

MANUAL HANDLING

TLID1001: Shift Materials Safely Using Handling Methods

Course Objective

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety regulations concerning the manual handling and movement of loads.

The unit includes assessing the risk associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plant.

Work is performed under supervision generally within a team environment.

Course Outcome

On successful completion of this course students will be issued with a statement of attainment.

Course Content

- assess risks associated with relocating load
- plan load relocation
- relocate load

Course Prerequisites

- ability to use and understand English
