

MONICA HORBER

Expert University Admissions & Guidance

2026–27 Fee Schedule

My fee structure is tailored to each university's application system, reflecting the actual scope of work each one requires — from a single centralized application to multiple school-specific supplements. Every section includes full support through submission: best-fit list development, essay and personal statement coaching, application review, and ongoing communication management, including a dedicated student email account (the average application cycle generates 500+ university emails to track and respond to). Canada is split into separate lines because Ontario (OUAC), UBC, and McGill are three distinct application systems, each with its own required writing submissions.

Application System	Base Fee	Includes	Additional Fees
Canada — Ontario (OUAC)	\$1,400	Program strategy + one OUAC application, up to 5 Ontario universities for the same fee, incl. required supplementary forms	—
Canada — UBC (direct application)	\$1,300	One UBC application + Personal Profile short-answer essays	—
Canada — McGill (direct application)	\$1,200	One McGill application + supplementary questions	—
Canada — other direct-application school	+\$450 /school	Any additional Canadian university outside Ontario/UBC/McGill	—
University of California (all campuses)	\$1,800	One centralized UC application + Personal Insight Question essays — covers any number of UC campuses selected	—
United States — Common App	1–2 schools: \$1,800 3–5 schools: \$2,800	College list strategy + Common App essay + supplements for each school on your list	+\$325 per school beyond 5
U.K. & Scotland — UCAS	\$1,800	Subject strategy + one UCAS personal statement, up to 5 choices	+\$650 Oxbridge / admissions test prep (e.g. LNAT)
Australia	\$1,300	Application strategy + state portal application(s), up to 5 preferences	—
Hong Kong	\$1,800	Strategy + up to 3 direct-to-university applications	+\$450 per additional school
Art / Portfolio Add-on (any section above)	+\$650 /school	Portfolio curation and artist statement support	Flat \$1,200 if portfolio work spans most of the student's list
Email & Communications Management (per student)	\$500	Dedicated student email account; monitoring and responding to all university correspondence (documents, interviews, financial aid, decisions) from submission through enrollment	—
Scholarship Applications	+\$400 /scholarship	Essay/statement coaching + application review for each external or institutional scholarship application	Flat \$1,000 for 4+ scholarship applications

Multi-Country Discount: Applying to more than one country/system above (for example, Canada and the U.S.) gets 10% off the combined base fees. Applying to multiple Canadian schools — e.g. Ontario + UBC — still counts as one system, Canada; the discount is for combining different countries, not for adding more Canadian schools.

Referral Discounts: Discounts may apply for referred families — ask for details.

Payment Terms: 50% deposit due at agreement of terms; remaining balance due upon completion of the final application submission.

University & Portal Fees: Application fees charged by OUAC, UCAS, the Common App, the University of California, or individual universities are separate from, and in addition to, the consulting fees listed above. These are charged to the parent's credit card on file at the time each application is submitted.

Scope: This schedule covers one-time, project-based application support for a single admissions cycle — not multi-year strategic mentoring.

Track Record: 100% of my applicants have received offers from their top-choice universities.

How This Compares: Independent educational consultants typically charge \$5,000–\$15,000+ for comparable full-service application support (without email management!) These fees are structured to offer the same individualized, hands-on guidance at a fraction of that cost.
