

# PROJECT PROFILE

## Mohegan Sun Casino & Resort

### PROJECT

Mohegan Sun Casino  
Sandy Desert Road  
Uncasville Ct.

### ARCHITECT

Brennan, Beer, Gorman  
515 Madison Avenue  
New York, NY. 10022

### DETAILS

K-13 Black  
100,000 Square Feet  
.75" Thickness

The open floor plan and high ceiling design at the New Mohegan Casino and Resort in Uncasville Connecticut required an acoustical treatment that would lower the reverberation time while enhancing the ethnic decor of this beautiful 100,000 square foot facility. K-13 Black was chosen for its multiply performance characteristics. K-13 Black was applied to an average thickness of .75" to achieve a Noise Reduction Coefficient of .65. The specification of K-13 provided an economical and speedy application along with the desired "Black Out Effect", and the ability to conformed to the variety of ceiling substrates. For more information regarding K-13 call 508-678-1118 or visit our web site @ [www.atiincorporated.com](http://www.atiincorporated.com).
