# Fertilizers and Soil Conditioners

*Our products are manufactured with ingredients that are NOP compliant and/or OMRI listed. However, we do recommend you checking with your specific certifier regarding the approval.*

Fertrell fertilizers are biological plant foods, formulated to provide “time released” nutrients for your crops throughout the entire growing season. Fertrell plant foods are a unique combination of products which feed both plants and soil microorganisms. Fertrell fertilizers provide all the essential elements necessary for high-yield crop production and soil management. At Fertrell, we have recognized that the soil is a living organism — a vital and valuable resource. Our products encourage a living, well balanced soil.

The development of Fertrell products represents years of research. We provide a complete organic and natural product in one package — a plant food and soil conditioner that stimulates and builds the soil while supplying the necessary nutrients for plant growth. Our goal is to advance sustainable agriculture with a strong commitment to profitable farming, healthy soils and optimal production.

Fertrell fertilizers are natural and organic blends that provide the elements required to build a healthy and productive soil. Through the action of soil microbes, Fertrell fertilizers provide plants with a complete ration of nourishment during their growing season. By using Fertrell fertilizers you are helping to ensure crop quality as well as crop productivity.

Fertrell fertilizers are a balanced plant food and soil conditioner that provide both macro- and micro nutrients to facilitate optimal growth. Fertrell products have a lasting effect with ingredients that release nutrients throughout the growing season, stimulating plant growth and soil life. Our products help your soils to become richer by:

- Feeding soil microbes
- Supplying trace elements
- Stimulating humus production

Fertrell uses only the highest quality ingredients available. Our blends are produced to meet the needs of our customers. The basis of our products are animal and vegetable proteins and mined minerals, including blends of kelp, fish, feather and crab meals, and sulfate of potash, among others.

We support certified organic, natural, biological, and sustainably-minded farmers and produce products according to their needs and specifications. Sustainable agriculture is our passion and expertise.

## Fertilizer Gold Blend

### Gold Special Starter 2-4-2

Gold Special Starter is specially formulated as a starter or pop up fertilizer. Readily available phosphorus speeds germination and promotes rapid and vigorous growth. This is advantageous in areas with a short growing season or on heavier soils in a wet season. On soils testing low to medium phosphorus, it is most efficient in a band application. Use as a starter over a wide variety of crops, especially corn, small grains, seed beds and where strong root growth is required. Includes Boron and Zinc. Approximate bulk density 62 lbs/cu ft.

## Fertilizer Super Blends

### Super N 4-2-4

Super N is specially formulated as a multi-purpose plant food. It provides readily available nutrients to get the germinating seedling off to a fast and vigorous start, while supplying time-released nutrients that continue to feed the crop through the entire growing period. Because of the unique formulation of Super N, the entire plant food requirements of a crop can be applied in the row. Available with and without added Boron, Boron and Zinc. Approximate bulk density 59 lbs /cu ft.

### Super K 3-4-7

Super K fertilizer is blended to meet the demands of higher phosphorus and potassium requirements by certain crops. It performs much like a combination of Super N 4-2-4 and Gold SS just with higher available potash. The phosphorus helps get germinating seedlings off to good start and the extra potassium helps finish the crop. Super K is also blended with crab meal for nematode control. Available with and without added Boron, Boron and Zinc. Approximate bulk density 46 lbs/cu ft.

### Super 3-2-3

Super 3-2-3 is suited for most plant food applications. It is particularly well formulated for gardens and is very effective for spring plantings. Recommended in row for sowing seeds as well as a side dress on growing plants. Side dressing may be done at the time of planting. Super 3-2-3 will be available throughout the growing season. It will not leach away. Lawns: As a general purpose fertilizer, it is able to activate the microbial life in the soil which aids in thatch reduction. It adds important nutrients for strong root growth. It gives steady and long term nutrition to the soil and plants which results in strong soil and plant structure which is able to be resilient to adverse conditions — drought, heavy play area, etc. Approximate bulk density 46 lbs /cu ft.

### Super Plus 3-0-7

Super Plus 3-0-7 is a long lasting Phosphorus free fertilizer. It has Aragonite and Zeolite which will give a little Calcium and trace minerals along with Nitrogen and Potassium. The Zeolite will help with soil conditioning and water retention. The Nitrogen sources are slow release so, there will be Nitrogen throughout the growing season. This product is for soil high in Phosphorus and low in Potassium. Approximate bulk density 71 lbs/cu ft.

## Fertilizer Blue Blend

### Blue N 5-1-1

Blue N is an advanced formulation providing a time-released nitrogen in a multi-nutrient fertilizer. Blue N was specially formulated for crop production that requires more nitrogen and when manures and legume rotations are used on a minimal basis. Blue N should be applied in broadcast application and plowed under or worked into the soil. Blue N will provide maximum growth and assure you of a strong finish. If phosphorous levels in the soil are low, then a starter fertilizer should be used in conjunction with Blue N. Available with and without Boron. Approximate bulk density 52 lbs/cu ft.

## Fertrell Custom Blended Fertilizers

Fertrell cares about the health of your soils and the crops you are producing. Our agronomists are available to interpret your soil tests, help with crop rotations, identify areas for improvement on your farm, and provide required soil fertility recommendations. One way Fertrell can address this is by custom blending fertilizers to match soil tests and an individual farm's needs. Some important points to remember:

- Minimum order of 1 ton or 2000 lb required for custom blends
- Custom made Fertilizer can be put into 50 lb bags or 2000 lb totes (minimum order 1 ton)
- Made specifically for your fields requirements
- Addition of micro-nutrients, beneficial soil biology or beneficial biology with mycorrhizae available.

This is a service that Fertrell offers as a benefit to you and your farm. Please contact your Fertrell Representative to discuss this option.

### NOTES

- Add Fertrell Beneficial Biology or Fertrell Mycorrhizae Plus to any standard or custom blend.
- All blends available in Bag (50 lb) and Tote (2000 lb). When using fertilizer blends with added Boron and/or Zinc organic certifiers require a current soil test to show deficiency.
- **Allergen Notice:** Our fertilizer blends may contain peanut meal, feather meal and crustacean meal.

# Specialty Blends and Liquid Fertilizers

### Fertilizer Specialty Blends

#### Berry Mix 4-2-4

Berry Mix is a blended plant food specially aimed at more, bigger and tastier berries. Safe and easy to use. Works in most soil types. Best time to apply is at the end of the season. Includes Boron and Zinc. Approximate bulk density 65 lbs/cu ft. *Also available in 25 lb bag.*

#### Earth Friendly All Purpose 5-5-3

Earth Friendly All Purpose is an organic blend that provides balanced, slow-release nutrients without the risk of burning. It improves water penetration and conditions the soil for vigorous root growth. It does not contain Sulfur — it does contain Sodium Nitrate and Sul-po-mag. Approximate bulk density 49 lbs/cu ft. *Also available in 25 lb bag.*

#### Holly Care 4-6-4

An organic based plant food formulated to provide the high level of available phosphoric acid required by acid loving plants. Use it on hollies, dogwoods, gardenias, marigolds, rhododendrons, azaleas, ferns, hydrangeas and all other acid loving plants. Approximate bulk density 48 lbs/cu ft. *Also available in 25 lb bag.*

#### No Bull 3-0-0

No Bull is designed to provide your field crops and forages with the remaining balance of essential nutrients not immediately available in quality manure. It contains Sodium Nitrate to give a quick boost of Nitrogen and a blend of beneficial soil-based microorganisms. It provides available Calcium, Boron, and Zinc. *50 lb*

#### Rose Food 4-2-4

A favorite for rose growers, Rose Food is formulated as a multi-purpose plant food. It contains readily available nutrients to get the plant off to a fast and vigorous start while time released nutrients feed the plant throughout the growing period. Approximate bulk density 47 lbs/cu ft. *Also available in 25 lb bag.*

### Soil Mineralizer Plus 0-4-4

Soil Mineralizer Plus is an effective fall blend that increases biological activity in the soil, helps digest crop residues, extend the duration of nutrient release, improves soil structure, and prepares perennial crops for the dormant season. *50 lb, 2000 lb tote*

### Liquid Fertilizer Blends

#### Fertrell Liquid 3-4-3

Fertrell Liquid 3-4-3 is formulated to meet the nutritional demands of high producing crops in a liquid fertilization program or a supplemental drip program. It contains good amounts of kelp and liquid humates along with the fish emulsion to provide a boost at planting time while increasing nutrient uptake and stimulating soil biology.

