DETAILS

K-13 Beige
15,000 Square Feet
2.76" Thickness

How do you provide acoustical enhancement along with thermal performance in a saddleback structure? This 2.76" application of K-13 not only fit the bill, but also looks fantastic. The application, which was retrofitted into the space, concealed the maze of conduit and miscellaneous ceiling mounted wiring for what appears to be a seamless transition. As a finishing touch, the material was tamped to ensure long term aesthetics. For more information regarding K-13 call 508-678-1118 or visit our web site @ www.atiincorporated.com.
