On a difficulty scale, the Wianno Club in Osterville Massachusetts was a 10. Recessed lights, sprinkler heads, HVAC grills, smoke detectors, speaker covers and a complete ceiling cut into pie pieces provided all the challenges needed for the 4 man crew that finished the work in just under 10 days. If completed during the original construction, applications such as this can be done for 50% less cost. Unfortunately, acoustical applications are value engineered out of many projects as the end nears, and budgets run low.