**Contains Sodium Nitrate.**

- Plastic Container (1 qt, 1 gal, 2.5 gal)

#### Fertrell Liquid #3 2-3-1

Fertrell Liquid #3 will now have a new analysis with higher phosphorus. It will still have the same great benefits with the same combination of kelp concentrate and liquid fish as previous versions. Fertrell Liquid #3 also contains liquid humates to increase nutrient uptake and stimulate soil biology. Use as a foliar spray or added to liquid fertigation systems, our improved Liquid #3 will be better suited to meet the needs of growing crops with higher phosphorus. Liquid #3 can also be used as a transplant solution or applied during stress periods of plant growth i.e. early growth, budding, pod formation, fruiting, prior to frost, and crops damaged by herbicide. When foliar feeding, apply as a fine mist in early morning or late afternoon.

- Plastic Container (1 qt, 1 gal, 2.5 gal)

### Liquid Soil Amendments

#### Fertrell Bio-Hume (12% concentrated Liquid Humus)

This liquid product is derived from decayed organic matter (humates). Liquid Humic Acid has a high cation exchange capacity which serves to chelate (collect) plant food elements and release them as the plant requires. The chelation process holds the nutrients in the soil solution and prevents their leaching and runoff. Humic acids will improve humus content in the soil for better tilth, water and nutrient retention, and soil aeration. Seed germination and plant root and top growth are enhanced.

- Plastic Container (1 gal)

#### Fertrell Liquid Kelp Concentrate

Liquid Kelp is not considered a fertilizer (the amounts of NP&K are relatively low) but contains all the micro-elements from A to Z; growth plant hormones, vitamins, enzymes and carbohydrates. It's a biostimulant, root system developer, and minor-nutrient deficiency cure. It can be used in conjunction with any water soluble spray.

- Plastic Container (1 qt, 1 gal)

#### Pro K 0-0-20

A fully soluble, plant-derived liquid potassium fertilizer. It is certified for organic use, designed to supply this nutrient (K) in a highly soluble form.

- Plastic Container (2.5 gal)

#### Micro Elements

A blend of micronutrients, freshwater algae extract, nitrogen and plant extracted amino acids (derived from Soybean).

- Plastic Container (2.5 gal)

#### Explorer 10-0-0 Liquid

A premium organic liquid nitrogen fertilizer. Explorer is 100% water soluble and approved for organic production. The L-Amino Acids in Explorer are immediately plant available, do not leach.

- Plastic Container (3.5 gal)

# Individual Fertilizer Components

## Nitrogen Sources

### Alfalfa Meal 3-1-2

A reasonable alternative to blood meal as a source of nitrogen and is nicely balanced with phosphorous and potassium. Its carbohydrates and protein make it an excellent soil conditioner by encouraging microbial activity in the soil. Micronutrients are plentiful because its extensive root system provides them to the plant from deep below the earth's surface. Typical Analysis: 2.5-3% N based on protein. Approximate bulk density 30 lbs/ cu ft.

- Paper Bag (5 lb, 50 lb)

### Blood Meal 12-0-0

A fast release source of organic nitrogen. It should only be used on plants that have a high nitrogen requirement. It may also be used in compost piles to increase the speed of the decomposition process. Tends to act as a deer repellent. Approximate bulk density 47 lbs/ cu ft.

- Bag (50 lb)

### Feather Meal 13-0-0

An ideal source of nitrogen for all crops requiring a steady long lasting supply of that element. The product is not very water soluble, therefore leaching away from crops is almost nonexistent. The nitrogen is made plant available through microbial activity. Approximate bulk density 28 lbs/cu ft.

- Bag (50 lb)

### Peanut Meal 8-1-1

Is a vegetable protein meal used as a natural Nitrogen Source. Approximate bulk density 17 lbs/cu ft.

- Bag (50 lb), Tote (2,000 lb)

### Allganic Nitrogen 15-0-2

A highly available source of Nitrate nitrogen. Use when quick release nitrogen is needed to provide a boost to the crop. Sodium nitrate does have the ability to burn crops so limit its contact with crop foliage. Approximate bulk density 75 lbs/cu ft.

- Bag (50 lb)

## Phosphorous Sources

### Phostrell 0-6-0 32Ca

Phostrell is a unique blend of bone char and aragonite providing a high level of phosphorus and calcium. Approximate bulk density 81 lbs/cu ft.

- Bag (50 lb), Tote (2,000 lb)

## Potassium Sources

### Green Potash 0-0-15

Green Potash is a Fertrell custom blend containing zeolite and kelp. It provides an available source of potassium as well as a vast array of micro-nutrients in trace amounts. Zeolite also holds additional nutrients in plant-available forms and retains up to 55% of its weight in moisture. This is a great product anywhere additional potassium is required. Approximate bulk density 53 lbs/cu ft.

- Bag (50 lb), Tote (2,000 lb)

### Sul-Po-Mag 0-0-18 22S 11Mg

Sul-Po-Mag is a soluble sulfate of potash-magnesia. It is a crushed mineral that will not alter the soil pH. Apply where magnesium and potassium are deficient and calcium is abundant. Approximate bulk density 97 lbs/cu ft.

- Bag (50 lb)

### Sulfate of Potash 0-0-52 18S

Sulfate of Potash is a potassium and sulfur product used in potassium-deficient soils. Approximate bulk density 100 lbs/cu ft. Please call for availability.

- Bag (50 lb)

## Calcium Sources

### Aragonite 0-0-0 33Ca

Aragonite is a sea calcium that is exceptionally high in calcium and low in magnesium. Many soils have had dolomite lime added for years and the magnesium may be tying up other nutrients in the soil. Gypsum and aragonite should be used to off set a high mag content soil. Approximate bulk density 98 lbs/ cu ft.

- Bag (5 lb, 50 lb), Tote (2,000 lb)

### Gypsum (Calcium Sulfate) 0-0-0 23Ca 17S

Is an outstanding soil supplement for soil lacking calcium, but the pH is adequate or high. Gypsum will loosen the soil, encourage soil life, and add the needed calcium. Calcium also acts as a weed deterrent as most weeds prefer acid soils. The sulfur when combined with water will form a weak sulfuric acid which will release calcium that is tied up in the soil solution. This is quick reaction product. Approximate bulk density 54 lbs/cu ft.

- Bag (50 lb)

## Individual Fertilizer Components

### Magnesium Source

#### Magnesium Sulfate

##### 0-0-0 9.8Mg 13S

A great source of magnesium and sulfur for improving your soils and crops. Epsom salt can be applied and incorporated in the soil or dissolved in water and used for foliar or drip application. It is a fast and easy way to apply these two essential nutrients. Approximate bulk density 59 lbs/cu ft.

- Bag (50 lb)

### Sulfur Source

#### Sulfur 90% Pelleted

90% Sulfur Granules is a quality sulfur-bentonite product that degrades readily upon contact with moisture in the soil. This provides a large surface area of sulfur to be oxidized to the sulfate form of sulfur. Approximate bulk density 71 lbs/cu ft.

- Bag (50 lb)

### Soil Amendments

#### Diatomaceous Earth

Diatomaceous Earth is an abrasive powder made from the mineral remains of single cell aquatic plants. Approximate bulk density 16 lbs/cu ft.

- Bag (50 lb)

#### Fertrell Soil Mineralizer

Mineralize your soil with Fertrell Soil Mineralizer. It provides available calcium to allow your fertilizers to be most effective. It also contains trace minerals salt and sulfur to condition the soil and allow root structure to remain healthy. Apply at a rate of 15 lbs per 1000 square feet or 500lb/acre. Approximate bulk density 62 lbs/cu ft.

- Bag (50 lb), Tote (2,000 lb)

#### Pro Cal 3-0-0

A fully soluble, dry fertilizer approved for use in organic production, specifically designed to supply this important nutrient as a foliar. Great to use in prevention of the blossom end rot bitter pit, and other Ca deficiency blights.

- Bag (44 lb)

#### Fertrell Micro Nutrient Essentials

A dry micro nutrient blend that can be added to your fertilizer to provide a complete plant food with all essential plant nutrients.

- Bag (50 lb)

#### Active 2-20-2

Active 2-20-2 is manufactured using the highest quality plant and mineral sources. The nitrogen comes from soy protein hydrolysate.

- Bag (44 lb)

#### Kelp Meal

Kelp meal conditions the soil, builds soil life, stimulates root development, reduces the effects of drought and frost and improves water retention in the soil. Our kelp meal is dehydrated and chopped seaweed of the *Ascoaphylum nodosum* variety. It takes about two weeks to become plant available through microbial activity. Application rate: 15-25 lb/acre. Approximate bulk density 43 lbs/cu ft.

- Bag (50 lb)

#### Live Earth Humates

Live Earth Soil Conditioner is a 100% Humic Shale ore without fillers, binders or other additives. It can be safely applied at any time during the growing season without risk of burning. Additionally, the humic acid contained in our Soil Conditioner may increase the uptake of nutrients. Because it contains only aged an-

cient plant matter, it is safe for use around pets and children. Live Earth Humate is a CDFA Organic Input Material and can be used in all organic farming applications.

