

# M.U.C. SaaS

a M.U.C.H. company

## Invoice and Data Management

Nobody knows invoice management better than the M.U.C.SaaS team. With a decade of experience, we pay more than 20 million dollars in invoices every month and counting! Not to mention, our experts are well versed in the language of data and can categorically store, secure, and audit all that information. So, you can be sure you are not overpaying for basic commodities. Here are just the first four reasons you should let us pay your company's bills.

### A/P SOLUTION

We can practically eliminate the need for an A/P specialist on payroll.

### SEAMLESS INTEGRATION

Our solution amalgamates with almost all accounting softwares, so no need to worry about incompatibility.

### 24/7 ONLINE ACCESS

Get around the clock access to your company's invoice data, right at your fingertips!

### REPORTING

We give our clients the ability to take their data and manipulate it at their leisure. With our reporting function you can sort your data by facility, division, etc. and export it right into Excel.

### NO LATE FEES

We guarantee our clients won't pay any late fees when we process their invoices for them.

I'm sure at one point in life you have thought to yourself, "I really dislike paying bills". Guess what? You are not alone; most people also do not enjoy it. Now imagine, instead of paying all those bills you only had to pay one. Well simply put, that is EXACTLY what we do. We take all those recurring invoices, we scrape the data from them, and log it into a database for our clients to conveniently access. And then we use that data to create a single invoice with one easy payment. At MUC we pride ourselves on being flexible. Even though most aspects of our services are already highly customizable, we are more willing to tailor the structure of our solution to meet any client specifications.

- **Save Those Trees!**

We will enroll your accounts online for most vendors, saving money and the environment.

- **Near Real Time.**

Capitalize on all your utility data in one place. Updated daily, so you can feel confident that your information is accurate and current.

- **One Aggregated Bill**

Our invoice solution is easy to use and best of all you'll only have to pay one bill. We'll handle the rest!

- **No Late Fees!**

MUC guarantees our clients absolutely no late fees for as long as we pay their bills.

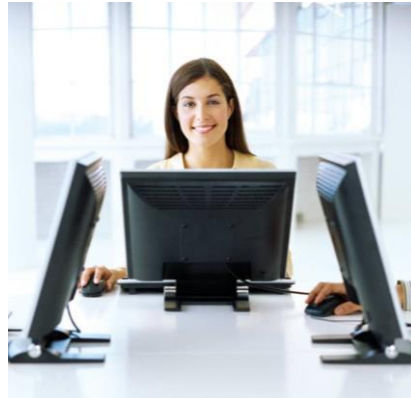

Expansion for a company is always exciting. Yet, it also comes with some challenges. Many organizations consider the physical or monetary hurdles and forget about the administrative demands of scaling. The administrative tasks of rerouting, paying, auditing, and filing invoices can be costly and take up space. We streamline this by making the entire process a digital one and passing on the savings. Consider this. In 2019 the US spent \$1.2 trillion on energy. Now consider that almost 17% of all invoices contain errors according to a study done by Engie. We can assist your organization in capturing these potential cost-savings.

## Features and Benefits

Our services come with a wide variety of benefits all geared towards simplicity and cost-effectiveness. Using our unique software, we provide our clients with the knowledge and data to take ownership of their utility spend. We are the toolkit used by more than 45 companies to mitigate cost, maximize efficiency, and augment the bottom line.

### CUSTOMER SUPPORT

A dedicated client account representative is on standby to address any questions or concerns that arise.

### PAPERLESS BILLS

Piles of paper are not only difficult to organize and store but are harming the environment.

We help by enrolling your accounts in paperless billing. In doing so, we help to reduce carbon footprints and save money.

### INVOICE AUDITING

The M.U.C.SaaS team reviews every invoice for inconsistencies prior to processing. If there are any pesky billing errors or leaks, we will find them and reach out to the service provider to investigate.

## Solution Requirements

- Detail of company structure (divisions and/or enterprises) MUC will provide the account inventory template.
- Identify all sites, billable accounts and their meters/services.
- Accounting G/L coding by meter and share % where applicable.
- Letter of authorization to grant MUC access to utility account data from various vendors.
- Identify master user, key contacts and system users including roles and scopes.
- (Optional) Provide existing vendor portal credentials
