

PROJECT

Cliftex
194 Riverside Avenue
New Bedford, MA

OWNER

New Bedford Housing
134 South 2nd Street
New Bedford, MA

DETAILS

Ure-K Light Grey
11,000 Square Feet
1.25" Thickness

It may not be as high profile as our application at Carnegie Hall, but it's just as important. Ure-K Light Grey applied at 1.25" provides a true 15 minute thermal barrier as required by law. Approved by FM and U.L, Ure-K is one of the few spray-on materials actually tested and approved over thick foam applications. Ure-K has been utilized for over 40 years providing true 15 minute ignition delays for various urethanes, soy based and foam rigid boards. For more information regarding Ure-K call 508-678-1118 or visit our web site @ www.atiincorporated.com.