- Bag (50 lb)

#### Worm Castings

Worm Castings are a well balanced soil amendment providing a rich mixture of micronutrients, microbial organisms and organic matter. They contain an almost equal percentage of nitrogen, phosphorous and potassium plus calcium, and magnesium. An excellent top dressing for plants. Can be added to potting mix, houseplants and raised beds.

- Bag (30 lb)

#### Zeolite

Zeolite's high CEC (cation exchange capacity) allows for absorption of cations (Ca, K, N, Mg, etc.) and holds them in plant-available form. Zeolite can hold up to 55% of its weight in water. Typically, when Zeolite is applied, crops require up to 35% less water. Zeolite has the ability to loosen heavy clay soils and retain nutrients and moisture in light sandy soils. Zeolite helps prevent compaction, increases water/nutrient infiltration and increases aeration. Zeolite absorbs ammonia very well from manure applications and works well for odor control of ammonia if mixed with manure. Approximate bulk density 57 lbs/cu ft.

- Bag (10 lb, 50 lb)

## Soil-Based Microorganisms & Mycorrhizal Fungi

### Fertrell Beneficial Biology

Contains our top blend of beneficial soil-based microorganisms including multiple species of plant growth promoting rhizobacteria (PGPR) and other beneficial plant growth promoting microorganisms (PGPs). This specially formulated blend enhances and restores beneficial soil microbe populations to augment the natural organic processes that occur in healthy soils.

- Bag (50 lb)

### Pit N' Pen

Are you tired of all the back breaking work of cleaning out box stalls? Pit N' Pen will help to ease that work by dissolving the solids and gistering the fibers in manure. Do neighbors around you complain about how your liquid manure smells when you are spreading it on the fields? Pit N'Pen can help with this. By using Pit N' Pen you will be helping to break down the manure into more soil friendly and neighbor friendly asset from your farm.

#### APPLICATION RATES

Dry Manure Packs .....	1/2 lb per 100 sq ft
Non-Fibrous .....	Apply every 3 inches of depth
Fibrous .....	Apply every 6-8 inches of depth
Liquid Manure Packs	
Initial treatment .....	2 lb per 10,000 gallons
Subsequent treatments .....	1/2 lb per 10,000 gallons

### Fertrell Mycorrhizae Plus

This blend of beneficial soil-based microorganisms plus mycorrhizal fungi colonizes, nourishes and aids plant roots and the surrounding rhizosphere. This provides improved crop health, greater drought tolerance and mineral availability (i.e. phosphorus, nitrogen, calcium, iron, and more) and a more robust soil food web.

- Bag (50 lb)

## Herbicides

### Vinagreen

A Horticultural Vinegar Biopesticide — used as a natural and organic Non-Selective Control of Herbaceous Broadleaf Weed Grasses. Vinegar is most effective when sprayed on target weeds during the hottest part of the day while they are in direct sunlight. Repeat spraying may be necessary to eradicate deeply-rooted weeds. Contains 20% acetic acid.

- Drum (55 gal)

### Avenger Ag Optima

This natural, citrus oil based herbicide is designed to meet the needs of homeowners and businesses looking for an alternative to synthetic herbicides. Avenger Ag Optima is fast acting — often seeing visible results in two hours or less! Dead weeds or grass the next day. Tested against the leading synthetic herbicide glyphosate, Avenger Ag Optima has proven to be just as effective, but faster acting. Tested against other organic or "natural" products on the market approved for certified organic production.

- Plastic Jug (2.5 gal)

# Herbicides and Bacteriacides/Fungicides

### Regalia

Active against soilborne and other pathogens that triggers a plant's natural defenses to protect against a variety of fungal and bacterial diseases. Designed for field and greenhouse applications, Regalia is an innovative tool to maximize plant health, quality and yield in a wide variety of specialty crops, including grapes, tomatoes, leafy greens, potatoes, citrus, cucurbits and strawberries.

- Plastic Jug (32 oz, 2.5 gal)

### Stargus

Stargus is a biofungicide that offers growers a sustainable mode of action to control Downy Mildew, Early and Late Blight, and a broad range of other fungal and bacterial diseases in a large number of commercial specialty crops.

- Plastic Jug (2.5 gal)

### Pace Setter

A bio-based fungicide with plant health benefits for row crops such as corn, soybeans, cereal grain, peanuts and more

- Plastic Jug (2.5 gal)

### Surfactant Additive

#### Nu Film® P

Nu Film® P is a surfactant additive (adjuvant) to use with foliar fertilizers, pesticides, fungicides and bactericides to increase their efficacy and decrease the effects of rain and UV light. It is derived from PINOLENE® a highly refined pine resin that melds with the waxy leaf surface.

- Jug (1 gal)

### Professional Organic Potting Mix

Professional Organic Potting Mix is blended in accordance with the national organics program using only the best ingredients. The potting soil has nutrients added to aid in quick uniform and vigorous germination of seeds. Our potting soil has enough nutrients added to the blend to grow the plants to a transplantable size. The excellent water retention ability of our potting soil means less water is needed. This blend will support the plants immune system for a healthier transplant. Aragonite has been added to encourage better utilization of the nutrients in the blend. Aragonite is a sea calcium that is much more bio available than rock lime. Whether you are growing plants from seed, plugs or you are raising perennials and shrubs you will not be disappointed in this potting soil. One 3 cu. ft. loose filled bag will fill 33 (50-cell) flats. This product is only seasonally available.

- Loose fill bag (2.8 cu. ft.)

## Insecticides

### Insecticides

#### Grandevo

Grandevo is a bio-insecticide that is effective on chewing and sucking insects and mites. Grandevo has multiple modes of action to be long-lasting. It is safe for beneficials.

- Pack (1 lb, 6 lb)

#### Majestene

A powerful species-selective bionematicide with activity against eggs, juveniles and adult lesion, root knot, dagger, stunt, reniform and soybean cyst nematodes. Great for wire worm control.

- Plastic Jug (2.5 gal)

#### Pure Spray Green

Pure Spray Green provides protection at its purest. It quickly removes harmful insects, insect eggs, and pathogens, and at the same time is mild on beneficial insects. Proven in many cases to work as well as or better than synthetic chemical pesticides.

- Plastic Jug (2.5 gal)

#### PyGanic

PyGanic provides immediate insect control for organic farming. PyGanic Crop Protection was specially developed for Producers of Certified Organic Crops, providing immediate control of more than 40 insects, on over 200 crops. Its active ingredient is pyrethrum, an extract from the chrysanthemum plant family. Pyrethrum provides fast knockdown and control of a broad spectrum of crop-damaging insects, such as aphids, leafhoppers, thrips, mites, beetles, Lepidoptera and whitefly.

- Plastic Jug (1 gal)

#### Surround WP

Surround WP crop protectant offers growers a potent new weapon against pests and harmful solar effects. After Surround is sprayed on the plants, it safeguards fruit and foliage against many harmful insects, sunburn damage and heat stress. Surround WP is OMRI listed.

- Bag (25 lb)

#### Venerate XC

Venerate XC is a bio-insecticide that is effective on chewing and sucking insects such as thrips, aphids, leafhoppers, BM stinkbugs, etc. Venerate XC is safe for beneficials.

- 32 oz, 2.5 gal

Successful organic farming often combines both organically-approved insecticides and Integrated Pest Management (IPM).

## Fertilizer Usage Guide

<b>Corn</b>	After sod with manure	<b>Super N 4-2-4</b>	350 lbs/acre
	After sod without manure		400 lbs/acre
	After corn with manure		400 lbs/acre
	After corn without manure		450 lbs/acre

	After beans without manure		350 lbs/acre
	After legumes with manure		300 lbs/acre
	After legumes without manure		350 lbs/acre
<b>Soybeans</b>	After corn with manure	<b>Super K 3-4-7</b>	200 lbs/acre
	After corn without manure		250 lbs/acre
	After small grains with manure		200 lbs/acre
	After small grains without manure		250 lbs/acre
<b>Small Grains</b>	After sod with manure	<b>Gold SS 2-4-2</b>	150 lbs/acre
	After sod without manure		200 lbs/acre
	After corn with manure		200 lbs/acre
	After corn without manure		275 lbs/acre
	After legumes with manure		200 lbs/acre
	After legumes without manure		250 lbs/acre
<b>Legumes</b>	Continuing alfalfa	<b>Super K 3-4-7</b>	<i>Call for recommendations</i>
	After corn with manure		300 lbs/acre
	After corn without manure		375 lbs/acre
	After small grains with manure		300 lbs/acre
	After small grains without manure		375 lbs/acre
<b>Grasses</b>	After corn with manure	<b>Blue N 5-1-1</b>	250 lbs/acre
	After corn without manure		300 lbs/acre
	After beans with manure		250 lbs/acre
	After beans without manure		300 lbs/acre
	After legumes with manure		200 lbs/acre
	After legumes without manure		250 lbs/acre
	Continuing grass		250 lbs/acre
<b>Vegetables</b>	Greens with manure	<b>Super N 4-2-4</b>	400 lbs/acre
	Greens without manure		450 lbs/acre
	Fruiting crops with manure	<b>Super K 3-4-7</b>	700 lbs/acre
	Fruiting crops without manure		750 lbs/acre

Above are general recommendations and can be customized based on a soil test for best results.

