# PROJECT PROFILE

## CVS Enterprise Digital

### PROJECT

CVS Enterprise Digital  
1700 Highland Corp Drive  
Cumberland, RI

### ARCHITECT

Symmes Maini & McKee  
1000 Massachusetts Ave  
Cambridge, MA

### DETAILS

K-13 & SonaSpray "fc" White  
32,700 Square Feet  
1" Thickness

Big space, big problems. Symmes Maini & McKee, in conjunction with CVS, utilized both K-13 and SonaSpray "fc" to control reverberation in this new two story digital office fit-out. High areas received 1" of K-13, with the low ceilings being treated with SonaSpray "fc" at 1" for higher aesthetics. Both treatments supplied a noise reduction coefficient of .90 and fit perfectly with the open industrial architectural design. For more information regarding K-13 or SonaSpray "fc" call 508-678-1118 or visit our web site @ [www.atiincorporated.com](http://www.atiincorporated.com).
