

Hi, Tom

Just wanted to take time to let you know that we are very pleased with your products that you supply to us. We have yet to find another product that can outperform yours. We use a lot of the 880 Crown & Chassis Grease for different applications in our shop & in the field. We have had no problems & we do, all the time, recommend all products that are provided to us from Texas Refinery. We find all their products exceptional in quality & we promote this product to other customers as we talk with them & they ask questions in regard to the quality etc.

Pls. note if you need additional information pls. do not hesitate to call us & we can let you speak to our technicians who use this product & promote it based on its quality.

Thanks

Carl.
