

To All: Saddle Ridge Residents

The Federal Lead and Copper Rule Revisions (LCRR) that went into effect in December of 2021, require public water systems to send a service and premise line material inventory to the Department of Natural Resources (DNR). A service line is the line (pipe) that brings water into a home or building, and premise lines are the lines (pipes) running throughout the home or building to the sinks, toilets etc.

We must supply to the DNR an inventory of what type of material the lines are made of. Examples being lead, copper, plastic, or galvanized pipe. This information is needed for the pipe coming into the home as well as the pipes then carry water throughout the home.

This information can be supplied by the homeowner or renter if they can recognize the distinct types of pipes listed in the example above. Please send all information along with your name and address to Fritz Meierdirk. Email Fritz at fcm2355@gmail.com or call him at 608-697-0653 with the information.

If the homeowner or renter has any questions or would like the information to be collected for them, please call one of the Saddle Ridge Water & Sewer Committee members listed below to set up a time when one of us can come to your home.

The DNR requests this information be returned to them no later than April 1st, 2023. So please help us to complete this task as soon as possible.

Dennis Allen	608-444-1374	SRA
Jerry Hutzler	608-692-1793	SLVA
Tom Joswiak	715-271-3909	SREA
Steve Letourneaux	920-378-1957	Forest
Fritz Meierdirk	608-697-0653	SRA
Winnie Schumann	608-335-3465	SREA

The Saddle Ridge Water & Sewer Committee thanks you in advance for your assistance.
