

Report of special events happened in our school during 2016 – 2017 year.

Dear Sponsors,

Saint Jean Bosco's school Students and Staff haven't any words to qualify their gratitude of your inestimable support over the year. We asked to God to send his grace upon you and to protect all of you. Thank you so much for your large heart.

Our school began last September 2016, on October 4, 2016 Matthew passed; it caused large damages everywhere and two parts of our school were devastated. We believe if you did not accept to help us, until now we would be unable to repair the school.

our school. Yes, this is a part with Matthew but repaired

Thanks of God and of your large availability you rescued quickly of our school which was damaged with your financial support.

It is our gate school after Matthew.

after the devastated hurricane Matthew, our school has been recovered and our gate has been repaired thanks of your large generosity.

All the houses of our children hurricanes Matthew but among to you.

relatives were devastated by them we present only two pictures

Our children and parents were very happy to thank to God because He preserved their life during the devastation. All people had gone to the church to glorify Him as much as they could. They prayed, they sang, they danced to give thanks to God because they had the safe life.

Many people were screaming of Matthew desolation but God is a consolation for them. He guided many other good and lovely people toward Haitian people to help them; some of those people sent food, others brought everybody sent shelters, others people sent sheet metals. Haïti as a mother never will finish thanking all those friend peoples who came to succor his Haitian people especially Jeremian people.

After Devastator Matthew, our teachers, our cooks and our two probationary came to Saint-Jean Bosco's school. We organized a meeting together; we shared our group by two. Then we decided to go and visit all our school children. Those children families were very happy to receive our visit. We spoke with them. They had all their house broken loss all things they had in them. At the same time we invited those children parents to ask them to send their children to school as better solution to help them to advance. Our staff was very happy to make that work and to know where our children lived.

. We met our all school children them to sit down together at their school.

after Matthew. It was a joy for

After Devastator Matthew and when the building was ready to restart school, our children were very happy to continue to study.

Almost all our children loss their to fabricate others uniform for replace what they loss thanks to your generosity after much for all your continued help. We have reason to

return to school to uniform, we obligate them. We could Matthew, thank you so tell you: "Love".

Our children had joy to work to school after Matthew. They decided to make their class-work. British Colombia, American and French people, Centre de Formation Saint Jean Bosco doesn't finish thanking you for your hard work in order to help us to realize our goal for the poorest ones in Jeremie. We clack our hands, we stomp our feet to tell you:

"Congratulation".

God knows more than us. Why? would be able to continue to they do. They are testing their first exam. All that happened thanks of your great moral and financial support.

We didn't know if our children study after the hurricanes. But

Aside of school materials we bought to our children, after the hurricanes we received some note books from French and we shared them to our of them received one. They were very happy to have

pupils. Each each one.

Before Christmas feast Chalice distributed lamps, tents and mattress to their sponsored children. Those children parents were there at the distribution time to receive the gifts for their children.

Our school children had the pleasure to eat their Christmas food together.

In March our partner Claude Grude, from France came with a group. He proposes us to install an Interactive Board in our school in order to facilitate the understanding of our students and to help our teachers to be more practicable in their teaching. A first session should organize in July to initiate our children in that new method. The Interactive Board should be installed after the formation given to our teachers. We are preparing to start everything about that project by July 15th.

Tek4 kids (A small American Organization) accepts with their heart to help our teachers to learn informatics and after that they will be able to work well on that numeric board that we shall install.

In May 2017 Mr. Joe came to visit our school. He gave us a power vitamin to put in our school children feeding before preparing the plates. According him that vitamin supposes to make our students vigorous and super active to understand the teaching of their teachers.

Between our children nine were very happy to do their first communion. May 12th 2017.

Every day, after school, our school children realized cooking activities. They start those activities their activities in May 2017. After Matthew we obligate to make more arrangement to advance our school works studs. Some our children choose embroideries, some of them took cooking and others took under-plat.

Thanks of your large generosity we bought some rice bags and oil to distribute to our children before the holydays. Then we expect they will have something at home to eat on the holiday season.

After the Hurrricanes Matthew, we are at the end of a School Year. We praise God to give us the possibility helpful one more year. Thanks to you Lord. This is our goal to help and to serve others. This was our dream and today, we obviously say, it not a dream, but a reality. If God give us the heart, the Spirit and hearth to work for his people, other people give us the materials and financial ways to get success. Those people are from Dawson Creek, from Angouleme in France, from USA. You help us to get food to feed our children, to provide them uniforms, to give them drinking water, to educate them, to take care of them when they get sick.... Without you, here in Jeremie we would stay like as dreamers and thinkers. Thank you to all of you who give us the possibility to practical, realistic, effective. You help us to pass from words to acts, from speech to action. For ever our gratitude will go toward you for you make us realize our vocation as people of God: Serve Lord through the poorest ones.

Thank you so much to every one

God bless you all.
