PERSIAPAN PERMUKAAN

Permukaan baru dari plesteran semen / beton

- 1 Permukaan harus kering sempurna. Kadar air / kelembaban dinding telah mencapai 14-18% dan kadar alkalinya dibawah pH 9.
- 2 Bersihkan dari kotoran, debu minyak dan garam-garam yang melekat pada permukaan yang akan dicat. Bila diperlukan dapat diampas menggunakan kertas amplas halus untuk membersihkan debu yang menempel pada permukaan.
- 3 Bila pada permukaan terjadi retakan, disarankan untuk memperbaiki terlebih dahulu dengan campuran **Mowilex Alcaplast Repair** + **Mowilex Alcabond**. Lalu bersihkan sisa kotoran dan debu dengan menggunakan amplas halus.

Permukaan yang sudah pernah dicat

- 1 Bila daya rekat cat lama masih baik, bersihkan dari kotoran, debu, minyak dan garam-garam yang melekat dengan menggunakan kertas amplas halus.
- 2 Bila kondisi tembok tidak baik, seperti:
 - Lapisan cat lama sudah terkelupas, lakukan pengerokan sampai ke dasar tembok. Cuci permukaan dengan air bersih, kemudian dikeringkan.
 - Tembok telah berjamur / berlumut, cuci dengan larutan kaporit 10-15%, kemudian bilas dengan air bersih.
 - Tembok terdapat retakan dengan lebar lebih dari 2 mm, perbaiki dahulu dengan campuran **Mowilex Alcaplast Repair** (Semen Instan) + **Mowilex Alcabond** (bahan perekat semen).
