

Cake Cutting Instructions

This guide is provided for your convenience and for informational purposes only. Please follow these guidelines to ensure you get the maximum number of servings from your cake. Your cake may be larger or smaller and more or less cuts may need to be made.

Step 1: Make a vertical cut in the cake separating it into a column. (Only cut one column at a time.) Number of columns will vary depending on the cake size.

Step 2: Cut the outside column horizontally to cut a slice of cake. Move onto the second column and so on, cutting once column at a time.

Your cake sizes are:

Of servings for each:
