# About Edge Line

Since we first opened our doors as a small family business in 2012, our goal has been to provide customers with easy access to high-quality farm fencing, wire mesh and pipe products at amazing prices. While founders, Nathan Jantzen, Ken Peters & Jonathan Peters first started Edge Line in a barn on their property as a way to develop new products for the family hobby farm, Edge Line has since then continued to grow in size by simply developing new products that are designed to suit our clients needs.

Over the years, we have expanded to include custom industrial products, as well as to offer our products to dealers across North America. While our company has grown to serve a wider range of customers, we have maintained the same local focus and core values of providing high -quality products at affordable prices, backed by incredible customer service since the very beginning.

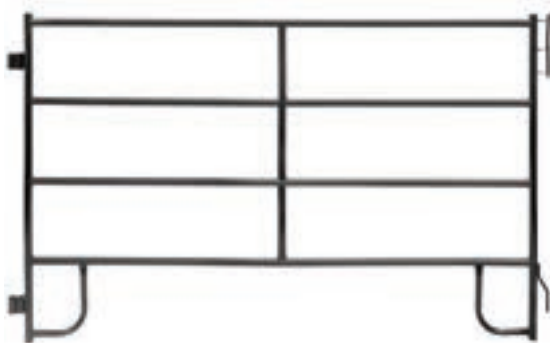

Our expertise and ability to do custom work allows us to provide you with the best products for your unique requirements. No matter what custom products you are looking for, we would love to help. Get in touch with our team of experts today to find out how we can create the ideal solution for you.

# LIVESTOCK PANELS

## PORTABLE PANEL

# Distribution

At Edge Line we understand that getting high-quality products at affordable prices is important to our dealers. That's why we offer container direct shipping, which allows us to streamline logistics, reduce handling cost and pass significant savings directly to our dealers.

Container direct shipping allows our dealers to offer their customers the best products at the most competitive prices. We can also combine a wide range of products into one container, allowing our dealers to ship containers directly to individual stores, keeping cost to a minimum.

Our company is also proud to operate a distribution centre in the beautiful community of Aldergrove, B.C. Located just a short drive from the US border, this facility serves as a key hub for distributing our products to customers throughout Western Canada and beyond.

We understand the importance of fast and reliable distribution and our Aldergrove facility is designed to meet those needs. With a spacious yard, advanced distribution systems and a team of dedicated staff, we can ensure our products reach their destination on time and in excellent condition.

26129 31B Ave,
