

To Whom it may concern:

I've been using TRC products for over 5 years , through this time I have never seen a better product especially the 880 C&C grease that is used in all of our emergency vehicles it is a grease that sticks and will not dissolve with water and lasts . We also have been using their flexi film instead of fluid film it is not just better priced but works just as well if not better and the cost is almost half. We use some other products but these we bought in large amounts so I can verify that they are great products, When they have new products out or something we have not tried they are always willing to give us a sample to try and we usually find the product is excellent. If you have any questions you can give me a call .