## The Fertrell Berry Care Program

The Fertrell Berry Care Program utilizes all natural and organic products and is designed for the natural grower. The best times to fertilize are based on the plants needs allowing the nutrients to be absorbed by the roots in time to have an impact on plant growth and berry production. Many of our fertilizers will work well for Berries but Fertrell Berry Mix 4-2-4 is specifically designed for berries with added Zinc, Boron, and Sulfur.

### Blueberries

Blueberries thrive in acidic soil (4.5 to 5.1 pH range).

- In the early spring before leaves are fully out apply Fertrell Berry Mix 4-2-4 to give the plants a boost prior to leaf and berry production.
- Between July and September, we recommend a one time application of Holly Care 4-6-4 to provide a high phosphorous fertilizer with sulfur with plenty of time for the roots to absorb them.

### Brambles: Raspberries, Blackberries, Black caps, etc.

- In March apply Aragonite followed by an April application of Berry Mix 4-2-4.
- Between August and October apply Berry Mix 4-2-4 once. The nutrients will be absorbed in the plants' roots preparing the plants for heavy fruit production the next spring.

### Strawberries

- A spring application of Fertrell Liquid #3 applied on top of the mulch at a ratio of 75 parts water to 1 part Fertrell Liquid #3 2-3-1 will give the plants a boost prior to berry production and help wash the nutrients built up in the mulch to the plants.

- Fertilize strawberries after the last harvest with Berry Mix 4-2-4 one time between July thru September before you mulch the plants. The fertilizer will be more readily available to the plant roots if allowed to be absorbed directly into the soil while protected by the mulch.

	January-March	April-June	July-September
<b>Blueberries</b>	<b>Berry Mix 4-2-4</b> 6lb /100 row ft. One application in March.  <b>Fertrell Liquid #3 2-3-1</b> 1-2oz/Gal every 14-21days throughout growing season	<b>Pure Spray Green</b> 2-4oz/Gal of water. Apply in spring at first leaves after last hard frost. <b>Regalia</b> at 2 Tbsp/Gal with <b>Nufilm P</b> ½ oz/Gal. Scout for pest pressure. <b>Fertrell Liquid #3 2-3-1/Bio-Hume</b> every 14-21days throughout growing season. Dripline application of <b>SOP 0-0-50</b> at 10-15#/Acre every 7-10 days is recommended for fruit sizing.	<b>Holly Care 4-6-4</b> 10#/100 row ft, One application Post harvest.  Scout for insects. Use <b>Pyganic</b> followed by <b>Grandevo</b> or <b>Venerate</b>
<b>Brambles: Raspberries, Blackberries, Black caps, etc.</b>	<b>Aragonite</b> 8#/100 row ft applied once in early spring.  <b>Berry Mix 4-2-4</b> 6lb per 100 row ft. One application in March.	<b>Pure Spray Green</b> 2-4oz/Gal of water. Apply in spring at first leaves after last hard frost. <b>Regalia</b> at 2 Tbsp/Gal with <b>Nufilm P</b> ½ oz/Gal. Scout for pest pressure. <b>Fertrell Liquid #3 2-3-1/Bio-Hume</b> every 14-21days throughout growing season. Dripline application of <b>SOP 0-0-50</b> at 10-15#/Acre every 7-10 days is recommended for fruit sizing.	<b>Berry Mix 4-2-4</b> 10#/100 row ft, One application Post harvest.  Scout for insects. Use <b>Pyganic</b> followed by <b>Grandevo</b> or <b>Venerate</b>
<b>Strawberries</b>	<b>Berry Mix 4-2-4</b> 6lb per 100 row ft. <b>Product Use Directions</b>	<p><b>Pure Spray Green (dormant oil)/50:1</b> Pre-leaf or bud cover all exposed growth. For Insect control use 100:1 as needed.</p> <p>Add <b>Pyganic</b> to mix per directions if desired.</p> <p><b>Do not apply during blossom! Needs to be allowed to pollinate!</b></p> <p><b>Per Acre</b> – Mix 3 quarts <b>Fertrell Liquid #3 2-3-1</b>, 1 pint Bio-Hume, and 10 gal of water (or as needed to cover all trees)</p> <p><b>Per Gallon</b> – Mix 2 oz <b>Fertrell Liquid #3 2-3-1</b> and ¼–½ oz <b>Bio-Hume</b> per gallon of water</p>			<p>Apply mixture twice as follows: full foliage, ½ fruit set.</p> <p><b>Do not apply during blossom! Needs to be allowed to pollinate!</b></p> <p>Apply <b>Soil Mineralizer</b> at 2lbs per inch diameter.</p> <p>Apply <b>Regalia</b> 1 qt/50 gal of water after fruit set every 14–21 days discontinue after harvest.</p>

- Soil testing is the agronomist's map to supplying the best blended fertilizer for your soil type and specific crops.
- Soil samples should be a true representation of the area sampled; results will reflect only the nutrient status of the sample received.
- Test kits are available from Fertrell or your Fertrell dealer at no charge. The lab fee will be billed at the end of the month when we receive the invoice from the lab.
- Please send completed test form with sample directly to Agri Analysis or A&L Lab. This will help expedite the process.

## Tips for Taking Soil Samples

- Soil samples should be taken from the top 6 inches of the field.
- Samples should be taken from several areas of a field. These samples should represent the good and poor areas in that field. The size of the field determines the number of samples.
- Samples should be mixed in a clean plastic pail with a wooden stick and poured into a plastic bag or the bag provided by the lab.
- We recommend that samples not be touched by hands without gloves.
- For row crops, the best time for sampling is after the crop is mature or harvested. Hayfields, pastures and lawns may be sampled anytime when the temperature is above 40° F.

- Soil test should be taken at least every 2-3 years, however under certain circumstances yearly samples maybe necessary.

*Note: Soil probes are not contained in the test kit.*

[illegible]

**Please mail soil sample  
to this address.**

## About Fertrell Nutri-Balancers

Fertrell's Nutri-Balancers are special blends of vitamins, minerals and direct-fed microbials (selected bacteria and probiotics) to balance your feed programs and insure proper nutrition. Nutri-Balancer feed supplements contain the highest quality ingredients to ensure the best absorption and utilization by your animals. By including special ingredients such as kelp meal, alfalfa meal, and digestive probiotics, Fertrell Nutri-Balancers help to provide all of the key nutrients your animals need to thrive.

Our philosophy is that a well-bred animal should be a well-fed animal. Breeding determines what an animal can do — feeding and management determine what an animal will do. Let Fertrell Nutri-Balancers help give you a well-fed animal.

We also custom blend minerals for specific animal nutritional needs.

## Fertrell's Livestock and Poultry Supplements

Fertrell's vitamin mineral premixes came into existence in 1974 after our existing fertilizer customers urged the owners of Fertrell to make livestock supplements. It was also recognized that forages and feeds no longer contained enough nutrients to sustain modern, high production breed performance, making the need for balanced, organic and natural vitamins and minerals all the greater.

Fertrell Nutri-Balancers contain a blend of microbials, kelp meal, trace minerals and the highest quality macro minerals available on the market.

Our mission is to promote your animals' health so that they can perform at their fullest potential. It is our guarantee to you that we will continue to use high quality inputs to manufacture our livestock, poultry and specialty supplements.

## Dairy Products

Fertrell offers 3 different Dairy Nutri-Balancers. Each has a different calcium to phosphorus ratio to balance rations with different types of forages. Our Dairy Nutri-Balancers have high levels of vitamins, highly bioavailable minerals, and direct fed microbials to ensure health and performance of your dairy herd. By using the highest quality ingredients, our Dairy Nutri-Balancers ensure that your herd is able to meet the challenging demands of today's milk markets.

## RC Gold 4X

RC Gold 4X is a version of Rumi-Cult 40 that is 4 times stronger than the original formula. (reducing freight costs.) It is packaged in a 12.5 lb. bag, 4 per case. One 12.5 lb bag will replace one 50 lb bag of Regular Rumi-Cult 40. This product has additional enzymes added to enhance digestion of fibers and small grains. The extra enzymes will enable greater flexibility of what may be fed. RC Gold 4X has been formulated for use in organic production as well.

