ABOUT US

Blu Flow Filtration (Pty) Ltd is a liquid filtration company that seeks to service the demands of both the industrial and domestic needs of Southern Africa.

Its core focus is on providing filtration consumables and components that is used in the design, production, and servicing of filtration systems needed in the mining sector, the food and beverage industry, automotive manufacturing, and wastewater and water reclamation projects. Blu Flow Filtration seeks to aligns itself with the principles of sustainable development that works to protect Earth's natural resources.

Blu Flow Filtration also offers a filter system application design facility whereby customers who need to have a new filtration system designed will be able to get the needed advice and proposals from our sales team who has spent over 13 years in the filtration industry.

We believe that when the correct strategies are in place, and our focus is on offering superior customer service, Blu Flow Filtration's growth will increase year on year as we strive to become a legitimate market leader in this vital resource of life-giving water.
