There is not a restaurant owner around that does not realize the acoustical performance of their dining space is paramount. The hard fact that you often only get one chance to impress and make the customers feel comfortable is a harsh reality. The white K-13 in this application is providing high performance reverberation control while conforming to the open ceiling concept the architect was looking for. For more information regarding K-13 call 508-678-1118 or visit our web site @ www.atiincorporated.com.
