

UET20621 Certificate II in ESI - Asset

Course Overview

The Certificate II in ESI - Asset Inspection (UET20619) provides the skills and knowledge to work in the electricity supply industry (ESI) as an Asset Inspector and is available through a **Recognition of Prior Learning (RPL)**.

This qualification covers safely complying with relevant legislation, industry standards, codes of practice or other related requirements while inspecting and reporting on the status of distribution assets, including poles and structures, cables, overhead conductors, public lighting, security fencing and gates, insulators and transformers. It includes minor maintenance and weed control.

To participate you need to be employed by an enterprise who provides Asset Inspection services to state-based power utilities. These utilities are responsible for maintaining electricity distribution and transmission network infrastructure, in accordance with the requirements of state and federal Energy Regulators and other legislative bodies.

Course Content

A total of **8 units** of competency comprising:

- **6 core units**; plus
- **2 elective units** from the elective units listed below, of which, 1 elective unit may be selected, with appropriate contextualisation, from a qualification in this or any other endorsed Training Package, provided the selected unit contributes to the vocational outcome of the qualification.

Delivery & Assessment

This qualification is delivered through **Recognition of Prior Learning (RPL) application**.

This flexible delivery allows an RPL Application pack to be completed with evidence for review and assessment.

Course Outcomes

On successful completion of all course requirements and assessments, learners will be issued with a

UET20621 Certificate II in ESI - Asset Certificate and Record of Results
