Cameron R. Maitz, B.S.

Professional Profile

Cameron Maitz specializes in the analysis and investigation of automotive systems. His proficiencies include the following areas:

- Internal combustion engine diagnostics, performance, and development
- Vehicle dynamics and work-energy relationships
- Creation of CAD drawings, parts, and simulations in 2D and 3D
- Impact analysis and crash simulation
- Electronic vehicle data retrieval and analysis
- Accident vehicle damage evaluation and measurement

Prior to joining Momentum PMV, Mr. Maitz worked for Bridgestone Corporation where he was a full-time automotive mechanic. He performed extensive repairs including, but not limited to: internal engine components; transmission diagnostics; and differential rebuilds. Additionally, he specialized in brake system technologies. Following his time as a mechanic, he attended Georgia Southern University where he researched the design, application, and analysis of impact barriers for passenger vehicles.

Credentials and Professional Honors

B.S., Mechanical Engineering, Georgia Southern University, 2020

Member, Society of Automotive Engineers (SAE)

Member, American Society of Mechanical Engineers (ASME)
