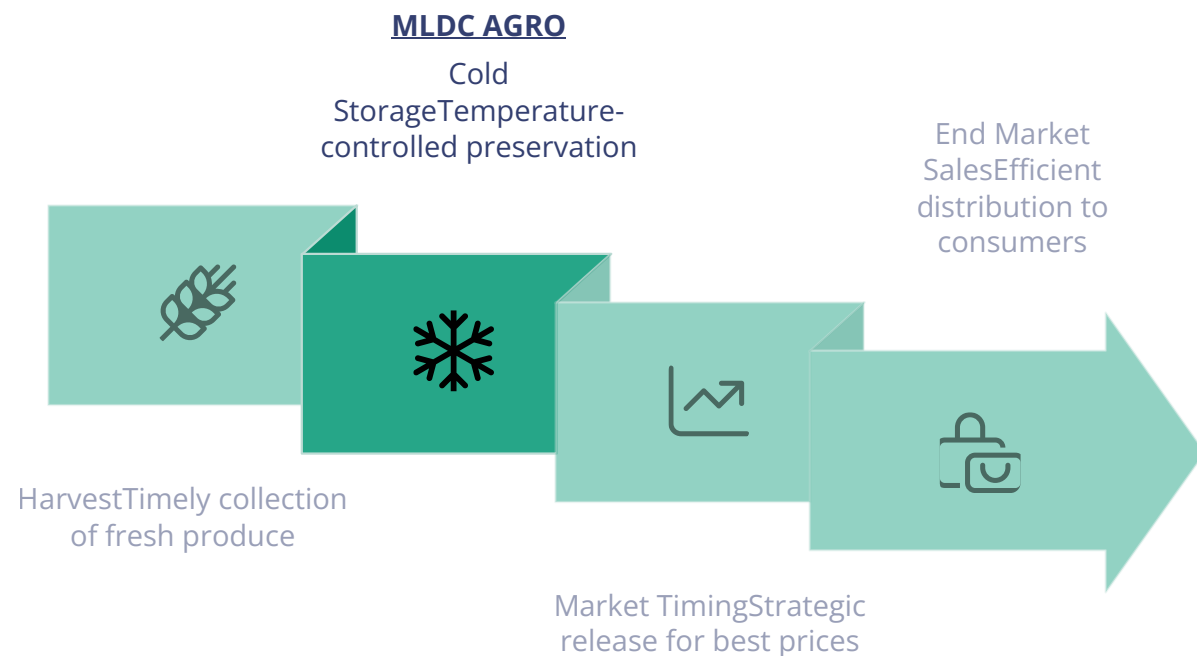

By strategically timing their sales, farmers and small businesses can achieve significantly higher prices, boosting their income and ensuring greater financial stability. This minimizes post-harvest losses and empowers producers to gain control over their market participation rather than being forced into distress sales.
