

PROJECT PROFILE

Hook & Line

PROJECT

Hook & Line
10 Fan Pier
Boston, MA

ARCHITECT

Ruhl | Jahnes
281 Mt. Auburn Street
Watertown, MA

DETAILS

K-13 Gray
2,400 Square Feet
1" Thickness

For over 30 years, Cafco Construction has relied on K-13 in various colors to provide essential noise reduction, ensuring a comfortable and enjoyable dining experience. In this latest project, K-13 Black was applied at a 1" thickness directly to the fluted metal deck, achieving an impressive NRC rating of 0.90. The seamless integration of the black finish, along with the matching painted HVAC and mechanical systems, creates a stunning blackout effect while enhancing acoustical performance. For more information about K-13 and how it can elevate your space, please call us at 508-678-1118 or visit atiincorporated.com.
