

ULTRA RED CLEANER

Designed to cut through heavy duty grease, dirt, grime, tar and asphalt Ultra Red is manufactured using a special blend of environmentally safe materials to provide a unique cleaner that does the job without the obnoxious solvent odors found in other cleaners. Ultra Red's ability to work hard and fast saves both time and money when it comes to keeping equipment clean.

UNIQUELY FORMULATED CLEANER

In the asphalt and heavy-duty construction industries equipment is constantly covered in asphalt, grease, dirt, grime and tar. Simply put, these hard to clean substances are part of everyday life. Ultra Red is designed to keep this part of everyday life clean. Ultra Red is a uniquely formulated cleaner designed specifically for the asphalt and heavy-duty construction industries to clean, degrease and remove tar from heavy equipment and keep them looking good.

SAFE ALTERNATIVE TO HAZARDOUS CLEANERS

Ultra Red is made from a special blend of environmentally safe materials to produce a fast acting and very powerful cleaner that is safe for employees to use and is readily biodegradable without the offensive odors that so often accompany a powerful cleaner.

FAST ACTING

Ultra Red is remarkably fast acting in penetrating deep into and under grease, dirt, grime, tar and asphalt breaking it down quickly and efficiently. Because of its effective cleaning power, the time spent cleaning equipment is greatly reduced saving valuable man-hours and reducing costs. Clean equipment is key to maintaining a professional company image. Make Ultra Red your cleaner of choice.

EASY TO APPLY

Ultra Red is applied directly from the container. No mixing or dilution is recommended.
