

**GUARANTEED ANALYSIS:**

Total Nitrogen (N)	2.00%
.9% Water soluble Nitrogen	
1.1% Water insoluble Nitrogen	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> )	3.00%
Soluble Potash (K <sub>2</sub> O)	1.00%

**INGREDIENTS:** Fish solubles, Kelp, Water,  
Phosphoric Acid (as a stabilizer)

**IMPORTANT NOTICE TO PURCHASER:**

Seller's and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage, direct or consequential, arising out of the misuse or inability to use the product.

**Instructions for Home and Garden use:**

1½ oz. per gallon of water, apply a fine mist on plants as a foliar feed every seven to ten days. Best when used in the morning or evening hours. Do not apply during the heat of the day when the pores of the leaves are closed.

## Liquid #3 2-3-1 Foliar Plant Food

Fertrell Liquid #3 Seaweed & Fish Based Fertilizer Supplement is a product designed for use in foliar applications to crops, or for adding to liquid fertilizer systems.

- 1 Quart (2.475 lbs.)
- 1 Gallon (9.9 lbs.)
- 5 Gallons (49.5 lbs.)

**Shake Well Before Use  
Remains Liquid At All Times**

**The FERTRELL Company (F532)**  
P. O. Box 265, Bainbridge, Pennsylvania 17502  
[www.fertrell.com](http://www.fertrell.com)

**Fertrell Liquid #3** can be used effectively as a foliar fertilizer supplement: when sprayed on young crops to promote strong early growth, to restore vitality to crops damaged by use of herbicides and to provide supplemental nutrition at the time of budding, pod formation and fruiting. Also, it may be added to irrigation water or as a supplement in any type of liquid fertilizer system.

**Rate Of Dilution:** Fertrell Liquid #3 should be diluted with any convenient amount of water that suits the spray equipment. For example, it may be diluted at the rate of 2-3 quarts of concentrate to 5 to 20 gallons of water.

**Rate Of Application:** Fertrell Liquid #3 should be used on field crops at the rate of 2-3 quarts of concentrate per acre per application. For tree fruits, nuts, berries and other high value crops, use 3 quarts of Fertrell Liquid #3 per acre, diluted as described above.

For best efficiency when used as a foliar fertilizer, apply in the morning and evening hours when the leaves are receptive to foliar feeding. Do not apply during the heat of the day when the pores of the leaves are closed. Apply as a fine mist from either ground rigs, aerial sprayers or overhead irrigation systems. Spray evenly on the foliage. Use a good non-ionic surfactant (spreader-sticker). This product is filtered to assure against clogging of spray nozzles. It will not burn when used according to directions.
