PROJECT

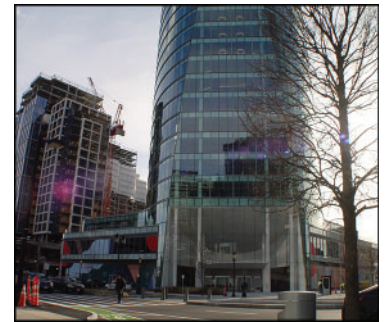

Seaport Landing
121 Seaport Boulevard
Boston, MA

ARCHITECT

CBT Architects
110 Canal Street
Boston, MA

DETAILS

K-13 Light Gray
40,000 Square Feet
4.25" Thickness

Over and over again, the Seaport District architects and builders choose K-13 for the thermal insulation in the below grade parking. No foam, sprayed fiberglass or drop ceilings with batts. It's always K-13. With a Class "A" fire rating and a smoke development of 5, more and more architects are selecting this safe, non-combustible material for these delicate areas. With the high build application supporting R-Values up to 30, K-13 ensures the floors above are warm and comfortable, K-13 is the safe and economical option. For more information regarding K-13 call 508-678-1118 or visit our web site @ www.atiincorporated.com.