## Free Choice Supplements for Livestock on Pasture

### Grazier's Choice

A ready-to-use mix of kelp meal, calcium, phosphorus, trace mineral salt from redmond minerals, vitamin E, selenium, and diatomaceous earth. Even grazing livestock will have a need for supplemental calcium, phosphorus, vitamins and selenium. *Grazier's Choice contains no added copper and is not harmful to sheep.*

### Fertrell Fly Aside

Fertrell Fly Aside is a high-sulfur and garlic granular mineral supplement for all grazing livestock. Sulfur is an essential element that is key in forming the amino acids Methionine and Cystine. Sulfur also aids cattle in the utilization of non-protein nitrogen found in lush early growth grasses. Garlic has been shown to reduce external parasite pressure.

- Paper Bag (50 lb)

## Supplements

### Magnesium Sulfate

Epsom Salt — is a valuable combination of magnesium and sulfur with magnesium at 10% and sulfur being at 13%. This unique combination of mineral makes it more easily digested than most other forms of magnesium. Our livestock have a requirement for both magnesium and sulfur being added to their diets. Epsom Salt is probably the most effective supplement for these minerals.

- Plastic Bag (50 lb)

### Fertrell North Atlantic Kelp Meal

Fertrell North Atlantic Kelp Meal is a 100% natural feed supplement manufactured by Acadian Seaplants Limited. ASL™ Kelp Meal is a naturally balanced and chelated source of trace minerals containing a broad range of minerals and other essential nutrients necessary for optimal animal nutrition.

- Paper Bag (50 lb)

### Thorvin Kelp

Thorvin Kelp is harvested from Iceland in an organic harvest site. The fresh harvest is immediately brought to a nearby dryer so none of the nutrients are lost in transport. Thorvin Kelp is then dried at controlled low temperatures using geothermal energy, a renewable resource, to concentrate its rich nutrient profile. Thorvin contains one third less moisture, 30% more iodine, and is the only kelp supplement with a guaranteed selenium claim. Thorvin Kelp is certified organic and OMRI-Listed.

- Paper Bag (50 lb)

## Forage Inoculant & Feed/Forage Testing Procedures

### Forage Inoculant

#### Nutri-Sil

Nutri-Sil is a live bacteria, added to silage and baled forages to assist the fermentation process. It causes the forages to retain more of their moisture, protein and energy value and increases the palatability and digestibility of the harvested crop.

##### • Paper Bag (50 lb)

##### GUARANTEED ANALYSIS

Total Bacteria (*Enterococcus faecium*, *Lactobacillus buchneri*, *Bacillus Subtilis*, *Lactobacillus plantarum*, *Pediococcus acidilactici*, *Enterococcus faecium*, *Bacillus subtilis*)

..... 115 Billion CFUs/lb (min)

##### DIRECTIONS

Mix thoroughly with forage at the rate of:

MOISTURE %

NUTRI-SIL (lbs)

60% or above ..... 1 lb per ton

40%-60% ..... 2 lb per ton

40% or less ..... 3 lb per ton

### Water Soluble Nutri-Sil

Nutri-Sil decreases the pH rapidly to begin the fermentation process for good quality stored silages and baled forages. The lactic acid bacterium begins the fermentation process, helping the forages to retain more moisture, protein, and energy value. Using water soluble Nutri-Sil will help with the palatability and the digestibility of the silage and baled forages. Water soluble Nutri-Sil has the same bacteria that our trusted Nutri-Sil has, which has been accepted for organic production for over 20 years. One package will treat 100 tons of product providing 5 grams per treated ton of forage at 60% moisture and above. Use 10 grams for moisture 40-60%. Use 15 grams for moisture 40% or less.

##### • Package (500 grams)

##### GUARANTEED ANALYSIS

Total Bacteria (*Enterococcus faecium*, *Lactobacillus buchneri*, *Bacillus Subtilis*, *Lactobacillus plantarum*, *Pediococcus acidilactici*, *Enterococcus faecium*, *Bacillus subtilis*)

..... 125 Billion CFUs per 5 gram

## Forage & Feed Testing Procedures

Please request test bags from the Fertrell office and follow the sampling instructions below.

On the sample bags, be sure to include the following:

- Your complete address
- Phone number
- Name of your local rep (if applicable)

Mail samples directly to:

**Dairyland Labs Inc.**

PO Box 10875

Lancaster PA 17605-0875 — Mail

or

1817 Olde Homestead Lane

Suite 206

Lancaster, PA 17601 — Shipping

### SAMPLING INSTRUCTIONS

Analytical results are only as good as the sample, please follow instructions below.

- Avoid contamination by using clean hands and clean containers.
- Collect enough material to fill the sample bag (about 1 pint).
- All bagged samples should be placed in a larger plastic bag for shipment. Squeeze the air out of the bag and tie it shut. If shipping is delayed for more than one day the samples should be frozen.

### Silage Samples

- When filling your silo, take 3 to 5 handfuls of silage from each of several loads.
- From store silage: Do not collect off the top. Either dig down 2 to 3 feet or collect freshly unloaded material. Take 3 to 5 handfuls from different locations.

### Concentrates and Grain

- Take 5 to 6 random cup sized samples from different locations in the mixture.

### Hay Samples

- It is best to use a forage sampler. They take a sample 1 1/8" in diameter by 18 inches long.
- Different 'batches' should be kept separate and tested separately.
- Samples should be taken from about 15-20 bales. Square bales: probe from the end into the center.
- Stacks of hay: probe at random 15 to 20 times.
- Round bales: also collect 15-20 probes by probing from the outside diameter toward the center.

## Supplements for Swine, Goats, Sheep, and Horses

### Swine

#### Sow Nutri-Balancer

Sow Nutri-Balancer is uniquely fortified to meet the extra needs of sows during gestation and lactation. Providing extra vitamins, minerals, trace minerals and direct fed microbials promoting optimum health.

## Supplements for Poultry

### Poultry Nutri-Balancer

Poultry Nutri-Balancer is made with specialty products created exclusively for Fertrell. As a complete vitamin and mineral supplement, your poultry will thrive on our Poultry Nutri-Balancer. While there are many look-alike products, none can measure up to the original Fertrell Poultry Nutri-Balancer. Poultry Nutri-balancer can be used for all species of poultry (broilers, layers, turkeys, ducks, guineas, etc), ages and stages of production.

- Paper Bag (60 lb)

### Poultry Booster Pack

Poultry Booster Pack is a blend of vitamins and direct-fed microbials specifically designed to refresh aged or held-over Poultry Nutri-Balancer (PNB). Fertrell guarantees its vitamins for six months of normal storage (out of sunlight and dry). Vitamin potency will naturally decrease by 25% after six months of normal storage.

*Please note: Poultry Booster Pack does not replace the much needed calcium, phosphorus, kelp meal, salt and other essential micro nutrient that Poultry Nutri-Balancer contains. It is only to be used to refresh expired PNB.*

- Paper Bag (3.5 lb)

### Fertrell Poultry Breeder Supplement

Poultry Show and Breeder is a supplement high in vitamins and essential amino acids for fertility, egg quality, hatchability, and feather quality. This is intended for breeder flocks and show poultry. Breeder flocks have higher amino acids and vitamin requirements. Show poultry have higher amino acid requirements to improve feathering and plumage.

*Available exclusively direct from Fertrell — see online store*

- Paper Bag (10 lb, 40 lb)

### Fertrell Turkey Booster

Turkey Booster! This product is meant to supplement the Poultry Nutri-Balancer for a more personalized ration for your turkeys. It has a higher vitamin and mineral content to meet the needs of your turkeys for optimum growth and development.

- Paper Bag (25 lb)

### Fertrell Fish Meal

Our fish meal meets organic standards and is approved by AWA\* for their farmers. This meal is a custom blended product made from wild-caught fish containing 60% protein and essential amino acids. Fertrell Fish Meal has the most antioxidants available, is low-ash, and has been proven essential for poultry diet formulations.

- Foil Bag (10 lb)
- Paper Bag (50 lb)

### Alfalfa Meal

Fertrell's Alfalfa Meal is certified organic. It provides 17% or more natural protein and offers many benefits to your livestock. Alfalfa is full of minerals, trace minerals, beneficial dense fiber and carotenoids. Carotenoids are part of the vitamin A family of vitamins and support egg yolk and skin color in meat birds.

- Paper Bag (50 lb)

### Dry Aragonite

Dry Aragonite is a superior form of calcium that will benefit both livestock and poultry. Aragonite promotes strong bones, enhances milk and egg production, with the added benefit of efficient weight gain, feed utilization and muscle tone.

- White Paper Bag (50 lb)
- Totes (2,000 lb)

### Crab Meal

Crab meal is a good source of protein and calcium for poultry. Containing about 30% protein, we can use crab meal as a part of a no-soy ration. Crab meal is high in salt and should be fed only under the direction of a qualified nutritionist.

