

CAPBs® sens AQ36

Air quality

Description

Sensor unit for measurement of carbon dioxide, humidity and temperature. The highly accurate CO₂ infrared sensor has a very low drift; it can be adjusted in fresh air. Thanks to the possibility to conveniently enter the measuring time, it is possible to check and document given CO₂ mean values.

Application

- CO₂ concentration, humidity and temperature measurement
- Indoor air quality (IAQ) measurements
- Assessment of the ambient air quality in rooms
- For adjustment of ventilation and air conditioning systems as per EN 13779 or TRGS 900 (limit values for workplaces)
- Evaluation of the air quality in closed rooms (e.g. in schools, offices, conference rooms, libraries etc.)
