## Aragonite Shell Flour

Many houseplants and gardens suffer from a lack of nutrients, especially calcium. Plant foods are often high in nitrogen, phosphorus and potash which promote plant growth even when the plant would rather remain dormant. Calcium gives strength to cell walls and encourages reproduction of new growth.

### Directions for Application:

For potted plants: One tablespoon per inch diameter of pot or plants. 10 lbs per 1000 square feet for larger areas. A one-time annual application should be sufficient.

### Aragonite Guaranteed Analysis

Calcium (Ca) ..... 33%

Ingredient: Fine ground mollusk shells.
