## Pneumatic Spray Guns

by Brian S. Elliott

There are a variety of chemical and paint-spraying applications for compressed air. The illustrations below show just a few of the more common pneumatic spray guns used throughout the industry. Pressure feed guns (far right) are generally the preferred choice for applying industrial coatings. Gravity feed guns (left) are the preferred guns for fine finishes, such as automotive.

Other types of spray guns, including siphon guns and an aerosol gun, are shown in the core of the grouping.
