

INDUCTION STATEMENT

AN IRON BUILT FUTURE.

Iron Built is committed to the highest standards of safety within our construction projects. We believe that the well-being of our employees, contractors, and visitors is of paramount importance, and we are dedicated to ensuring a safe and healthy work environment. To achieve this, we have established a comprehensive set of safety procedures and guidelines that all individuals must adhere to while on our construction sites.

By acknowledging and adhering to these safety procedures, you are not only ensuring your safety but also contributing to the overall well-being and success of our projects. Remember, safety is everyone's responsibility.

IRON BUILT

PERSONAL PROTECTIVE EQUIPMENT (PPE)

All individuals entering our construction sites must wear the appropriate PPE at all times. This includes but is not limited to hard hats, high-visibility vests, safety glasses, ear protection, and steel-toed footwear. PPE not only safeguards your well-being but also contributes to the overall safety of the work environment.

SITE ACCESS CONTROL

Access to our construction sites is restricted to authorized personnel only. Visitors and contractors must sign in and out, and all workers are required to prominently display their identification badges at all times. This controlled access helps us track and ensure the safety of all individuals on-site.

SAFETY TRAINING

We prioritize ongoing safety training and education. All workers, including subcontractors, must participate in our safety orientation program. Regular training sessions are conducted to address specific site hazards and ensure everyone is aware of the proper safety procedures to follow.

HAZARD IDENTIFICATION AND REPORTING

It is the responsibility of every individual on our construction sites to promptly identify and report potential hazards. We encourage an open communication culture where concerns can be reported without fear of reprisal.

EMERGENCY PROCEDURES

In the event of an emergency, clear procedures are in place for evacuation, first aid, and communication. Emergency contact numbers, evacuation routes, and first aid stations are marked throughout the site for easy reference.

COMPLIANCE WITH REGULATIONS

Our safety procedures are aligned with local, state, and federal regulations governing construction site safety. We continually monitor and update our procedures to ensure compliance with evolving standards.