*Call for availability.*

- Bag (50 lb)
- Totes (2,200 lb)

*For poultry rations, see page 22.*

*\* Currently meets AWA standards. Please check with certifier before use.*

## Grit

All poultry have a gizzard that needs to be filled with grit in order to properly break down fiber and pasture. Our granite grit is broken into various sizes depending on the age of your birds. You can mix grit into a feed ration at 25 lb/ton, top dress it, or make it available free choice.

- Plastic Bag (5 lb, 50 lb)

Aragonite (calcium)	25
<b>TOTAL:</b>	<b>2000</b>

### SWINE RATIONS

#### Swine Nursery Feed — 22%

Age 4 to 10 weeks, 11 to 44 pounds

INGREDIENTS	LBS
Shelled Corn	834
Roasted Soybeans	500
Oats	200
Fertrell Fish Meal, 60%	200
Milk Pellets	200
RC Gold 4X	6
Swine Nutri-Balancer	60
<b>TOTAL:</b>	<b>2000</b>

#### Swine Grower — 16%

Age 10 to 22 weeks, 44 to 110 pounds

INGREDIENTS	LBS
Shelled Corn	1,009
Roasted Soybeans	475
Oats	400
Swine Nutri-Balancer	60
Fertrell Fish Meal	50
RC Gold 4X	6
<b>TOTAL:</b>	<b>2000</b>

#### Swine Finisher — 14%

Age 22 weeks to Market, 110 pounds to Market

INGREDIENTS	LBS
Shelled Corn	1,084
Roasted Soybeans	450
Oats	400
Swine Nutri-Balancer	60
RC Gold 4X	6
<b>TOTAL:</b>	<b>2000</b>

Use a 14% swine finisher ration if you plan to raise your pigs above 230 pounds live. A lower protein ration is more economical, but the pigs will put on more fat. Make sure your market can accommodate this.

### SOW RATIONS

#### Sow Feed — 16%

Gestating 4 to 8 pounds depending on body condition

INGREDIENTS	LBS
Shelled Corn	944
Roasted Soybeans	500
Oats	400
Sow Nutri-Balancer	100
Fertrell Fish Meal	50
RC Gold 4X	6
<b>TOTAL:</b>	<b>2000</b>

**Lactating:** Feed according to body condition and the number of piglets nursing. Full feed may be appropriate if she's nursing more than 8 piglets.

## Animal Health Products

### Black Walnut Hull Powder

A dietary supplement used to correct digestive tract abnormalities caused by parasites, Coccidiosis, E-Coli form, and Salmonella type organisms. Typically given at the rate of 1/2 or 1 teaspoon per day depending on the size of animals and level of infections.

*\* This statement has not been evaluated by the FDA. This product is not intended to diagnose, treat, cure or prevent any disease.*

- Bag (1 lb)

### Copper Sulfate

Can be used as a digestive aid for poultry with coccidiosis and other bacterial infections. Recommended use: 1 oz per 5 gallons of water for 3 days. Do not use for longer than 3 days in a row.

- Bag (5 lb)

### Direct Fed Microbial, Dry

Concentrated package of beneficial bacteria. Promotes better digestion and overall health. For dry use only.

- Foil Pack (1 lb)

### Molasses

We have both certified organic as well as non-GMO. Molasses will aid in overall digestion.

- Plastic Jug (1 gal)
- Plastic Jug (2.5 gal)

### Fly Aside Liquid

A proprietary blend of mineral oil, herbal extracts and essential oils. This mixture includes garlic, chrysanthemum, citronella, lemongrass, eucalyptus and tea tree extracts for full spectrum protection. Fly Aside liquid is designed to repel flies and external parasites.

- Plastic bottle (1 qt, 1 gal)

### Garlic Oil

Used to soothe the ear and as an antibiotic. The Fertrell Company has taken certified organic garlic and steeped it in certified organic olive oil and aged it to perfection. Garlic oil can be used on any species of farm animal. Bottom of Form Recommended Dosage: 1-2 ml a day; safe for external application. Shake well. Refrigerate after opening.

- Brown glass bottle (16 oz)

### Nutri Zyme

Best used in any animal diet where alternative grains replace corn and soy. Formulated to be used at a rate of 2 pounds per ton of complete ration.

- Bag (2 lb)
- Bag (50 lb)

### Organic 60 Grain Apple Cider Vinegar

Use at a rate of 1 oz/gallon of water. Contains 6% acetic acid.

- Jug (1 gal, 2.5 gal, 55 gal)

## Animal Health Products

Fertrell carries Dr. Paul's Lab and Dr. Sarah's Essentials. We offer a range of their products, including, but not limited to:

- Aloe Pellets
- Aloe C
- CEG
- OLS-M
- Dull It
- Calf Start
- Swinex
- Poultry X
- CGS Remedy
- Super Wound Spray
- C-Blast
- Downer Bolus
- Fresh Cow Bolus
- Poke Oil

Dr. Paul's Lab and Dr. Sarah's Essentials have a line of natural health care products for livestock. Dr. Dettloff's *Complete Guide to Raising Animals Organically* is a great book for natural ways of farming, feeding, and treating livestock naturally. This book is available for purchase through the Fertrell Company.

**Aloe Pellets**  
5 lb, 25 lb

**Aloe C**  
1 gal

**CEG**  
8 oz, 32 oz

**OLS-M**  
8 oz, 32 oz

**Dull It**  
8 oz, 32 oz

**Calf Start**  
32 oz, 64 oz, 1 gal

**Swinex**  
60 oz, 5 qt, 3 gal

**Poultry X**  
5 qt, 3 gal

**CGS Remedy**  
60 oz, 5 qt, 15 lb

**Super Wound Spray**  
16 oz, 32 oz, 1 gal

**C-Blast**  
60 ct

**Downer Bolus**  
25 ct, 80 ct

**Fresh Cow Bolus**  
20 ct, 80 ct

**Poke Oil Plus**  
8 oz, 32 oz

## Redmond Products

### Products for Animal Health

#### Redmond Trace Mineral Salt

While natural trace mineral salt (NTM) is mostly pure salt, (95% pure sodium chloride) it also contains many valuable trace minerals. These valuable minerals are all essential to the proper growth and development of your livestock.

- Block (44 lb)
- Plastic Bag (50 lb)

#### Redmond Conditioner

Redmond Conditioner is an ideal supplement for all classes of livestock. This colloidal Silicate contains over 50 mineral compounds ready for immediate utilization by the animal. It can be fed free choice, used as a top dress, or mixed in a TMR. It can improve the nutrition, health, and profitability of your animals. It is listed by OMRI for use in organic production.

- Plastic Bag (50 lb)

#### Redmond Salt with Garlic

Redmond 10 Fine with Garlic is formulated to help control pest such as flies, lice, and ticks.

- Plastic Bag (50 lb)

#### Redmond RealSalt

Redmond RealSalt is a natural mineral sea salt from an ancient unpolluted ocean. It has a naturally 'sweet' flavor which brings out flavors in foods that other salts just mask over. Although it is not sold with any medical claims, users report it lowers blood pressure and eliminates water retention. It is available as the original sea salt.

- Pouch (26 oz)
- Plastic Bag (25 lb)

#### Redmond Bentonite Clay

Redmond Bentonite Clay is a volcanic ash which fell in sea water, so it contains all the minerals from the volcanic ash, plus all the minerals from the sea. They use it externally for boils, bruises, bee stings, cuts, infections, and burns. 1 part of Redmond bentonite clay to 2 parts of water.

- Jar (10 oz)
- Bag (6 lb)

## Products for Small-Scale Livestock

### About Fertrell Nutri-Balancers

Fertrell's Nutri-Balancers are special blends of minerals, vitamins and direct-fed microbials (selected bacteria) to balance your feed programs and insure proper nutrition. Nutri-Balancer feed supplements contain the highest quality ingredients. A well-bred animal should be a well-fed animal. Breeding determines what an animal can do — **feeding and management determine what an animal will do.** We also custom blend minerals for specific animal nutritional needs.

### Nutri-Balancers

#### Dairy Nutri-Balancers

Fertrell's line of Dairy Nutri-Balancers includes three dairy pre-mixes. Each is blended with precise ratios of calcium and phosphorous to balance rations with all types of forages. See brochures for more information.

**Dairy Nutri-Balancer #1** — For diets containing mostly legumes.

**Dairy Nutri-Balancer #2** — For diets of mostly legumes with some corn silage.

**Dairy Nutri-Balancer #3** — For diets of mostly corn silage with some legumes.

- Paper Bag (50 lb)

#### Goat Nutri-Balancer

Our Goat Nutri-Balancer is formulated specifically for the nutritional requirements for all stages of a goat's life. Goat Nutri-Balancer is formulated with the essential vitamins, minerals, and trace elements to promote optimum animal health. Goat Nutri-Balancer should be used with high-quality grains and forages for maximum health and performance.

