

DENISE I. GRIFFITHS CPAM SCHOLARSHIP GUIDELINES — 2026

High School Seniors

Established in 1983, the Presidential Awards for Excellence in Mathematics and Science Teaching annually recognize outstanding classroom teachers for their achievements in the profession. The Council of Presidential Awardees in Mathematics, Inc. (CPAM) has established a scholarship program for high school seniors and college students who have demonstrated outstanding achievement in mathematics and who intend to pursue a course of study to prepare to teach mathematics at the elementary, middle, or secondary school level. By establishing this scholarship program, CPAM demonstrates its commitment to nurturing the next generation of excellent mathematics teachers.

Procedures and Criteria

Each scholarship for high school seniors will grant the recipient \$2000 for the first year of undergraduate study. The scholarship may be renewed for each of three succeeding years for a total of \$8000 providing the recipient maintains a good academic record and continues to pursue a full-time program which leads to teacher certification with specialization in mathematics.

Applicants for the scholarship must be nominated by a Presidential Awardee who is a CPAM member. The nominee must be a student or former student of the Awardee, a student with whom the Awardee has worked closely in an extracurricular capacity, or any member of the Awardee's family including children, grandchildren, stepchildren, nieces, and nephews. Each year an Awardee may nominate one student.

Each nominee will be required to submit the following to the CPAM Scholarship Selection Committee:

- A high school transcript through the first semester of the senior year
- High school profile
- Scores on the SAT or ACT **If you have not taken the SAT or ACT**, submit a **ONE-page double-spaced** essay explaining what your favorite mathematics topic or your favorite mathematics course is and why.
- **Three ONE-page** letters of recommendation: one from the nominating Presidential Awardee, one from another mathematics teacher who has had you in class, and one from a guidance counselor or school administrator.
- Personal essay and financial need
 1. Submit a **double-spaced (maximum of two pages)** essay addressing one or more of the following topics:
 - a. Explain why you want to be a mathematics teacher.
 - b. Describe any special talent, ability, or skill you possess which will help you become an effective teacher.
 - c. Describe how one of your teachers has influenced your career goals.
 2. Submit a paragraph explaining your need for financial aid. **Include projected expenses and how you expect to meet them.**

The selection of the scholarship recipient will be based on the following criteria:

- Academic promise as indicated by the high school record, SAT or ACT test scores if available or the special essay if SAT or ACT test scores are not available, activities, and awards
- Potential for excellence in mathematics teaching and commitment to the profession as indicated by letters of recommendation and personal essays
- Financial need

Applications should be sent by **US PRIORITY MAIL** and must be postmarked by **MARCH 1, 2026**. All applicants will be informed of the name of the scholarship recipient by May 1, 2026. A copy of the high school scholarship application/guidelines is available at CPAM's website, **cpam.org**.
