

## Before the Doctor can recommend Smokable Cannabis (whole flower)

You will need to try **two different routes** from the dispensary, one of which should be vape.

Routes available are:

- Edibles
- Inhalation
- Oral
- Sublingual
- Suppositories
- Topical

If the recommended routes do not help you with your condition, you will need to:

Email [MMDRPlantCity@outlook.com](mailto:MMDRPlantCity@outlook.com) with the following information

- Your first and last name
- The date you were seen
- What routes you tried and the specific product
- Please specify why the routes you tried did not work for you
- Specify your request for smokable flower

**\*\*** It is at the doctor's discretion whether he wants to recommend smokable cannabis after you provide this information. Please allow him up to a week to respond and change your orders.

Thank you.