- Foil Bag (10 lb)
- Paper Bag (50 lb)

#### Horse Nutri-Balancer

Feed at the rate of two ounces per head per day to all horses over 400 pounds; under 400 pounds, one ounce. Do not ex-

ceed 4 ounces per head per day so as not to exceed the maximum permitted intake of Selenium per head per day. Each measure holds one ounce

- Foil Bag (10 lb)

#### Poultry Nutri-Balancer

Poultry Nutri-Balancer is made with **specialty products created exclusively for Fertrell**. That is why we confidently stand behind the quality of our premier poultry vitamin-mineral supplement. While there are many look-alike products, none can measure up to the original Fertrell Poultry Nutri-Balancer.

- Foil Bag (10 lb)
- Paper Bag (60 lb)

#### Sheep Nutri-Balancer

Sheep NB may be offered free choice during the grazing season or winter season. Sheep NB may also be mixed with grains for flushing ewes during breeding season and feeding lambs. Feed Sheep NB in addition to grain, protein and forages. Average daily consumption expected is  $\frac{3}{4}$  oz per animal per day.

- Foil Bag (10 lb)
- Paper Bag (50 lb)

#### Swine Nutri-Balancer

A vitamin/mineral premix to promote maximum performance and ensure optimum health.

- Foil Bag (10 lb)
- Paper Bag (60 lb)

## Home Garden Fertilizer Recommendations

Product	Plant	Application Rate	Frequency

	<b>Flowers</b>	2 lbs per 100 sq. feet	Spring or Fall
	<b>Roses</b>	1/2 lb per small bush	Spring
	<b>Azaleas &amp; Evergreens</b>	1/2 lb per small bush	Spring
	<b>Bulbs</b>	1/2 cup per hole mixed in soil	Planting

See pages 3-4 for product descriptions.

## Fertrell Lawn Care Program

### Lawn Care

#### Turf Pro 5-0-5

Turf Pro is a balanced fertilizer blended to be available throughout the season. Can be applied anytime from April through October and is designed to thicken the turf and build the root system. General application: 6-10 lbs/1000 sq ft.

- Bag (50 lb)

#### WeedBan

WeedBan is the first natural weed control on the market; made from a byproduct of corn syrup production, it works by stopping the development of the secondary feeder roots causing the seedling to die. This is a preemergent product, effective against dandelions, crabgrass, creeping bent grass, foxtail, lamb-squarier, purslane, redroot pigweed, smart weed, barnyard grass and bermuda grass. WeedBan converts to approximately 10% Nitrogen. It is a weed and feed product, not just an herbicide. *Not approved for organic production.*

- Bag (50 lb)

#### Mid August–September

**Turf Pro 5-0-5**, the most balanced of our lawn care products, is designed to thicken the turf and build the root system. Applied in late summer to early fall (Sept–Nov), at a rate of 6–10 lbs per 1000 square feet, Turf-Pro 5-0-5 will help your lawn recover from summer time damage and prepare for the winter dormant season.

#### Fall

The basis of an effective lawn program begins with the mineralization of your lawn's soil. **Fertrell's Soil Mineralizer** applied in the October–November time frame at a rate of 10 lbs per 1000 square feet provides available calcium to allow the lawn fertilizers applied later to be most effective. Soil Mineralizer also contains trace minerals, salt and sulfur to condition the soil and allow the turf's root structure to remain healthy during the dormant season and start off strong in the spring.

#### Late Winter to early Spring (optional)

February to March is the time to apply **Aragonite** at a rate of 10 lbs per 1000 square feet to give the soil a shot of calcium and help the turf get the most out of the nutrients already present in the soil and rain. This is also the time to apply **Weed Ban** to prevent the unwanted seeds from turning into unwanted weeds. Weed Ban will also provide Nitrogen and boost the early spring growth. Weed Ban may also be applied in late July and August to prevent fall weeds.

#### End of May–June

**Turf Pro 5-0-5** may be applied in late spring to early summer (May–June), at a rate of 5 lbs per 1000 square feet, when you want to green up the lawn and promote summertime growth. Turf Pro 5-0-5 is formulated specifically to promote turf growth and bring out a deep green to your lawn.

	Turf Pro 5-0-5	Soil Mineralizer	Aragonite	Weed Ban
<b>January</b>				
<b>February</b>			10 lbs per 1000 sq. ft.	20 lbs per 1000 sq. ft.
<b>March</b>				
<b>April</b>				
<b>May</b>	5 lbs per 1000 sq. ft.			
<b>June</b>				
<b>July</b>				20 lbs per 1000 sq. ft.

## Fertrell Tree and Shrub Program

	Holly Care 4-6-4	Weed Ban	Fertrell Liquid #3 2-3-1	Soil Mineralizer
<b>Early Spring</b>	1 lb per inch diameter of trunk	20 lbs per 1000 sq ft (if required)	1-2 oz per gallon	
<b>Early Fall</b>	1 lb per inch diameter of trunk	20 lbs per 1000 sq ft (if required)	1-2 oz per gallon	
<b>Late Fall</b>				10 lbs per 1000 sq ft

### Established Trees and Shrubs

#### Early Spring

- Rake back mulch, spread **Fertrell Holly Care 4-6-4**: 1 lb per inch diameter of trunk at drip line.
- To avoid weeds in bed, add **Fertrell Weed Ban**: 20 lbs per 1000 sq. ft.
- Replace old mulch, water in with **Fertrell Liquid #3 2-3-1**: 1-2 oz per gal. Add a layer of new bark mulch for a total of about 3 inches (keep back from stem/trunk).

#### Early Fall

- Same as early spring (no Weed Ban).

#### Late Fall

- Apply **Fertrell Soil Mineralizer**: 10 lbs per 1000 sq. ft.

### New Plantings

- Prepare planting hole, add 1/3 high-quality compost to the original soil, mix well, plant the shrub/tree at the proper depth, allowing for the mulch layer. After back filling, water in with **Fertrell Liquid #3 2-3-1**: 1-2 oz per gallon. After planting, top dress soil with **Fertrell Holly Care 4-6-4**: 1 lb per inch diameter of stem. Add bark mulch for a total of about 3 inches (keep back from stem/trunk).
- A soil test is recommended if soils are of unknown quality or have not been tested recently. A soil test is *highly* recommended for a large planting. Contact your Fertrell representative or the main office for a soil test kit.

	Fertrell Liquid #3 2-3-1	Holly Care 4-6-4
<b>Planting</b>	1-2 oz per gallon	
<b>After Planting</b>		1 lb per inch diameter of stem

## Products for the Small-Space Gardener

### Biological Fertility for Every Crop

Our fertilizers blend organic and natural products along with mineral ingredients to address the needs of specific crops. As with all Fertrell products, these

fertilizers encourage soil life, improve the health of plants and increase yields, while benefiting the environment.

#### Alfalfa Meal 3-1-2

A reasonable alternative to blood meal as a source of nitrogen and is nicely balanced with phosphorous and potassium. Its carbohydrates and protein make it an excellent soil conditioner by encouraging microbial activity in the soil. Micronutrients are plentiful because its extensive root system provides them to the plant from deep below the earth's surface.

Typical Analysis: 2.5-3.0% N based on protein.

- Foil Bag (5 lb)

#### Earth Friendly All Purpose 5-5-3

An organic blend that provides balanced, slow-release nutrients without the risk of burning. Improves water penetration and conditions the soil for vigorous root growth.

- Foil Bag (5 lb)
- Paper Bag (25 lb)

#### Aragonite

A sea calcium that is exceptionally high in calcium and low in magnesium. Many soils have a high magnesium content and the magnesium can tie up other nutrients in the soil. Use Aragonite to offset a high mag content soil or low calcium. Typical Analysis: 0-0-0-39 Ca.

- Foil Bag (5 lb)

#### Flower Care 3-4-3

A blended plant food designed to increase the health of your plants and produce more blooms. Readily available phosphorus speeds germination and promotes rapid and vigorous growth.

- Foil Bag (5 lb)

#### Berry Mix 4-2-4

A blended plant food specially aimed at more, bigger and tastier berries. Safe and easy to use. Works in most soil types. Best time to apply is at the end of the season.

- Foil Bag (5 lb)
- Paper Bag (25 lb)

#### Fertrell North Atlantic Kelp Meal

A 100% natural feed supplement that contains a broad range of minerals and other essential nutrients necessary for optimal animal nutrition. The term "essential" mineral nutrient refers to a mineral element.

- Foil Bag (10 lb)

## Products for the Small-Space Gardener

### Holly Care 4-6-4

An organic-based plant food formulated to provide the high level of available phosphoric acid required by acid-loving plants. Use it on hollies, dogwoods, gardenias, marigolds, hydrangeas, rhododendrons, azaleas, ferns, and all other acid-loving plants.

