

PRODUCTION OF POLYPROPYLENE PIPELINE PRODUCTS

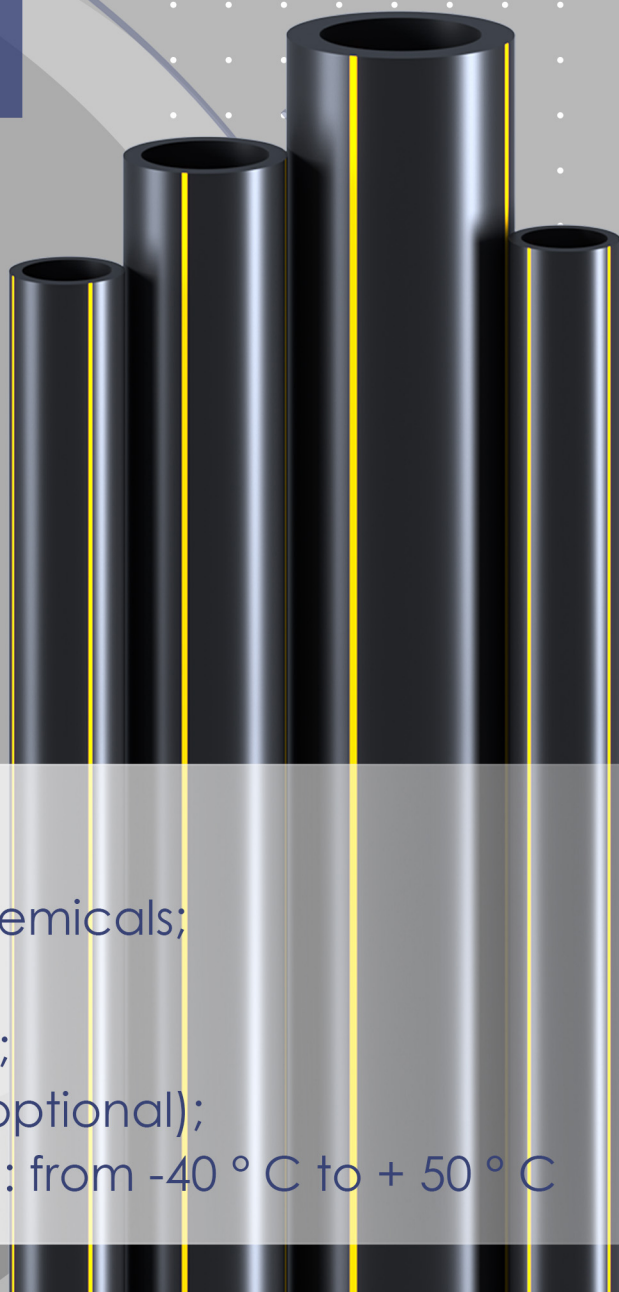

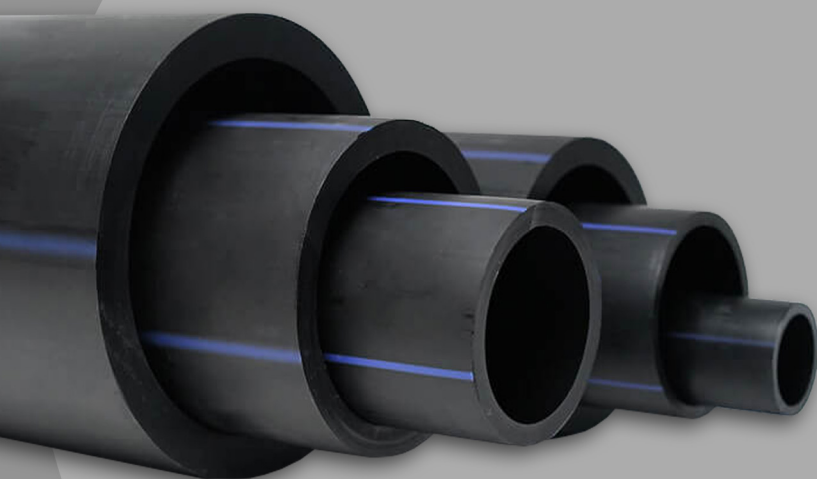

PIPE 100

HDPE Inpipe 100

- high-quality polyethylene pipes made of high-density polyethylene (PE100).

They are intended for use in water supply systems, gas supply, irrigation, drainage and other engineering systems.

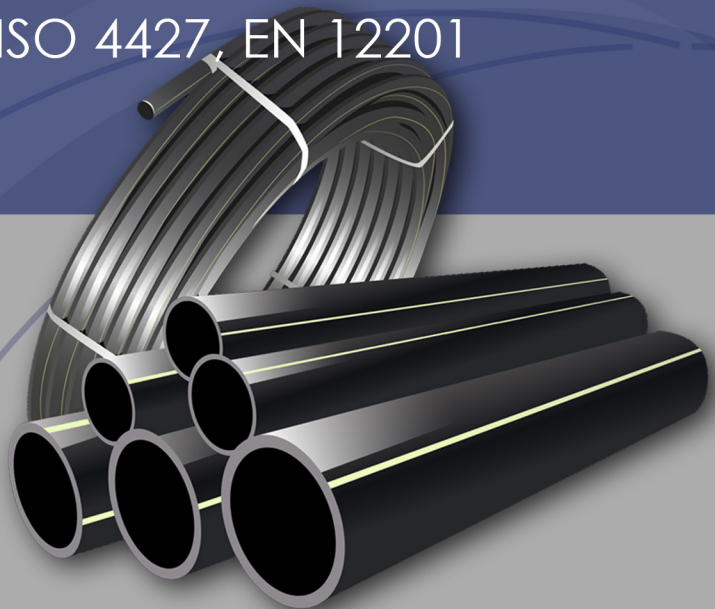

MAIN ADVANTAGES:

- High resistance to corrosion and chemicals;
- Easy installation and transportation;
- Durability - service life over 50 years;
- Resistance to ultraviolet radiation (optional);
- Wide operating temperature range: from -40°C to $+50^{\circ}\text{C}$

TECHNICAL SPECIFICATIONS

- Material: High-density polyethylene (PE100)
- Pressure: 6 to 16 kg/cm²
- Diameter: 63 to 400 mm (other sizes on request)
- Standards compliance: ISO 4427 EN 12201

The production of tubular products is carried out on high-tech equipment from the German company **Krauss Maffei**, a leader in the production of equipment for injection molding and extrusion of plastics.
