

PROJECT PROFILE

Rhode Island School for the Deaf

PROJECT

RI School for the Deaf
One Corliss Park
Providence, RI

ARCHITECT

Bacon Construction Co.
241 Narragansett Pk Dr
E. Providence, RI

DETAILS

K-13 Light Grey
14,000 Square Feet
2" Thickness

This beautiful application of K-13 was applied over form in place tiles that not only offer nothing in the way of acoustical performance, but left a lot to be desired aesthetically. Applied at a 2" thickness, the K-13 is providing an echo free environment for the students and faculty while enhancing the thermal performance of the roof assembly by 10. Additional cellulose materials were also utilized in fiberglass domes within the hallways to eliminate reverberation problems. For more information regarding K-13 call 508-678-1118 or visit our web site @ www.atiincorporated.com.