- Foil Bag (10 lb)
- Paper Bag (25 lb)

### Tomato Grower 3-4-7

Tomatoes are heavy feeders. Tomato Grower contains everything they need to thrive. Apply this blend once in the spring and once during the middle of the growing season. The resulting tomato fruit will be large, flavorful and nutritious all season long!

- Foil Bag (5 lb)

### Rose Food 4-2-4

Formulated as a multi-purpose plant food. It contains readily available nutrients to get the plant off to a fast and vigorous start while time released nutrients feed the plant throughout the growing period. This formula is a favorite for rose growers throughout the USA.

- Foil Bag (10 lb)
- Paper Bag (25 lb)

### Vegetable Blend 5-3-4

This organic blend will supply you with large, delicious, nutritious produce all season long! The key ingredients in our Vegetable Blend include aragonite and kelp meal which promotes healthy soil and stimulates plant root development. Apply in the spring and once during the growing season.

- Foil Bag (5 lb)

### Super Plant Food 3-2-3

Suited for most plant food applications. It is particularly well formulated for gardens and is very effective for spring plantings. Super 3-2-3 will be available throughout the growing season; it will not leach away. Use on lawns as a general purpose fertilizer. Super 3-2-3 activates the microbial life in the soil which aids in thatch reduction.

- Foil Bag (10 lb)
- Paper Bag (25 lb)

### Zeolite

Zeolite holds many minerals in plant-available form which helps increase their absorption. Typically, where zeolite has been applied, crops will require up to 35% less water. Zeolite has the ability to loosen heavy clay soils and retain nutrients and moisture in light sandy soils. Zeolite helps prevent compaction, increases water/nutrient infiltration and increases aeration.

- Bag (10 lb, 50 lb)

## The Fertrell Company History

Fertrell has enjoyed a long history starting in 1946 out of a passion for excellence. John Johnson of Fullerton, Maryland a suburb of Baltimore, was greatly dissatisfied with the blooms and fragrance of his roses. Determined to improve fragrance, appearance and endurance of his roses John set forth mixing plant, animal, and mineral rock powders. This passion for excellence is what started The Organic Development Company. The first name of Fertrell as we know it.

As the company grew it was apparent that more space for manufacturing would be necessary. Lancaster county Pennsylvania had a growing demand for Mr. Johnson fertilizer blends. For this reason, The Organic Development Company relocated to its current location in Bainbridge, PA. in 1961. The Lancaster County sales were greatly influenced by the sales of Rufus Miller, a local to Bainbridge, PA. Also, in 1961, when the company moved to the current location, was the beginning of liquid fertilizer blending. Liquid fertilizers at the time were primarily a blend of liquid fish emulsions.

In 1973, ownership changed and along with this change the name of the company changed to The Natural Development Company. The new owner Rufus Miller changed the name again in 1975 to The Fertrell Company. Fertrell is a combination of other words pertaining to good soil health and fertility – Fertilizer – **FER**, Trace minerals – **TR**, and Elements – **ELL**, to form Fertrell.

In 1974, Fertrell's customers encouraged Mr. Miller to develop vitamin & mineral supplements for their livestock. This was the beginning of the Fertrell Nutri-Balancer line of livestock supplements. The addition of livestock supplements became more apparent due to revealed shortages of mineral in the soil test of the farmlands. Fertrell was one of the first to use probiotics, dried seaweed meal and chelated trace mineral for livestock and poultry supplements. In 1974, this was cutting edge technology to the animal nutrition world.

Rufus Miller continued as owner of The Fertrell Company from 1973 to 1991. In 1991, three employees, David Mattocks, Dennis Nygard and Reuben Gantz joined together to purchase Fertrell from Mr. Miller. This partnership lasted until 1996 when Mr. Nygard retired. The other two partners remained until 2000 when Mr. Gantz also retired. David Mattocks continued as sole owner until 2003. In 2003, David Mattocks entered Fertrell into an ESOP – employee stock owner-

# The Fertrell Story

ship program. An ESOP was the best option for ensuring Fertrell products and services for the next generations of farmers, gardeners, and all the Fertrell community.

The Fertrell Company has been blessed for over 77 years with the best customers, great employees, and visionary leaders. It has seen many pivotal milestones along the way. From the beginning with one man's passion, to a handful of inspired entrepreneurs, to now over 25 employees that all have a level of ownership in one of the greatest organic fertilizer companies ever. With the help of great mentors like Jack Robinette for assisting with the formulation of Poultry Nutri-Balancer, the insight of Dr. Robert Patton for the development of Rumi Cult 40 — now RC Gold 4X. The partnerships with world renowned spokesperson Joel Salatin who has been using Poultry Nutri-Balancer since the spring 1997.

Fertrell from its humble beginnings in one man's garage in Maryland, to small mixing, blending and bagging facilities in Lancaster County Pa, to now 25 plus

employee-owned company. Fertrell now sells and distributes through dealers and directly to all the U.S. states, Canada and Abroad.

Fertrell's mission has always been — **“Healing the Earth and Feeding the world *Better Naturally!*”**

## Enhanced Gardening Experience

Since I have been using Super K 3-4-7 in my garden, my flowers have been blooming so much more and longer.

Our vegetables are also doing much better.

— VA grower

## Guidance to Peak Bang for the Buck

I had a great conversation with a customer earlier this morning. I thought you may be interested in hearing what he had to say. Basically, he is NOT certified organic, so he would be considered a conventional style farmer. However, John has worked with Fertrell fertilizers with his produce operation for several years now. He explained how he and a group of 8–10, mostly conventional, farmers get together monthly to talk shop. This last time, they put together some cost of production sheets. And they did some itemized percentages of cost on their operations, and John's came in amongst the lowest, once again. He said that he often questions working with us being that he is not certified organic. But this, along with the success of, "using 600–900#s of Fertrell dry fertilizer blends per acre, is not bad." Basically, he really sees a lot of bang for his buck with working with Fertrell, and I feel like this is one of those type testimonials that you're interested in.

One issue I think Fertrell always combats, is exactly that. Many folks see/hear the word "organic" and just immediately think high priced. This, to me, is a great example of how Fertrell offers great products at a great price. Just some more food for thought. And here is John's info for you too. Please let me know if you have any questions, or if there is anything else I can do for you.

— Seth (comments from John, Lancaster County)

## Guidance to Peak Performance

"I'm sure nearly everyone in this group is already familiar with how awesome Fertrell is and how helpful the crew over there is with sharing information, so this is kind of beating a dead horse but I thought I'd share some of the specifics of my broiler season stats and how impactful Fertrell has been for our farm.

Last year I started mixing my own soy free ration with pretty horrific results. At the beginning of this year I reached out to Fertrell and got some help. We've been raising 50 Cornish Cross per month since February and we just increased production to 50 every two weeks. It took me a lit-

tle while to go 100% all in on the ration. Originally I had been going lower on the fish meal than was suggested to me and I wasn't adding the oil because I hadn't found a good supply of oil that wouldn't destroy my food costs.

So we kind of tiptoed into the full ration but even doing so we had great results. Now that we're 100% all in, our feed bill is more expensive per lb, but we're feeding far less feed and also getting to butcher weight about 10 days faster than we were at the beginning of this season. At 7 weeks we're getting 5 lbs dressed weights with 14 lbs of feed consumed per chicken.

Along the way to getting here I started doing control groups because I saw where one person had said they occasionally can't get Nutribalancer so they use kelp. I noticed Kelp was the first ingredient in Nutribalancer so I gave it a try. In 2 experiments our chickens finished 3.6 oz heavier on average when fed Nutribalancer than when fed just kelp. We're in a lucky situation where Nutribalancer is less expensive than kelp anyways since we're able to source it from a feed mill who sells to us at just slightly above cost.

We did one experiment only where the chickens got no Nutribalancer or kelp and we ended up losing 2 more chickens out of 25 than we did with Nutribalancer and finished weights were 8.3 oz lower on average. The Nutribalancer is a relatively expensive ingredient but each chicken eats about 50 cents worth of Nutribalancer in its lifetime and gives us \$2.50 more (we sell our chickens for \$5/lb) in finished product to sell.

My lesson learned is to not tiptoe into trusting the crew over there but to just dive in and know that you'll get the absolute best performance out of the chickens that way. When something seems a little questionable (most recently I got a layer feed ration with 8% fat which seemed nuts to me, but the chickens are doing great on it and I'm excited to see how they produce over the next few weeks), just do it and evaluate why afterwards rather than being slow to adopt something that you'll eventually be getting to anyways."

— Weedy Weidenthal, Brewmaster  
Tombstone Brewing Company

## Next Level Expertise

Thank you again for your help. Also the broiler mix you made for me the last time is working perfectly growing faster than the feed from co-op.

— Thanks, Travis
