To whom it my Concern

I have been using TRC's 880 Crown and Chassis grease for the past 6 years and find it to give very good protection and long lasting wear life in the bearings. Since using this product we find that our grease consumption has been reduced drastically. I also have used Moly dry film and find it good for those hard to reach areas. I highly recommend these products.

Twin Rivers Paper Company

- We used Mobil Unirex before and a 55 kg keg would last approximately 2 months. After switching to 880 Crown & Chassis it would last at least 6 months because the grease was still there when we went to re-grease.
- When using Mobil Unirex, we had to change the ring on the debarker every year. We just changed it last year, meaning that it lasted 5 years.
- We have been approached by several other companies trying to sell grease and after testing have found that nothing works as well as 880 Crown & Chassis
- We use nothing BUT 880 Crown & Chassis on our "Red Line" equipment
